## Contents

1 The Skin Lipidome Under Environmental Stress—Technological Platforms, Molecular Pathways and Translational Opportunities ........................................ 1
   Florian Gruber

2 Squalene and Skin Barrier Function: From Molecular Target to Biomarker of Environmental Exposure ........................................ 29
   Boudiaf Boussouira and Dang Man Pham

3 Sunlight-Induced DNA Damage: Molecular Mechanisms and Photoprotection Strategies ................................. 49
   Thierry Douki

4 Urocanic Acid and Skin Photodamage: New Light on an Old Chromophore ........................................ 79
   Leopold Eckhart

5 The Skin Extracellular Matrix as a Target of Environmental Exposure: Molecular Mechanisms, Prevention and Repair ........................................ 101
   Kieran T. Mellody, Mike Bell and Michael J. Sherratt

6 Nitric Oxide Derivatives and Skin Environmental Exposure to Light: From Molecular Pathways to Therapeutic Opportunities .... 127
   Christoph V. Suschek

7 Melanocortin 1 Receptor (MC1R) as a Global Regulator of Cutaneous UV Responses: Molecular Interactions and Opportunities for Melanoma Prevention ........................................ 155
   Erin M. Wolf Horrell and John A. D’Orazio

8 The Cutaneous Melanocyte as a Target of Environmental Stressors: Molecular Mechanisms and Opportunities ............. 175
   Laurent Marrot
9  The Role of Epidermal p38 Signaling in Solar UV Radiation-Induced Inflammation: Molecular Pathways and Preventive Opportunities
Jin Mo Park and Yasuyo Sano

10 UV-Induced Chemokines as Emerging Targets for Skin Cancer Photochemoprevention
Scott N. Byrne and Gary M. Halliday

11 TLR3 and Inflammatory Skin Diseases: From Environmental Factors to Molecular Opportunities
Risa Tamagawa-Mineoka, Mayumi Ueta and Norito Katoh

12 Sirtuins and Stress Response in Skin Cancer, Aging, and Barrier Function
Yu-Ying He

13 Cutaneous Opioid Receptors and Stress Responses: Molecular Interactions and Opportunities for Therapeutic Intervention
Hanane Chajra

14 Regulation of Cutaneous Stress Response Pathways by the Circadian Clock: From Molecular Pathways to Therapeutic Opportunities
Elyse van Spyk, Milton Greenberg, Faraj Mourad and Bogi Andersen

15 Endocannabinoids and Skin Barrier Function: Molecular Pathways and Therapeutic Opportunities
Sergio Oddi and Mauro Maccarrone

16 The Aryl Hydrocarbon Receptor (AhR) as an Environmental Stress Sensor and Regulator of Skin Barrier Function: Molecular Mechanisms and Therapeutic Opportunities
Rebecca Justiniano and Georg T. Wondrak

17 Biological Cell Protection by Natural Compounds, a Second Line of Defense Against Solar Radiation
Ludger Kolbe

18 The Cutaneous Microbiota as a Determinant of Skin Barrier Function: Molecular Interactions and Therapeutic Opportunities
Julia J. van Rensburg, Lana Dbeibo and Stanley M. Spinola

19 Sensing Environmental Factors: The Emerging Role of Receptors in Epidermal Homeostasis and Whole-Body Health
Mitsuhiro Denda
