Part I Healthcare Information Technology

1	Introduction	3
1.1	The Case for Common Understanding	5
1.1.1	The Need for Consistency	6
1.2	Information Cycle	7
1.3	Motivation for Cooperation	8
1.4	Definition of Key Terms and Concepts	9
1.4.1	Conformance	9
1.4.2	Interoperability	10
1.5	Interoperability Levels	12
1.6	Standards Development Life-Cycle	13
1.7	ISO/OSI Stack	15
1.8	Reference Model for Open Distributed Processing (RM-ODP)	17
1.9	Concept Relationships	19
1.10	Approaches to Standards Development	20
1.11	Testing	22
1.12	Scope and Purpose	23
1.13	Commonly Used Terms and Definitions	25
1.14	Intended Audience	27
1.15	Keywords for Use	28
1.16	Summary	28
	References	29
2	Architecture	31
2.1	Interface	31
2.1.1	Types of Interfaces	32
2.1.2	Communication Paradigms	35
2.1.3	Protocol Layer	36
2.1.4	Levels for Interoperability	36

- 2.2 Interfacing. 37
 - 2.2.1 Impact on Interfaces 38
- 2.3 Serving Interfaces with Data. 39
 - 2.3.1 General “Capability” of a System 39
 - 2.3.2 Relevance for Interfaces. 41
- 2.4 Dynamic Behavior 42
 - 2.4.1 Message Pairs 42
 - 2.4.2 Timing. 43
 - 2.4.3 Message Identification 43
 - 2.4.4 Routing to Multiple Destinations. 45
 - 2.4.5 Responsibility of a System 46
 - 2.4.6 Event Handling 47
 - 2.4.7 Delayed Message Handling (Sender) 48
 - 2.4.8 Handling of Outdated Data (Receiver). 49
- 2.5 Intermediate Message Handling 50
- 2.6 Message Population 51
- 2.7 Information Transmission 52
- 2.8 Delete Indication. 53
 - 2.8.1 Legal Requirements for Data Persistence. 56
 - 2.8.2 Receiver Responsibility 56
 - 2.8.3 Data Granularity 57
 - 2.8.4 Impact of Order of Messages. 57
 - 2.8.5 Sender Responsibility: Impact to System Design. 58
- 2.9 Null Flavors 59
- 2.10 Snapshot Mode Versus Update Mode. 61
- 2.11 Considerations in Application Development 64
 - 2.11.1 Introducing Functional Requirements. 64
 - 2.11.2 Conformance Discussion 69
- 2.12 Summary 72
- References. 73
- 3 Healthcare Standards Landscape 75**
 - 3.1 Introduction 75
 - 3.2 Standards Developing Organizations. 76
 - 3.2.1 UNECE. 76
 - 3.2.2 ASC (US) 77
 - 3.2.3 ASTM (US). 78
 - 3.2.4 HL7 78
 - 3.2.5 DICOM. 79
 - 3.2.6 KBV, ZI and QMS (Germany) 80
 - 3.2.7 KV-Telematik (Germany) 80
 - 3.2.8 NCPDP (USA) 81
 - 3.2.9 OASIS. 82

3.3	Profile Development Organizations	83
3.3.1	IHE	83
3.3.2	ELGA (Austria)	86
3.3.3	eHealth Suisse (Switzerland)	87
3.3.4	HITSP (US)	88
3.3.5	S&I Framework (US)	89
3.3.6	Standards Collaborative (Canada)	90
3.3.7	Interop’ Santé (France)	91
3.3.8	ASIP Santé (France)	92
3.3.9	Phast (France)	92
3.3.10	eSanté (Luxembourg)	93
3.3.11	Interoperability Forum (Germany)	93
3.3.12	NHS (UK)	95
3.3.13	SMART Health IT on FHIR® (US)	96
3.4	Overview of Widely Used Standards	97
3.4.1	HL7	97
3.4.2	Other Standards	100
3.5	Summary	101
	References	101
4	Healthcare Data Exchange Standards	105
4.1	Introduction	106
4.2	HL7 Version 2.X	106
4.2.1	Versions	107
4.2.2	Information Model	109
4.2.3	Message Structure	109
4.2.4	Optionality	111
4.2.5	Encoding	112
4.2.6	Delimiters	114
4.2.7	Delete Requests	114
4.2.8	Null-Flavors	115
4.2.9	Data Types	115
4.2.10	Events	117
4.2.11	Dynamic Behavior	119
4.2.12	Transmission Protocols	121
4.2.13	Tables and Table Values	121
4.2.14	Conformance Methodology	123
4.3	FHIR (HL7)	123
4.3.1	Introduction and Overview	123
4.3.2	Element Hierarchy	126
4.3.3	References	128
4.3.4	Bundling	129
4.3.5	Retrieval and Queries	129
4.3.6	Extensibility	130
4.3.7	Use of Vocabulary	130

- 4.3.8 Data Types 131
- 4.3.9 Representation/Encoding 133
- 4.3.10 Maturity Model 133
- 4.3.11 Versions. 134
- 4.3.12 Profiling by “Slicing” 135
- 4.3.13 Conformance 135
- 4.3.14 Conformance Methodology 139
- 4.4 UN/EDIFACT 140
 - 4.4.1 Introduction and Overview 140
 - 4.4.2 Message Structure 140
 - 4.4.3 Delimiter 141
 - 4.4.4 Data Types Format Notation 143
 - 4.4.5 Tables 144
 - 4.4.6 Conformance Methodology 145
- 4.5 ebXML 145
 - 4.5.1 ebRIM 145
 - 4.5.2 Data Types 146
 - 4.5.3 Classes and Attributes 147
 - 4.5.4 Methods. 147
 - 4.5.5 Conformance Methodology 148
- 4.6 CTS2 (HL7) 148
 - 4.6.1 Information Model. 149
 - 4.6.2 Conformance Methodology 150
- 4.7 ClaML (ISO) 150
 - 4.7.1 Information Model. 150
 - 4.7.2 Conformance Methodology 151
- 4.8 Technical Compatibility Matrix 152
- 4.9 Summary 152
- References. 155

Part II Conformance (and Tools)

- 5 Conformance Constructs. 159**
 - 5.1 Overview 159
 - 5.1.1 Conformance Constructs Overview 160
 - 5.1.2 Related Conformance Concepts 163
 - 5.1.3 Example Specifications 164
 - 5.1.4 Summary 165
 - 5.2 Data Structures and Data Types 166
 - 5.2.1 Binding to Elements 166
 - 5.2.2 Atomic Versus Complex Information 167
 - 5.2.3 Representation/Formats 168
 - 5.2.4 Precision in Representation 169

- 5.2.5 Precision in Meaning 170
- 5.2.6 Collections of Data Types 170
- 5.2.7 Promotion/Demotion (in HL7 V3). 171
- 5.3 Usage (Optionality). 172
 - 5.3.1 Example Application Discussion 173
 - 5.3.2 Support for an Element 175
 - 5.3.3 Implementation Support Versus Presence
in Instances 176
 - 5.3.4 Conditional Usage 177
 - 5.3.5 Case Study: HL7 v2.x Conditional Usage 178
 - 5.3.6 “Required” Versus “Mandatory” 179
 - 5.3.7 Binding of Elements 181
 - 5.3.8 Interface Design Choices 181
 - 5.3.9 Sender and Receiver Perspectives 182
- 5.4 Cardinality 182
 - 5.4.1 Limitations. 183
 - 5.4.2 Delimiters 184
 - 5.4.3 Alternate Terms for Cardinality 184
 - 5.4.4 Notation for Cardinality. 184
 - 5.4.5 Use of Cardinality 184
 - 5.4.6 Relationship of Optionality and Cardinality. 185
- 5.5 Length 186
 - 5.5.1 Sender/Receiver Role. 187
 - 5.5.2 Truncation 187
 - 5.5.3 Padding 188
 - 5.5.4 Conformance Length 189
- 5.6 Content 189
 - 5.6.1 Vocabulary 190
 - 5.6.2 Null Flavors (Values) 201
 - 5.6.3 Fixed Value (Constant) 202
 - 5.6.4 Default Values. 203
 - 5.6.5 Placeholder Values 204
- 5.7 Conformance Statements. 204
- 5.8 Data Semantics 205
 - 5.8.1 Models. 205
- 5.9 Encoding. 205
 - 5.9.1 Display-Oriented Encoding Concepts. 206
 - 5.9.2 Presence/Absence of an Element 213
 - 5.9.3 Parsing. 216
- 5.10 Summary 220
- References. 220
- 6 Principles of Specifying Conformance 223**
 - 6.1 Introduction 223
 - 6.2 Overloaded Terms. 225

- 6.2.1 Declaring Requirements and Conformance 225
- 6.2.2 Requirement Documents 226
- 6.3 Conformance Keywords 226
 - 6.3.1 Impact of Keywords on Requirements. 228
 - 6.3.2 Nested Requirements 229
 - 6.3.3 Normative and Informative Statements 230
- 6.4 Conformance Clause. 230
 - 6.4.1 Conformance Claim. 231
- 6.5 Specifying Conformance Requirements. 232
 - 6.5.1 Implicit Definitions with Conformance
Constructs 232
 - 6.5.2 Explicit Definition with Normative Statements 236
 - 6.5.3 Principles for Writing Conformance
Requirements. 236
- 6.6 Scope of Conformance Specifications 239
- 6.7 Summary 241
- References. 241
- 7 Principles of Effective Profiling 243**
 - 7.1 Introduction 243
 - 7.2 Profiling: Definition of Terms. 244
 - 7.2.1 Profile Components 249
 - 7.2.2 Annotations 249
 - 7.3 Refinement of a Standard 250
 - 7.3.1 Profiling Methodology Summary. 251
 - 7.3.2 Constraints. 251
 - 7.3.3 Allowable Constraints 257
 - 7.3.4 Extensions 257
 - 7.3.5 Conformance Approaches: Constraints Versus
Extensions 258
 - 7.4 Profile Hierarchy. 258
 - 7.4.1 Profile Hierarchy in Use 260
 - 7.4.2 Profile Hierarchies for Standard Specifications 261
 - 7.4.3 Non-compliant Profiles 263
 - 7.5 Profiling Case Study: HL7 v2. 264
 - 7.5.1 HL7 v2.x Profiles: Background and Motivation. 264
 - 7.5.2 HL7 v2 Conformance Profile Defined 266
 - 7.5.3 Message Profile Components Defined 267
 - 7.6 Vocabulary Profiling. 269
 - 7.6.1 Vocabulary Binding and Profiling 270
 - 7.6.2 Use of Extensibility and Stability 273
 - 7.6.3 Profiling at the Code Level 275
 - 7.6.4 Summary 283

- 7.7 Vocabulary Management 283
 - 7.7.1 Managing Code Systems 284
 - 7.7.2 Value Set Definition and Expansion 285
 - 7.7.3 Managing Dynamic Value Sets 286
- 7.8 Uses of Conformance Profiles. 288
- 7.9 Profile Design and Management. 289
 - 7.9.1 Profile Identification Management 292
 - 7.9.2 Publishing the Specification. 292
- 7.10 Pairing Sender and Receiver Profiles for Use 293
 - 7.10.1 One-to-One Profile Pairing 294
 - 7.10.2 One-to-Many Profile Pairing 294
 - 7.10.3 Many-to-One Profile Pairing 296
 - 7.10.4 Design Considerations: Profiling Pairing 299
- 7.11 Case Studies 299
 - 7.11.1 Localization Using Profile Components 299
 - 7.11.2 IHE Integration Profile. 301
 - 7.11.3 Laboratory Orders, Results, and Public Health 301
 - 7.11.4 HL7 v2.x Message Profiles (in Germany) 304
- 7.12 Documenting Interfaces 306
 - 7.12.1 Profile and Implementation Relationships 307
 - 7.12.2 Documentation Quality 310
- 7.13 Summary 310
- References. 312
- 8 Profile Relationships 315**
 - 8.1 Introduction 315
 - 8.2 Specialization of Profiles. 319
 - 8.2.1 Usage (Optionality) Compliance Rules 320
 - 8.2.2 Cardinality Compliance Rules 324
 - 8.2.3 Length Compliance Rules 325
 - 8.2.4 Vocabulary Compliance Rules. 327
 - 8.3 Versioning of Profiles. 328
 - 8.3.1 Example. 330
 - 8.4 Creating New Profiles. 332
 - 8.5 Compatibility of (Sender and Receiver) Profiles 332
 - 8.5.1 Usage. 333
 - 8.5.2 Cardinality. 335
 - 8.5.3 Length 335
 - 8.5.4 Vocabulary 336
 - 8.6 Summary 337
 - References. 338
- 9 Conformance Profiling Tools 339**
 - 9.1 Introduction 339
 - 9.2 Messaging Workbench 340

- 9.3 IGAMT. 343
- 9.4 MDHT 345
- 9.5 ART-DECOR 346
- 9.6 Lantana Template Repository: Trifolia 352
- 9.7 Forge 358
- 9.8 Summary 360
- References. 360

Part III Testing (and Tools)

- 10 Testing Models 365**
 - 10.1 Introduction 365
 - 10.2 Testing Objectives 366
 - 10.3 Definition of Terms 367
 - 10.4 Test Organization Hierarchy 368
 - 10.5 Test Evaluation Types 372
 - 10.6 Testing Models 374
 - 10.6.1 Data Instance Testing Model 375
 - 10.6.2 Isolated System Testing Model 376
 - 10.6.3 Peer-to-Peer System Testing Model 378
 - 10.7 Additional Testing Considerations 379
 - 10.8 Summary 380
 - References. 381
- 11 Principles of Conformance Testing 383**
 - 11.1 Overview 383
 - 11.2 Conformance and Interoperability Testing 384
 - 11.2.1 Conformance Testing. 384
 - 11.2.2 Interoperability Testing 384
 - 11.2.3 Conformance and Interoperability Testing Relationship. 385
 - 11.2.4 Periodic Testing 387
 - 11.2.5 Conformance Testing in Operational Environments. 387
 - 11.3 Standards Development Life-Cycle. 388
 - 11.4 Test Methodology Framework 390
 - 11.4.1 System-Under-Test (SUT) 392
 - 11.4.2 Anatomy of a Test Suite 392
 - 11.4.3 Anatomy of a Test Plan. 392
 - 11.4.4 Anatomy of a Test Case 393
 - 11.4.5 Anatomy of a Test Step. 393
 - 11.4.6 Test Data 394
 - 11.4.7 Test Script. 394
 - 11.4.8 Inspection Documents 395
 - 11.4.9 Test Artifact. 395

- 11.4.10 Test Assertion 396
- 11.4.11 Test Tool 396
- 11.4.12 Configuration Information 396
- 11.4.13 Test Report 397
- 11.5 Testing in Practice 397
 - 11.5.1 Testing Sending Applications 397
 - 11.5.2 Case Study: Laboratory Results 401
 - 11.5.3 Testing Receiving Applications 407
 - 11.5.4 Case Study: Incorporation of Laboratory Results 413
- 11.6 Context-Based Test Data Categorizations 418
 - 11.6.1 Data Content Conformity Assessment Examples 424
 - 11.6.2 Testing Cardinality and Other Conformance
Constructs 426
- 11.7 Strategies and Best Practices for Test Case Development 426
- 11.8 Capability, Site, and Interoperability Testing 430
- 11.9 Negative Testing 432
 - 11.9.1 Message and Document Incorporation 433
 - 11.9.2 Boundary Testing 435
 - 11.9.3 False Positive and False Negative Test Results 435
- 11.10 Other Types of Testing 436
 - 11.10.1 Smoke Testing 437
 - 11.10.2 Communication Testing 437
 - 11.10.3 Application Functional Testing 438
 - 11.10.4 Data Quality Testing 439
 - 11.10.5 Usability Testing 440
 - 11.10.6 Load Testing 441
- 11.11 Summary 441
- References 443
- 12 Conformity Assessment 445**
 - 12.1 Overview 445
 - 12.2 Processing Aspects (for Receiving Applications) 448
 - 12.3 Usage/Optionality 448
 - 12.3.1 Sender Usage Conformity Assessments 449
 - 12.3.2 Receiver Usage Conformity Assessment 451
 - 12.4 Cardinality 457
 - 12.4.1 Sender Cardinality Conformity Assessment 458
 - 12.4.2 Receiver Cardinality Conformance Assessment 464
 - 12.5 Vocabulary Conformance and Assessment 475
 - 12.5.1 Vocabulary Conformance 475
 - 12.5.2 Vocabulary Conformity Assessment 477
 - 12.6 Summary 480
 - References 480

- 13 Testing Architectures 481**
 - 13.1 Introduction 481
 - 13.2 Testing Infrastructure 482
 - 13.2.1 Key Objectives of a Testing Infrastructure. 485
 - 13.2.2 Resource Repository 485
 - 13.2.3 Test Harness 486
 - 13.2.4 Services 487
 - 13.2.5 Infrastructure Components 496
 - 13.2.6 Testing Infrastructure—A Broader Context 496
 - 13.2.7 Testing Infrastructure Observations 499
 - 13.3 A Test Scenario 499
 - 13.4 Testing Frameworks 503
 - 13.4.1 Data Instance Test Framework. 503
 - 13.4.2 Isolated System Test Framework. 505
 - 13.4.3 Peer-to-Peer Testing Framework 506
 - 13.5 Instantiation of Test Tools 508
 - 13.5.1 Data Instance Testing Test Tool 508
 - 13.5.2 Isolated System Testing Test Tool. 509
 - 13.5.3 Interoperability Test Bed 513
 - 13.6 Summary 523
 - References. 523

- 14 Testing Tools 525**
 - 14.1 Introduction 525
 - 14.2 NIST HL7 v2.x Test Tools 526
 - 14.2.1 NIST Immunization Test Suite 527
 - 14.2.2 Testing Functional Requirements with the Tool. 534
 - 14.2.3 NIST HL7 v2.x Testing Web Services API. 536
 - 14.3 Message Workbench (MWB) 536
 - 14.3.1 Message Instance Validation 536
 - 14.3.2 Message Validation via a Proxy-Server 537
 - 14.3.3 MWB Validation Server 537
 - 14.4 CDC Message Quality Framework 539
 - 14.5 AHML-Australian Healthcare Messaging Laboratory 540
 - 14.5.1 Message Testing Process 541
 - 14.5.2 Reporting. 543
 - 14.6 CDA Test Tools 543
 - 14.6.1 ART-DECOR 543
 - 14.6.2 Lantana Trifolia 544
 - 14.6.3 NIST CDA Testing 545
 - 14.6.4 eHealth Suisse 547
