

Contents

A Reality of Its Own	1
Richard Rothenberg	
Modeling the Impact of Behavior Change on the Spread of Ebola	5
Jessica R. Conrad, Ling Xue, Jeremy Dewar and James M. Hyman	
A Model for Coupled Outbreaks Contained by Behavior Change	25
John M. Drake and Andrew W. Park	
Real-Time Assessment of the International Spreading Risk Associated with the 2014 West African Ebola Outbreak	39
Ana Pastore-Piontti, Qian Zhang, Marcelo F. C. Gomes, Luca Rossi, Chiara Poletto, Vittoria Colizza, Dennis L. Chao, Ira M. Longini, M. Elizabeth Halloran and Alessandro Vespignani	
Modeling the Case of Early Detection of Ebola Virus Disease	57
Diego Chowell, Muntaser Safan and Carlos Castillo-Chavez	
Modeling Ring-Vaccination Strategies to Control Ebola Virus Disease Epidemics	71
Gerardo Chowell and Maria Kiskowski	
Evaluating the Number of Sickbeds During Ebola Epidemics Using Optimal Control Theory	89
Eunok Jung, Jonggul Lee and Gerardo Chowell	
Inverse Problems and Ebola Virus Disease Using an Age of Infection Model	103
Alexandra Smirnova, Linda DeCamp and Hui Liu	
Assessing the Efficiency of Movement Restriction as a Control Strategy of Ebola	123
Baltazar Espinoza, Victor Moreno, Derdei Bichara and Carlos Castillo-Chavez	

Patch Models of EVD Transmission Dynamics	147
Bruce Pell, Javier Baez, Tin Phan, Daozhou Gao, Gerardo Chowell and Yang Kuang	
From Bee Species Aggregation to Models of Disease Avoidance: The <i>Ben-Hur</i> effect	169
K.E. Yong, E. Diaz Herrera and C. Castillo-Chavez	
Designing Public Health Policies to Mitigate the Adverse Consequences of Rural-Urban Migration via Meta-Population Modeling	187
Zhilan Feng, Yiqiang Zheng, Nancy Hernandez-Ceron and Henry Zhao	
Age of Infection Epidemic Models	207
Fred Brauer	
Optimal Control of Vaccination in an Age-Structured Cholera Model	221
K. Renee Fister, Holly Gaff, Suzanne Lenhart, Eric Numfor, Elsa Schaefer and Jin Wang	
A Multi-risk Model for Understanding the Spread of Chlamydia	249
Asma Azizi, Ling Xue and James M. Hyman	
The 1997 Measles Outbreak in Metropolitan São Paulo, Brazil: Strategic Implications of Increasing Urbanization	269
José Cassio de Moraes, Maria Claudia Corrêa Camargo, Maria Lúcia Rocha de Mello, Bradley S. Hersh and John W. Glasser	
Methods to Determine the End of an Infectious Disease Epidemic: A Short Review	291
Hiroshi Nishiura	
Statistical Considerations in Infectious Disease Randomized Controlled Trials	303
Matthew J. Hayat	
Epidemic Models With and Without Mortality: When Does It Matter?	313
Lisa Sattenspiel, Erin Miller, Jessica Dimka, Carolyn Orbann and Amy Warren	
Capturing Household Transmission in Compartmental Models of Infectious Disease	329
Jude Bayham and Eli P. Fenichel	

Bistable Endemic States in a Susceptible-Infectious-Susceptible Model with Behavior-Dependent Vaccination	341
Alberto d’Onofrio and Piero Manfredi	
Index	355

Mathematical and Statistical Modeling for Emerging and
Re-emerging Infectious Diseases

Chowell, G.; Hyman, J.M. (Eds.)

2016, IX, 356 p. 94 illus., 63 illus. in color., Hardcover

ISBN: 978-3-319-40411-0
