Part I Introduction

1	Short Introduction to Cosmic Ray and γ-Ray Astronomy	3
1.1	Cosmic Rays	4
1.1.1	Spectrum and Chemical Composition	4
1.1.2	Cosmic Ray Production	6
1.2	γ -Ray Astrophysics	7
1.2.1	Detection Techniques	8
1.2.2	Mechanisms for γ -Ray Production	9
1.2.3	Sources of VHE Gamma Rays	11
	References	13
2	The Imaging Atmospheric Cherenkov Technique and the IACTs MAGIC and CTA	15
2.1	The Imaging Atmospheric Cherenkov Technique	15
2.1.1	Types of Showers	16
2.1.2	Cherenkov Light	18
2.1.3	The Imaging Technique	22
2.2	MAGIC	25
2.2.1	Hardware Description	25
2.2.2	Data Taking	35
2.2.3	Data Analysis	38
2.3	CTA	60
	References	63

Part II Contributions to the Lowering of the Threshold of Imaging Atmospheric Cherenkov Telescopes

3	Single Telescope Trigger for CTA	67
3.1	Description of the Analog Trigger Concept	67
3.2	Optimal Design Based on Simulations	68
3.2.1	Simulation Characteristics	69

3.2.2	Comparison Between Different Trigger Options	71
3.2.3	Gain Between Single-Telescope and Stereo Observation for the LSTs	75
3.2.4	Impact of the PMT Pulse Width on the Trigger Collection Area	78
3.3	Characterization of Trigger Hardware	80
3.3.1	Discrete Component Trigger	80
3.3.2	L0 ASIC Trigger	82
3.3.3	Conclusions	86
3.4	Concluding Remarks	87
	References	88
4	The Topo-Trigger: A New Stereo Trigger for Lowering the Energy Threshold of IACTs	91
4.1	Limitations of the Trigger System in the MAGIC Telescope	91
4.2	The Topo-Trigger	92
4.2.1	Setup of MC Simulations	93
4.2.2	Spatial Information Available at Trigger Level	93
4.2.3	Macrocell Selection	94
4.2.4	Expected Performance	98
4.3	Piggy-Back Measurements	99
4.3.1	Description of the Setup	100
4.3.2	Sensitivity and γ -ray Rate Comparison	101
4.4	Discussion and Conclusions	102
	References	103
 Part III Pulsar Wind Nebulae		
5	Introduction to Pulsar Wind Nebulae	107
5.1	Star Fate	107
5.1.1	Supernovae	109
5.1.2	Supernova Remnants	109
5.2	Neutron Stars	109
5.2.1	Inner Structure of an NS	110
5.2.2	Classification	111
5.2.3	NS Magnetosphere	112
5.3	Pulsars	113
5.3.1	Models for the Pulsar γ -Ray Emission	115
5.3.2	Observational Signatures of Pulsars at VHE Gamma Rays	117
5.4	Pulsar Wind Nebulae	117
5.4.1	Broadband Emission of PWNe	121
5.4.2	Models	124
	References	125
