

Contents

1	Using Contextual Information to Identify Cyber-Attacks	1
	Ahmed AlEroud and George Karabatis	
2	A Framework for Contextual Information Fusion to Detect Cyber-Attacks	17
	Ahmed AlEroud and George Karabatis	
3	Detecting Unknown Attacks Using Context Similarity	53
	Ahmed AlEroud and George Karabatis	
4	Unwanted Traffic Detection and Control Based on Trust Management	77
	Zheng Yan, Raimo Kantola, Lifang Zhang, and Yutan Ma	
5	Characterization of Evolving Networks for Cybersecurity	111
	Josephine M. Namayanja and Vandana P. Janeja	
6	Cybercrime: Concerns, Challenges and Opportunities	129
	George S. Oreku and Fredrick J. Mtenzi	
7	Intrusion Prediction Systems	155
	Mohamed Abdhamed, Kashif Kifayat, Qi Shi, and William Hurst	
8	Analytics for Network Security: A Survey and Taxonomy	175
	Kaj Grahm, Magnus Westerlund, and Göran Pulkkis	
9	Security in Wireless Sensor Networks (WSNs) and Their Applications	195
	C.V. Anchugam and K. Thangadurai	
10	Emerging Trends in Security System Design Using the Concept of Social Behavioural Biometrics	229
	M.L. Gavrilova, F. Ahmed, S. Azam, P.P. Paul, W. Rahman, M. Sultana, and F.T. Zohra	

**11 Empirical Evidences in Software-Defined Network Security:
A Systematic Literature Review 253**
Izzat M. Alsmadi and Mohammad Zarour

12 SDN-Based Real-Time IDS/IPS Alerting System 297
Izzat M. Alsmadi and Ahmed AlEroud

**13 Digital Forensics: Implementation and Analysis for Google
Android Framework 307**
Harleen Kaur and Khairaj Ram Choudhary

**14 A Systematic Literature Review on Software-Defined
Networking 333**
Izzat M. Alsmadi, Iyad AlAzzam, and Mohammed Akour
