# Contents

## Part I  Award Winners

**Exploiting Solving Phases for Mixed-Integer Programs** .......................... 3  
Gregor Hendel

**An Extended Formulation for the Line Planning Problem** .................. 11  
Heide Hoppmann

**Improving the Performance of MIP and MINLP Solvers by Integrated Heuristics** .......................... 19  
Timo Berthold

## Part II  Discrete Optimization, Integer Programming, Graphs and Networks

**An Experimental Study of Algorithms for Controlling Palletizers** ........... 27  
Frank Gurski, Jochen Rethmann and Egon Wanke

**Robust Two-Stage Network Problems** ........................................... 35  
Adam Kasperski and Pawel Zieliński

**Composed Min-Max and Min-Sum Radial Approach to the Emergency System Design** ........................................... 41  
Marek Kvet and Jaroslav Janáček

**LP-Based Relaxations of the Skiving Stock Problem—Improved Upper Bounds for the Gap** ............................... 49  
John Martinovic and Guntram Scheithauer

**Creating Worst-Case Instances for Upper and Lower Bounds of the Two-Dimensional Strip Packing Problem** ............. 55  
Torsten Buchwald and Guntram Scheithauer
The Maximum Scatter TSP on a Regular Grid ............................. 63
Isabella Hoffmann, Sascha Kurz and Jörg Rambau

Using Contiguous 2D-Feasible 1D Cutting Patterns for the 2D Strip Packing Problem ........................................... 71
Isabel Friedow and Guntram Scheithauer

Computing Partitions with Applications to Capital Budgeting Problems .......................................................... 79
Frank Gurski, Jochen Rethmann and Eda Yilmaz

Upper Bound for the Capacitated Competitive Facility Location Problem .................................................. 87
V.L. Beresnev and A.A. Melnikov

The Onset of Congestion in Charging of Electric Vehicles for Proportionally Fair Network Management Protocol .......... 95
Ľuboš Buzna

A Comparison of Heuristic Methods for the Prize-Collecting Steiner Tree Problem and Their Application in Genomics ........ 101
Murodzhon Akhmedov, Ivo Kwee and Roberto Montemanni

A Benders Decomposition Approach for Static Data Segment Location to Servers Connected by a Tree Backbone ............. 109
Goutam Sen, Mohan Krishnamoorthy, Vishnu Narayanan and Narayan Rangaraj

Mathematical Optimization of a Magnetic Ruler Layout with Rotated Pole Boundaries ........................................ 117
Marzena Fügenschuh, Armin Fügenschuh, Marina Ludszuweit, Aleksandar Mojsic and Joanna Sokół

A New Exact Approach to the Space-Free Double Row Layout Problem ............................................... 125
Anja Fischer, Frank Fischer and Philipp Hungerländer

Part III Logistics and Transportation

Cost Allocation for Horizontal Carrier Coalitions Based on Approximated Shapley Values .............................. 133
Kristian Schopka and Herbert Kopfer

Collaborative Transportation Planning with Forwarding Limitations ............................................... 141
Mario Ziebuhr and Herbert Kopfer

Location Planning of Charging Stations for Electric City Buses 237
Kilian Berthold, Peter Förster and Brita Rohrbeck

A Hybrid Solution Approach for Railway Crew Scheduling Problems with Attendance Rates 243
Kirsten Hoffmann

A Comparison of Hybrid Electric Vehicles with Plug-In Hybrid Electric Vehicles for End Customer Deliveries 251
Christian Doppstadt

Robust Efficiency in Public Bus Transport and Airline Resource Scheduling 259
Bastian Amberg, Lucian Ionescu and Natalia Kliewer

Route Minimization Heuristic for the Vehicle Routing Problem with Multiple Pauses 265
Alexey Khmelev

Combining NLP and MILP in Vertical Flight Planning 273
Liana Amaya Moreno, Zhi Yuan, Armin Fügenschuh, Anton Kaier and Swen Schlobach

European Air Traffic Flow Management with Strategic Deconfliction 279
Jan Berling, Alexander Lau and Volker Gollnick

On Optimally Allocating Tracks in Complex Railway Stations 287
Reyk Weiß, Michael Kümmling and Jens Opitz

Part IV Metaheuristics and Multiple Criteria Decision Making

Optimal and Near-Optimal Strategies in Discrete Stochastic Multiobjective Quasi-hierarchical Dynamic Problems 295
Maciej Nowak and Tadeusz Trzaskalik

Multicriterial Design of a Hydrostatic Transmission System Via Mixed-Integer Programming 301
Lena C. Altherr, Thorsten Ederer, Lucas S. Farnetane, Philipp Pöttgen, Angela Vergé and Peter F. Pelz

Optimal Pulse-Doppler Waveform Design for VHF Solid-State Air Surveillance Radar 309
Milos Jevtic, Nikola Zogovic and Stevica Graovac

A Hybrid Approach of Optimization and Sampling for Robust Portfolio Selection 317
Omar Rifki and Hirotaka Ono
Tabu Search Heuristic for Competitive Base Station Location
Problem .................................................... 325
Marceau Coupechoux, Ivan Davydov and Stefano Iellamo

Part V  OR for Security, Policy Modeling and Public Sector OR

Andreas Schilling

Cologne Mass Casualty Incident Exercise 2015—Using Linked Databases to Improve Risk and Crisis Management in Critical Infrastructure Protection ................................................ 341
Florian Brauner, Andreas Lotter, Ompe Aime Mudimu and Alex Lechleuthner

Simulation-Based Analyses for Critical Infrastructure Protection: Identifying Risks by Using Data Farming .................. 349
Silja Meyer-Nieberg, Martin Zsifkovits, Dominik Hauschild and Stefan Luther

Time-Based Estimation of Vulnerable Points in the Munich Subway Network .................................................. 355
Marian Sorin Nistor, Doina Bein, Wolfgang Bein, Matthias Dehmer and Stefan Pickl

Two Approaches to Cooperative Covering Location Problem and Their Application to Ambulance Deployment ............... 361
Hozumi Morohosi and Takehiro Furuta

Part VI  Production, Operations Management, Supply Chains, Stochastic Models and Simulation

Change Point Detection in Piecewise Stationary Time Series for Farm Animal Behavior Analysis ............................. 369
Sandra Breitenberger, Dmitry Efrosinin, Wolfgang Auer, Andreas Deining her and Ralf Waßmuth

Reliable Order Promising with Multidimensional Anticipation of Customer Response ................................................ 377
Ralf Gössinger and Sonja Kalkowski

A Scalable Approach for the K-Staged Two-Dimensional Cutting Stock Problem .................................................. 385
Frederico Dusberger and Günther R. Raidl

A Logic-Based Benders Decomposition Approach for the 3-Staged Strip Packing Problem ...................................... 393
Johannes Maschler and Günther R. Raidl

Supporting Product Optimization by Customer Data Analysis 491
Tatiana Deriyenko, Oliver Hartkopp and Dirk C. Mattfeld

Inspection of the Validity in the Frequent Shoppers Program
by Using Particle Filter 497
Shinsuke Suzuki and Kei Takahashi

Value-at-Risk Forecasts Based on Decomposed Return Series:
The Short Run Matters 503
Theo Berger

Feed-In Forecasts for Photovoltaic Systems and Economic
Implications of Enhanced Forecast Accuracy 511
Oliver Ruhnau and Reinhard Madlener

Part VIII Financial Modeling, Accounting and Game Theory
Transfer Pricing—Heterogeneous Agents and Learning Effects 519
Arno Karrer

Modeling of Dependent Credit Rating Transitions Governed
by Industry-Specific Markovian Matrices 525
Dmitri V. Boreiko, Yuri M. Kaniovski and Georg Ch. Pflug

Replicating Portfolios: $L^1$ Versus $L^2$ Optimization 533
Jan Natolski and Ralf Werner

The Existence of Equilibria in the Leader-Follower Hub Location
and Pricing Problem 539
Dimitrije D. Ćvokić, Yury A. Kochetov and Aleksandr V. Plyasunov

Part IX Continuous and Stochastic Optimization, Control Theory
Adaptive Representation of Large 3D Point Clouds for Shape
Optimization 547
Milan Ćurković and Damir Vučina

The Distortionary Effect of Petroleum Production Sharing
Contract: A Theoretical Assessment 555
Fazel M. Farimani, Xiaoyi Mu and Ali Taherifard

Together We Are Strong—Divided Still Stronger? Strategic
Aspects of a Fiscal Union 563
D. Blueschke and R. Neck

Adaptive Simulated Annealing with Homogenization
for Aircraft Trajectory Optimization 569
C. Bouttier, O. Babando, S. Gadat, S. Gerchinovitz, S. Laporte
and F. Nicol
Optimization Under Uncertainty Based on Multiparametric Kriging Metamodels .................................................. 575
Ahmed Shokry and Antonio Espuña

Part X Scheduling, Project Management and Health Services

Influence of Appointment Times on Interday Scheduling .......... 585
Matthias Schacht, Lara Wiesche, Brigitte Werners and Birgitta Weltermann

Time-Dependent Ambulance Deployment and Shift Scheduling of Crews .................................................. 591
Lara Wiesche

Personnel Planning with Multi-tasking and Structured Qualifications .......................................................... 597
Tobias Kreiter, Ulrich Pferschy and Joachim Schauer

Algorithmic System Design Using Scaling and Affinity Laws ... 605
Lena C. Altherr, Thorsten Ederer, Christian Schänzle, Ulf Lorenz and Peter F. Pelz

A New Hierarchical Approach for Optimized Train Path Assignment with Traffic Days ................................. 613
Daniel Pöhle and Matthias Feil

Modelling and Solving a Train Path Assignment Model with Traffic Day Restriction ........................................ 621
Karl Nachtigall

Part XI Energy

Portfolio Management and Stochastic Optimization in Discrete Time: An Application to Intraday Electricity Trading and Water Values for Hydroassets ............................................. 631
Simone Farinelli and Luisa Tibiletti

Investments in Flexibility Measures for Gas-Fired Power Plants: A Real Options Approach .................................. 637
Barbara Glensk and Reinhard Madlener

Bidding in German Electricity Markets—Opportunities for CHP Plants .................................................. 645
Nadine Kumbartzky, Matthias Schacht, Katrin Schulz and Brigitte Werners

Well Drainage Optimization in Abandoned Mines Under Electricity Price Uncertainty .................................. 651
Reinhard Madlener and Mathias Lohaus
The Future Expansion of HVDC Power Transmission in Brazil: A Scenario-Based Economic Evaluation .......................... 659
Christian Köhnke Mendonça, Christian A. Oberst and Reinhard Madlener

Two-Stage Heuristic Approach for Solving the Long-Term Unit Commitment Problem with Hydro-Thermal Coordination ........... 667
Alexander Franz, Julia Rieck and Jürgen Zimmermann

Bilevel Model for Retail Electricity Pricing .............................. 675
Georgia E. Asimakopoulou, Andreas G. Vlachos and Nikos D. Hatziargyriou

Risk Analysis of Energy Performance Contracting Projects in Russia: An Analytic Hierarchy Process Approach ................. 683
Maria Garbuzova-Schlifter and Reinhard Madlener

Risk-Adapted Capacity Determination of Flexibility Investments for Distributed Energy Resource Systems ............................. 691
Katrin Schulz

Andreas Rudi, Magnus Froehling, Konrad Zimmer and Frank Schultmann

A Multi-objective Time Segmentation Approach for Power Generation and Transmission Models .............................. 707
Viktor Slednev, Valentin Bertsch and Wolf Fichtner

Practical Application of a Worldwide Gas Market Model at Stadtwerke München ......................................................... 715
Maik Günther

Erratum to: An Experimental Study of Algorithms for Controlling Palletizers ......................................................... E1
Frank Gurski, Jochen Rethmann and Egon Wanke
Selected Papers of the International Conference of the
German, Austrian and Swiss Operations Research
Societies (GOR, ÖGOR, SVOR/ASRO), University of
Vienna, Austria, September 1-4, 2015
