Contents

Cutting the Firing Squad Synchronization .................................................. 123
Antonios Dimitriadis, Martin Kutrib, and Georgios Ch. Sirakoulis

A Field Based Solution of Mazoyer’s FSSP Schema .................................. 134
Luidnel Maignan and Jean-Baptiste Yunès

A Class of Minimum-Time Minimum-State-Change Generalized FSSP
Algorithms ......................................................................................... 144
Hiroshi Umeo and Keisuke Imai

Asynchronous Cellular Automata and Asynchronous Discrete Models-ACA

Collective Infotaxis with Reactive Amoebae: A Note on a Simple
Bio-inspired Mechanism ...................................................................... 157
Nazim Fatès

A Fast Parallel Algorithm for the Robust Prediction
of the Two-Dimensional Strict Majority Automaton. ............................... 166
Eric Goles and Pedro Montealegre

Asynchrony Immune Cellular Automata .................................................. 176
Luca Mariot

Asynchronous Simulation of Boolean Networks by Monotone
Boolean Networks ................................................................................ 182
Tarek Melliti, Damien Regnault, Adrien Richard, and Sylvain Sené

Maxmin-ω: A Simple Deterministic Asynchronous Cellular
Automaton Scheme ........................................................................... 192
Ebrahim L. Patel

Cellular Automata Modelling and Simulation

Chance-Constrained Water Supply Operation of Reservoirs
Using Cellular Automata ...................................................................... 201
Mohammad Hadi Afshar and Mohammad Azizipour

Cognitive Map Routing ......................................................................... 210
Mohcine Chraibi and David Haensel

Characteristics of Pedestrian and Vehicle Flows at a Roundabout System 219
Hicham Echab, Hamid Ez-Zahraouy, Nourddine Lakouari,
and Rachid Marzoug

An Enhanced Cellular Automata Sub-mesh Model to Study High-Density
Pedestrian Crowds .............................................................................. 227
Claudio Feliciani and Katsuhiro Nishinari
Evacuation Dynamics in Room with Multiple Exits by Real-Coded Cellular Automata (RCA) .................................................. 344
  Kazuhiro Yamamoto and Riku Nonomura

Crowds, Traffic and Cellular Automata - CT&CA

A CA-Based Model of Dyads in Pedestrian Crowds: The Case of Counter Flow ................................................................. 355
  Luca Crociani, Andrea Gorrini, Katsuhiro Nishinari, and Stefania Bandini

Cellular Automata Model of Dyads Dynamics in a Pedestrian Flow by Rigid Body Approximation ........................................ 365
  Kenichiro Shimura, Stefania Bandini, and Katsuhiro Nishinari

Enhanced Multi-parameterized Cellular Automaton Model for Crowd Evacuation: The Case of a University Building .................... 376
  Dimitrios Tsorvas, Ioakeim G. Georgoudas, Franciszek Seredynski, and Georgios Ch. Sirakoulis

Heterogeneous Dynamics Through Coupling Cellular Automata Models ................................................................. 387
  Stefania Bandini and Giuseppe Vizzari

Advanced CA Crowd Models of Multiple Consecutive Bottlenecks .......... 396
  Pavel Hrabák, Jakub Porzycki, Marek Bukáček, Robert Łubaś, and Jarosław Wąs

Totally Asymmetric Simple Exclusion Process on an Open Lattice with Langmuir Kinetics Depending on the Occupancy of the Forward Neighboring Site .................................................. 405
  Daichi Yanagisawa and Shingo Ichiki

Agent-Based Simulation and Cellular Automata-ABS&CA

Multiscale Pedestrian Modeling with CA and Agent-Based Approaches:
Ubiquity or Consistency? ................................................................. 415
  Luca Crociani, Gregor Lämmel, and Giuseppe Vizzari

Line Patterns Formed by Cellular Automata Agents ........................................ 424
  Rolf Hoffmann and Dominique Désérable

On Formal Presentation of Update Rules, Density Estimate and Using Floor Fields in CA FF Pedestrian Dynamics Model SigMA.CA .................... 435
  Ekaterina Kirik and Tat’yana Vitova
Effects of Agents’ Fear, Desire and Knowledge on Their Success
When Crossing a CA Based Highway ........................................ 446
Anna T. Lawniczak, Leslie Ly, Shengkun Xie, and Fei Yu

Probabilistic Binary Classification with Use of 2D Cellular Automata .... 456
Miroslaw Szaban

Author Index ................................................................. 467
Cellular Automata
