Contents

Stochastic Bounds and Histograms for Active Queues Management and Networks Analysis .............................................. 1
  Farah Al-Salah, Hind Castel-Taleb, Jean-Michel Fourneau, and Nihal Pekergin

Subsampling for Chain-Referral Methods ............................................. 17
  Konstantin Avrachenkov, Giovanni Neglia, and Alina Tuholukova

System Occupancy of a Two-Class Batch-Service Queue
with Class-Dependent Variable Server Capacity ................................. 32
  Jens Baetens, Bart Steyaert, Dieter Claeys, and Herwig Bruneel

Applying Reversibility Theory for the Performance Evaluation
of Reversible Computations ............................................................ 45
  Simonetta Balsamo, Filippo Cavallin, Andrea Marin, and Sabina Rossi

Fluid Approximation of Pool Depletion Systems ............................... 60
  Enrico Barbierato, Marco Gribaudo, and Daniele Manini

A Smart Neighbourhood Simulation Tool for Shared Energy Storage
and Exchange ....................................................................................... 76
  Michael Biech, Timo Bigdon, Christian Dielitz, Georg Fromme, and Anne Remke

Fluid Analysis of Spatio-Temporal Properties of Agents in a Population
Model ..................................................................................................... 92
  Luca Bortolussi and Max Tschaikowski

Efficient Implementations of the EM-Algorithm for Transient Markovian
Arrival Processes .................................................................................. 107
  Mindaugas Bražėnas, Gábor Horváth, and Miklós Telek

A Retrial Queue to Model a Two-Relay Cooperative Wireless System
with Simultaneous Packet Reception ................................................... 123
  Ioannis Dimitriou

Fingerprinting and Reconstruction of Functionals of Discrete Time Markov
Chains ...................................................................................................... 140
  Attila Egri, Illés Horváth, Ferenc Kovács, and Roland Molontay

On the Blocking Probability and Loss Rates in Nonpreemptive Oscillating
Queueing Systems ................................................................................ 155
  Fátima Ferreira, António Pacheco, and Helena Ribeiro
Analysis of a Two-Class Priority Queue with Correlated Arrivals from Another Node .......................................................... 167
   Abdulfetah Khalid, Sofian De Clercq, Bart Steyaert, and Joris Walraevens

Planning Inland Container Shipping: A Stochastic Assignment Problem ......................... 179
   Kees Kooiman, Frank Phillipson, and Alex Sangers

A DTMC Model for Performance Evaluation of Irregular Interconnection Networks with Asymmetric Spatial Traffic Distributions ......................... 193
   Daniel Lüdtke and Dietmar Tutsch

Whittle’s Index Policy for Multi-Target Tracking with Jamming and Nondetections ........................................................ 210
   José Niño-Mora

Modelling Unfairness in IEEE 802.11g Networks with Variable Frame Length .................................................. 223
   Choman Othman Abdullah and Nigel Thomas

Optimal Data Collection in Hybrid Energy-Harvesting Sensor Networks .............................................. 239
   Kishor Patil, Koen De Turck, and Dieter Fiems

A Law of Large Numbers for M/M/c/Delayoff-Setup Queues with Nonstationary Arrivals ...................... 253
   Jamol Pender and Tuan Phung-Duc

Energy-Aware Data Centers with $s$-Staggered Setup and Abandonment ........................................... 269
   Tuan Phung-Duc and Ken’ichi Kawanishi

Sojourn Time Analysis for Processor Sharing Loss System with Unreliable Server ............................. 284
   Konstantin Samouylov, Valery Naumov, Eduard Sopin, Irina Gudkova, and Sergey Shorgin

Performance Modelling of Optimistic Fair Exchange ......................................................... 298
   Yishi Zhao and Nigel Thomas

Author Index ........................................................................ 315
Analytical and Stochastic Modelling Techniques and Applications
23rd International Conference, ASMTA 2016, Cardiff, UK, August 24-26, 2016, Proceedings
Wittevrongel, S.; Phung-Duc, T. (Eds.)
2016, X, 315 p. 120 illus., Softcover
ISBN: 978-3-319-43903-7
