

# Contents

<b>Mixture Theory for Modeling Biological Tissues: Illustrations from Articular Cartilage</b> . . . . .	1
Gerard A. Ateshian	
<b>A Bio-chemo-mechanical Model for Cell Contractility, Adhesion, Signaling, and Stress-Fiber Remodeling</b> . . . . .	53
Robert M. McMeeking and Vikram S. Deshpande	
<b>Nonlinear Continuum Mechanics and Modeling the Elasticity of Soft Biological Tissues with a Focus on Artery Walls</b> . . . . .	83
Ray W. Ogden	
<b>Microstructure and Mechanics of Human Aortas in Health and Disease</b> . . . . .	157
Gerhard A. Holzapfel	
<b>Arterial and Atherosclerotic Plaque Biomechanics with Application to Stent Angioplasty Modeling</b> . . . . .	193
Brian L. O'Reilly, Claire Conway, J. Patrick McGarry and Peter E. McHugh	
<b>Biomechanics of Myocardial Ischemia and Infarction</b> . . . . .	233
Colleen M. Witzenburg and Jeffrey W. Holmes	
<b>Fiber-Network Modeling in Biomechanics: Theoretical and Analytical Approaches</b> . . . . .	271
Rohit Y. Dhume and Victor H. Barocas	
<b>Author Index</b> . . . . .	309
<b>Subject Index</b> . . . . .	311

Biomechanics: Trends in Modeling and Simulation

Holzapfel, G.A.; Ogden, R.W. (Eds.)

2017, IX, 316 p. 129 illus., 63 illus. in color., Hardcover

ISBN: 978-3-319-41473-7
