Contents

1 Introduction to Business Processes and Business Process Modeling .................................................. 1
  1.1 Quality of Business Processes .............................................. 4
  1.2 Process Thinking ............................................................ 7
    1.2.1 Process Improvement and Innovation Patterns ............ 10
    1.2.2 Process Types and Process Maturity ......................... 10
  1.3 BPM in the Large and in the Wild ................................. 14
  1.4 Introduction to Modeling ................................................. 18
    1.4.1 Abstraction Mechanisms and Levels of Modeling ......... 20
    1.4.2 Perspectives of Modeling ........................................... 23
  1.5 Business Process Modeling .............................................. 27
    1.5.1 Goals of Process Modeling ........................................ 27
    1.5.2 Perspectives to Business Process Modeling ............... 33
    1.5.3 Combined Behavioral and Functional Approaches ....... 38
  1.6 Summary ........................................................................... 46
  References ........................................................................... 46

2 Quality of Business Process Models .................................................. 53
  2.1 Quality in Information Systems Development and Evolution .... 53
    2.1.1 Data and Information Quality .................................... 55
    2.1.2 Quality of Requirements Specifications ..................... 58
    2.1.3 Quality of Data Models .............................................. 60
    2.1.4 Quality of Enterprise Models ..................................... 63
  2.2 Comprehensive Frameworks for the Quality of Models ........ 64
    2.2.1 SEQUAL—Semiotic Quality Framework ....................... 65
    2.2.2 Quality of Models According to Nelson et al ............ 70
  2.3 Quality of Business Process Models .................................... 75
    2.3.1 Quality of Business Processes ................................... 75
    2.3.2 Guidelines of Modeling—GoM ................................. 85
    2.3.3 Seven Process Modeling Guidelines (7PMG) .............. 86
    2.3.4 Pragmatic Guidelines for Business Process Modeling ... 88
5.3 Evaluation of Process Modeling Languages

5.3.1 Quality of BPMN

5.3.2 Ontological Analysis Using the Bunge–Wand–Weber Framework

5.3.3 The Workflow Pattern Framework

5.3.4 Evaluating BPMN Using SEQUAL

5.3.5 Evaluation of the BPMN Notation

5.3.6 Combined Semiotic, Ontological, and Workflow Pattern Evaluation

5.3.7 Semistructured Interviews of BPMN Users

5.3.8 Case Study of BPMN in Practice

5.3.9 Statistical Analysis of BPMN Models

5.3.10 Business Processes Are More Than What Is Possible to Represent in BPMN

5.3.11 Evaluation of BPMN Modeling Tools

5.4 Achieving Quality in Business Process Models Through Modeling Methodology

5.4.1 Socio-Technical WalkThrough (STWT)

5.4.2 The Modeling Conference Technique

5.5 Summary

References

6 Some Future Directions for Business Process Modeling

6.1 Business Process Modeling Integrated with other Types of Modeling

6.2 Beyond the Activity—Business Process Modeling across Organizational Levels

6.3 Welcome to the Machine—Tools from Interpreters to Modelers as Part of Big Data Ecosystems

6.4 Summary
