Contents

1 Introduction ............................................. 1
   1.1 Trauma: A Worldwide Epidemic ....................... 1
   1.2 Physical Trauma ........................................ 2
   1.3 Responses to Physical Trauma ............................. 3
       1.3.1 The Historical Timeline of Systematic
       Trauma Management ........................................ 3
   1.4 Toxic Trauma ........................................... 6
   1.5 The Epidemiology of Toxic Trauma ...................... 7
   1.6 The Clinical Importance of Toxic Trauma ................. 8
   1.7 Approaches to Trauma Management ....................... 9
   1.8 Conclusion ............................................ 9
   Further Reading ............................................ 10

2 Toxic Trauma: A Historical Perspective ..................... 11
   2.1 Exposure to Chemicals From Early Times
        to the Nineteenth Century ............................... 11
   2.2 The Industrial Revolution and the Development
        of Mass Chemical Warfare ................................ 13
   2.3 First Suggested Uses of Chemical Weapons
        in the Nineteenth Century ............................... 15
   2.4 The First World War .................................... 15
   2.5 Between the World Wars ................................ 18
       2.5.1 The 1930s: First Systematic Use of Chemical
       Warfare Agents Against Civil Populations .......... 18
   2.6 The Second World War .................................. 19
       2.6.1 The Secret Development of Nerve Agents .......... 20
   2.7 The Cold War Period ..................................... 21
   2.8 Continued Military Use of Chemical Warfare Agents .... 21
   2.9 Mass Accidental Release of Toxic Industrial Chemicals .... 22
   2.10 Conclusions ........................................... 22
   Further Reading ........................................... 23
3 The Classification and Properties of Toxic Hazards

3.1 Introduction ........................................ 25
3.2 Toxic Hazards: Definitions .......................... 26
3.3 Acute and Chronic Toxic Hazards .................. 26
3.4 The Classification of Toxic Hazards ............... 27
  3.4.1 Toxic Industrial Chemicals ..................... 27
  3.4.2 Military Toxic Hazards: Agents of Chemical
       Warfare ........................................ 28
3.5 Classification of Toxic Hazards According to Their Effects
      on Body Systems ................................ 29
  3.5.1 Central Nervous System ......................... 30
  3.5.2 Peripheral Nervous System ...................... 30
  3.5.3 Respiratory System .............................. 30
  3.5.4 Heart and Central Vascular System .............. 31
  3.5.5 Alimentary System ............................. 31
  3.5.6 Skin and Epithelial System ...................... 31
3.6 Properties of Toxic Chemical Agents ................ 32
  3.6.1 Physical Properties of Toxic Chemical Agents ... 32
  3.6.2 Persistency ...................................... 34
  3.6.3 Toxicity ......................................... 36
  3.6.4 Latency .......................................... 45
3.7 Conclusions .......................................... 47
Further Reading ......................................... 47

4 Exposure to Toxic Hazards .................................. 49

4.1 Introduction .......................................... 49
4.2 Acute and Chronic Exposures .......................... 50
4.3 Routes of Exposure to Toxic Agents ................. 50
  4.3.1 Inhalation ....................................... 50
  4.3.2 Skin and Mucous Membranes ..................... 51
  4.3.3 Ingestion ........................................ 52
  4.3.4 Injection ......................................... 52
  4.3.5 Envenomation .................................... 52
4.4 Detection of Accidental and Deliberate Exposure
      to Toxic Chemical Agents ........................... 55
  4.4.1 Military .......................................... 55
  4.4.2 Civil ............................................. 56
  4.4.3 Identification of a Toxic Release by Medical
        Responders ....................................... 56
4.5 Mitigation of Exposure to Toxic Agents ............... 57
4.6 Personal Protective Equipment ......................... 58
4.7 Decontamination ....................................... 63
  4.7.1 Decontamination Basics .......................... 63
  4.7.2 Secondary Contamination ......................... 64

## 10 Preparing for Toxic Trauma

### 10.1 Introduction

Page 181

### 10.2 The Risk of a Toxic Chemical Agent Release

Page 182

### 10.3 Key Medical Lessons Learned from Previous Releases of Toxic Chemical Agents

- 10.3.1 World War I
- 10.3.2 1936: Italian Use of Mustard Gas in Abyssinia
- 10.3.3 Use of Nerve Agents and Mustard Gas in the Iran–Iraq War
- 10.3.4 Chemical Attack Against Civilians in Hallabja, Kurdistan
- 10.3.5 1994–1995: Terrorist Sarin Attacks in Matsumoto and Tokyo, Japan
- 10.3.6 2002: The Moscow Theatre Incident
- 10.3.7 1984: Accidental Release of Methyl Isocyanate, Bhopal, India
- 10.3.8 Chemical Attacks on Civilians During the Syrian Civil War

### 10.4 Responding to the Hazards of Toxic Trauma
