<b>Part I Substantivalism and Relationism Versus Newton and Leibniz</b>	
<b>1 A (Contrarian’s) Reappraisal of the History and Current State of the Ontology Debate in the Philosophy of Space</b>	<b>3</b>
1.1 The Standard Dichotomy: Substantivalism and Relationism	3
1.1.1 Substantivalism, Theoretical Entities, and the Spacetime Approach	4
1.1.2 Relationism	7
1.2 The Third-Way in Spatial Ontology	9
1.2.1 Space as Property	10
1.2.2 Spacetime Structuralism and the Definitional Approach	13
1.3 The Complex Geneses of the Standard Dichotomy	14
1.3.1 The Relativity of Perceived Motion	14
1.3.2 Cartesian Spacetime Revisited	17
1.3.3 Huygens’ Crucial Role in the Evolution of the Standard Dichotomy	23
<b>2 Newton’s Neoplatonic Ontology of Space: Substantivalism or Third-Way?</b>	<b>29</b>
2.1 Two Third-Way Conceptions of Newton’s Absolute Space	30
2.2 The Case for a Strong Third-Way Interpretation	33
2.2.1 Space as a Necessary Consequence or Result	34
2.2.2 Efficient Causation and Cambridge Neoplatonism	37
2.3 Neoplatonism and the Determined Quantities of Extension Hypothesis	41
2.3.1 Newton Against Ontological Dualisms	41
2.3.2 The Ontological Foundation of Newton’s Spatial Ontology	44

2.4	Space as an Affection of Being .....	47
2.4.1	Extension and Accidents .....	48
2.4.2	Nullibism and Holenmerism .....	50
2.4.3	Ens Quatenus Ens.....	52
2.5	Newton’s Spatial Theory and Substance/Property Ontologies .....	54
2.6	Conclusion.....	58
<b>3</b>	<b>Leibniz’ Ontology of Space: Whither Relationism?</b> .....	61
3.1	Relationism and Leibnizian Space .....	62
3.1.1	Relationism Versus Universal Place.....	62
3.1.2	Universal Place and the Property Theory.....	65
3.2	The Ontological Foundations of Leibnizian Space.....	68
3.2.1	The Immensum and Its Immense Importance.....	68
3.2.2	Substance, Accident, and Relations in Leibniz’ Metaphysics.....	72
3.2.3	Leibniz’ Physical-Geometric Holism.....	77
3.3	Final Assessment.....	79
3.3.1	Space, Property and Nominalism .....	79
3.3.2	Reconsidering the Leibniz Shift Scenarios .....	82
3.3.3	A Monadic Conclusion .....	83
<b>4</b>	<b>Motion, Matter, Monads, and Their “Forced” Relationship</b> .....	87
4.1	The Interpretive Challenge of Leibnizian Motion.....	88
4.1.1	Overview of Leibnizian Motion and the Equivalence of Hypotheses.....	89
4.1.2	Leibnizian Motion: An Alternative Account Contra Absolute Speed.....	92
4.1.3	Realism, Invariantism, and Leibnizian Motion.....	96
4.1.4	An Outline of a Leibnizian Invariantist Ontology.....	100
4.2	The Mystery of Monadic Situation .....	104
4.2.1	Monads and Spatiality .....	105
4.2.2	Monads and the Extension of Power.....	108
4.2.3	Monadic Activity and Derivative Force .....	115
4.3	Final Synthesis .....	117
 <b>Part II Third-Way Spatial Ontologies: Past and Present</b>		
<b>5</b>	<b>From Property to Structure: Exploring Contemporary Third-Way Conceptions of the Ontology of Space.....</b>	121
5.1	The Property Theory of Space .....	121
5.1.1	An Historical Precedent: Philoponus .....	122
5.1.2	Contemporary Versions of the Property Theory.....	125
5.1.3	Critiquing the Property Theory .....	130
5.1.4	Concluding Assessment .....	135

5.2	The Structuralist Aftermath of the Ontology Debate in General Relativity .....	136
5.2.1	The Hole Argument and Recent Substantialist and Relationist Ontologies .....	137
5.2.2	The Structural Realist Alternative .....	142
5.3	Conclusion.....	147
<b>6</b>	<b>Newton’s Immobility Arguments and the Holism of Spatial Ontology .....</b>	<b>149</b>
6.1	Newton’s Immobility Arguments .....	150
6.2	The Historical Background to Newton’s Immobility Arguments .....	151
6.2.1	Oneness, Indiscernibility and Simplicity .....	152
6.2.2	Simplicity and Spatial Holism .....	155
6.2.3	The Order of Position of Spatial Parts .....	158
6.2.4	The Least Distance Hypothesis .....	162
6.3	Contemporary Spacetime Ontology and the Immobility Arguments .....	164
6.3.1	Spatial Transformations and Leibniz Shifts .....	164
6.3.2	Conclusion: Modern Spacetime Ontologies and Newton’s Immobility Arguments .....	169
<b>7</b>	<b>The ‘Space’ at the Intersection of Physics, Metaphysics, and Mathematics .....</b>	<b>175</b>
7.1	Platonism, Nominalism, and Structuralism in Spacetime Theories and Mathematics .....	176
7.1.1	The Spatial Context of Platonism and Nominalism.....	177
7.1.2	Fictionalist Nominalism Versus Truth-Based Nominalism .....	181
7.2	Causation, Explanation, and Instrumentalist Rip-Offs.....	184
7.2.1	Spacetime Structure and Non-inertial Forces .....	184
7.2.2	Instrumentalism and Mathematical Structure .....	188
7.3	Platonism/Nominalism in Newton and Leibniz’ Spatial Ontologies .....	191
7.3.1	Newton .....	192
7.3.2	Leibniz.....	194
7.4	Platonism/Nominalism and Contemporary Spacetime Philosophies.....	197
7.4.1	Nominalist Substantialism.....	198
7.4.2	Nominalist Counter-Arguments .....	201
7.4.3	Scientific Realism and Platonism/Nominalism.....	205
7.5	Conclusion.....	206

<b>8</b>	<b>The Multiple Paths Towards an Epistemic Structural Realist Spatial Ontology</b> .....	209
8.1	Structural Realism, Underdetermination, and Spacetime Theories .....	211
8.1.1	OSR and ESR-L .....	211
8.1.2	Entity Underdetermination.....	213
8.1.3	Formalism Underdetermination .....	217
8.2	ESR, OSR, and Platonism/Nominalism .....	220
8.3	First Reflections on Non-spacetime Hypotheses.....	223
8.3.1	Quantum Mechanics, Quantum Gravity, and Spacetime .....	224
8.3.2	Non-spacetime Theories and Inference to the Best Explanation .....	226
8.3.3	Structural Realism and Beables .....	228
8.4	Non-realist Structuralisms and ESR-L.....	229
8.4.1	Early Structuralism and ESR/OSR.....	229
8.4.2	Freidman’s Relativized a Priori Structuralism .....	231
8.4.3	Convergence, the Relativized a Priori, and Realism .....	232
8.5	Multiple Routes and ESR-L.....	234
8.5.1	Convergence and the Multiple Routes Hypothesis .....	234
8.5.2	Constraints, Compensatory Adjustments, and the Two Requirements of Multiple Routes ESR-L .....	236
8.5.3	OSR and Multiple Routes .....	239
8.6	Conclusion: OSR, ESR, and Historical Analogies.....	241
<b>Part III</b>	<b>The Deep Metaphysics of Space from the Seventeenth Century to Quantum Gravity</b>	
<b>9</b>	<b>A New Taxonomy Beyond Substantivalism and Relationism I: Early Modern Spatial Ontologies</b> .....	245
9.1	Introduction: Quantum Gravity and The Substantivalist/ Relationist Dichotomy .....	245
9.2	A New Taxonomy for Spatial Ontologies .....	247
9.2.1	Equivalent Geometric Structure and Ontological Levels.....	247
9.2.2	Platonism/Nominalism and Ontological Levels.....	251
9.3	Applying the New Taxonomy: The Early Modern Period .....	252
9.3.1	Newton and the (Later) More on Spatial Ontology.....	253
9.3.2	Gassendi and (Early) More on Spatial Ontology .....	254
9.3.3	Patrizi and the Origins of Seventeenth Century Virtual-Platonism .....	256
9.3.4	Leibniz on Spatial Ontology .....	258
9.3.5	The Pre-critical Kant on Spatial Ontology.....	260
9.3.6	Barrow and Descartes on Spatial Ontology .....	264

9.4	Reflections on Seventeenth Century and Contemporary Spatial Ontologies .....	266
9.5	Platonism/Nominalism, Geometric Background, and Leibniz Shifts .....	268
9.5.1	Background Dependence/Independence .....	268
9.5.2	The Shift Scenarios and Platonism/Nominalism.....	269
9.5.3	Maudlin’s Ontological Classification.....	272
<b>10</b>	<b>A New Taxonomy Beyond Substantivalism and Relationism II: Some Philosophical Prehistory of Quantum Gravity .....</b>	<b>275</b>
10.1	Introduction: Geometric Levels and Quantum Gravity.....	275
10.2	Applying The New Taxonomy: Quantum Gravity Hypotheses and Their Seventeenth Century Analogues .....	277
10.2.1	QG Metric Structure and Newton .....	277
10.2.2	QG Topological Structure and Gassendi.....	279
10.2.3	QG Pregeometric Structure and Leibniz.....	280
10.3	Quantum Gravity and Nominalism .....	285
10.3.1	Background Independence, Nominalism, and the Void.....	285
10.3.2	Pre-established Harmony and QG.....	290
10.4	Alternative Interpretations: Ubeity and Local Beables .....	291
10.5	Overview and Conclusion .....	294
10.5.1	Assessing the New Taxonomy .....	294
10.5.2	The Sophisticated Relationist Counter-Offensive.....	298
10.5.3	Synopsis of General Themes.....	301
<b>11</b>	<b>Epilogue: The Post-Seventeenth Century Evolution of the Standard Dichotomy .....</b>	<b>303</b>
11.1	Spatial Ontology in the Eighteenth Century .....	303
11.1.1	Who Banished God from Space?.....	304
11.1.2	The Rise of the Empiricist Approach to Space: Berkeley as Exemplar.....	306
11.1.3	The Fate of Third-Way Spatial Ontologies After Newton and Leibniz.....	310
11.2	The Kantian Synthesis of Relationism and Newtonian Physics .....	312
11.2.1	The Center-of-Mass Frame as Absolute Space .....	313
11.2.2	Kant’s Relationist “Applied Metaphysics” of Motion and Its Aftermath.....	317
11.2.3	Conclusion: A Note on Kant as Precursor of Mach.....	323
	<b>References.....</b>	<b>325</b>
