

# Contents

<b>1</b>	<b>Memorized Linear Discrete Systems</b> . . . . .	1
1.1	Basic Iterative Solutions . . . . .	1
1.2	Iterative Solutions with Distinct Eigenvalues . . . . .	4
1.3	Iterative Solutions with Multiplicity . . . . .	12
1.4	Stability and Boundary . . . . .	27
1.5	1-D Memorized Linear Discrete Systems . . . . .	46
1.5.1	1-D Linear Discrete Systems Without Memory . . . . .	46
1.5.2	1-D Linear Discrete System with Finite-Step Memory . . . . .	47
	References . . . . .	50
<b>2</b>	<b>Memorized Nonlinear Discrete Systems</b> . . . . .	51
2.1	Definitions . . . . .	51
2.2	Fixed Points and Stability . . . . .	55
2.3	Bifurcation and Stability Switching . . . . .	70
2.3.1	Stability and Switching . . . . .	76
2.3.2	Bifurcations . . . . .	102
2.3.3	1-D Memorized Nonlinear Discrete Systems . . . . .	110
	References . . . . .	114
<b>3</b>	<b>Discretization of Time-delay Systems</b> . . . . .	115
3.1	Time-delay Systems . . . . .	115
3.2	Basic Discretization Methods . . . . .	118
3.2.1	Forward Euler Method . . . . .	120
3.2.2	Backward Euler Method . . . . .	127
3.2.3	Trapezoidal Rule Discretization . . . . .	133
3.2.4	Midpoint Method . . . . .	141
3.3	Explicit Runge–Kutta Methods . . . . .	148
3.3.1	Runge–Kutta Method of Order 2 . . . . .	148
3.3.2	General Explicit Runge–Kutta Methods . . . . .	152
3.3.3	Runge–Kutta Method of Order 3 . . . . .	161
3.3.4	Runge–Kutta Method of Order 4 . . . . .	165

3.4	Implicit Runge–Kutta Methods . . . . .	169
3.4.1	Polynomial Interpolation . . . . .	171
3.4.2	Implicit Runge–Kutta Methods . . . . .	173
3.4.3	Gauss Method . . . . .	179
3.4.4	Radau Method . . . . .	183
3.4.5	Lobatto Method . . . . .	187
3.4.6	Diagonally Implicit RK Methods . . . . .	190
3.5	Multistep Methods . . . . .	193
3.5.1	Adams–Bashforth Methods . . . . .	193
3.5.2	Adams–Moulton Methods . . . . .	203
3.5.3	Explicit Adams Methods . . . . .	212
3.5.4	Implicit Adams Methods . . . . .	214
3.5.5	General Forms . . . . .	217
	References . . . . .	220
<b>4</b>	<b>Periodic Flows in Time-delay Systems . . . . .</b>	<b>221</b>
4.1	Interpolation Method . . . . .	221
4.2	Continuous Integration Method . . . . .	242
4.3	Discrete Fourier Series . . . . .	264
	References . . . . .	270
<b>5</b>	<b>Time-Delayed Duffing Oscillator . . . . .</b>	<b>271</b>
5.1	A Semi-analytical Method . . . . .	271
5.1.1	Discretization . . . . .	271
5.1.2	Period-1 Motions . . . . .	273
5.1.3	Period-m Motions . . . . .	276
5.1.4	Finite Discrete Fourier Series . . . . .	278
5.2	Bifurcation Trees of Periodic Motions . . . . .	280
5.3	Frequency–Amplitude Characteristics . . . . .	291
5.4	Numerical Illustrations . . . . .	293
	Reference . . . . .	296
	<b>Index . . . . .</b>	<b>297</b>

Memorized Discrete Systems and Time-delay

Luo, A.C.J.

2017, X, 298 p. 35 illus., 17 illus. in color., Hardcover

ISBN: 978-3-319-42777-5
