Contents

Technical Track

Exploiting Short Supports for Improved Encoding of Arbitrary Constraints into SAT ......................................................... 3
Özgür Akgün, Ian P. Gent, Christopher Jefferson, Ian Miguel, and Peter Nightingale

Systematic Derivation of Bounds and Glue Constraints for Time-Series Constraints ........................................... 13
Ekaterina Arafailova, Nicolas Beldiceanu, Mats Carlsson, Pierre Flener, María Andreína Francisco Rodríguez, Justin Pearson, and Helmut Simonis

An Adaptive Parallel SAT Solver ................................................................. 30
Gilles Audemard, Jean-Marie Lagniez, Nicolas Szczepanski, and Sébastien Tabary

Improved Linearization of Constraint Programming Models ......................................................... 49
Gleb Belov, Peter J. Stuckey, Guido Tack, and Mark Wallace

Impact of SAT-Based Preprocessing on Core-Guided MaxSAT Solving ..................................................... 66
Jeremias Berg and Matti Järvisalo

Multiobjective Optimization by Decision Diagrams ......................................................... 86
David Bergman and Andre A. Cire

Dependency Schemes in QBF Calculi: Semantics and Soundness ......................................................... 96
Olaf Beyersdorff and Joshua Blinkhorn

The Multirate Resource Constraint ................................................................. 113
Alessio Bonfietti, Alessandro Zanarini, Michele Lombardi, and Michela Milano

The Dichotomy for Conservative Constraint Satisfaction is Polynomially Decidable ......................................................... 130
Clément Carbonnel

Propagation via Kernelization: The Vertex Cover Constraint ......................................................... 147
Clément Carbonnel and Emmanuel Hebrard

Breaking Symmetries in Graphs: The Nauty Way ......................................................... 157
Michael Codish, Graeme Gange, Avraham Itzhakov, and Peter J. Stuckey
Extending Broken Triangles and Enhanced Value-Merging. 173
  Martin C. Cooper, Achref El Mouelhi, and Cyril Terrioux

A Bounded Path Propagator on Directed Graphs 189
  Diego de Uña, Graeme Gange, Peter Schachte, and Peter J. Stuckey

Compact-Table: Efficiently Filtering Table Constraints with Reversible
Sparse Bit-Sets 207
  Jordan Demeulenaere, Renaud Hartert, Christophe Lecoutre,
  Guillaume Perez, Laurent Perron, Jean-Charles Régis,
  and Pierre Schaus

Interval Constraints with Learning: Application to Air Traffic Control 224
  Thibaut Feydy and Peter J. Stuckey

Backdoors to Tractable Valued CSP 233
  Robert Ganian, M.S. Ramanujan, and Stefan Szeider

Monte-Carlo Tree Search for the Maximum Satisfiability Problem 251
  Jack Goffinet and Raghuram Ramanujan

A New Approach to Checking the Dynamic Consistency of Conditional
Simple Temporal Networks 268
  Luke Hunsberger and Roberto Posenato

On Finding Minimum Satisfying Assignments 287
  Alexey Ignatiev, Alessandro Previti, and Joao Marques-Silva

Towards a Dynamic Decomposition of CSPs with Separators
of Bounded Size 298
  Philippe Jégou, Hanan Kanso, and Cyril Terrioux

Constraint Programming for Strictly Convex Integer
Quadratically-Constrained Problems 316
  Wen-Yang Ku and J. Christopher Beck

A Global Constraint for Closed Frequent Pattern Mining 333
  Nadjib Lazaar, Yahia Lebbah, Samir Loudni, Mehdi Maamar,
  Valentin Lemière, Christian Bessiere, and Patrice Boizumault

Clique and Constraint Models for Maximum Common (Connected)
Subgraph Problems 350
  Ciaran McCreesh, Samba Ndojh Ndiaye, Patrick Prosser,
  and Christine Solnon

Tightening McCormick Relaxations for Nonlinear Programs via Dynamic
Multivariate Partitioning 369
  Harsha Nagarajan, Mowen Lu, Emre Yamangil, and Russell Bent
Parallel Strategies Selection ............................................. 388
  Anthony Palmieri, Jean-Charles Régis, and Pierre Schaus

Learning Parameters for the Sequence Constraint from Solutions ........... 405
  Émilie Picard-Cantin, Mathieu Bouchard, Claude-Guy Quimper,
  and Jason Sweeney

The PPSZ Algorithm for Constraint Satisfaction Problems on More
  Than Two Colors .......................................................... 421
  Timon Hertli, Isabelle Hurbin, Sebastian Millius, Robin A. Moser,
  Dominik Scheder, and May Szedlák

Explaining Producer/Consumer Constraints. .................................. 438
  Andreas Schutt and Peter J. Stuckey

Learning from Learning Solvers ............................................. 455
  Maxim Shishmarev, Christopher Mears, Guido Tack,
  and Maria García de la Banda

On Incremental Core-Guided MaxSAT Solving. .................................. 473
  Xujie Si, Xin Zhang, Vasco Manquinho, Mikoláš Janota, Alexey Ignatiev,
  and Mayur Naik

Modelling and Solving Multi-mode Resource-Constrained
  Project Scheduling .......................................................... 483
  Ria Szeredi and Andreas Schutt

A Nearly Exact Propagation Algorithm for Energetic Reasoning
  in $O(n^2 \log n)$ .......................................................... 493
  Alexander Tesch

Efficient Filtering for the Unary Resource with Family-Based
  Transition Times .......................................................... 520
  Sascha Van Cauwelaert, Cyrille Dejenepe, Jean-Noël Monette,
  and Pierre Schaus

Application Track

A Constraint Programming Approach to Multi-Robot Task Allocation
  and Scheduling in Retirement Homes .................................... 539
  Kyle E.C. Booth, Goldie Nejat, and J. Christopher Beck

Optimal Performance Tuning in Real-Time Systems Using Multi-objective
  Constrained Optimization ................................................. 556
  Stefano Di Alesio

SABIO: An Implementation of MIP and CP for Interactive Soccer Queries... 575
  Robinson Duque, Juan Francisco Díaz, and Alejandro Arbelaez
Constraint Programming Models for Chosen Key Differential Cryptanalysis .......................... 584
   David Gerault, Marine Minier, and Christine Solnon

Solving a Supply-Delivery Scheduling Problem with Constraint Programming ......................... 602
   Katherine Giles and Willem-Jan van Hoeve

Four-Bar Linkage Synthesis Using Non-convex Optimization ............................................ 618
   Vincent Goulet, Wei Li, Hyunmin Cheong, Francesco Iorio, and Claude-Guy Quimper

Using Constraint Programming for the Urban Transit Crew Rescheduling Problem .................... 636
   Xavier Lorca, Charles Prud’homme, Aurélien Questel, and Benoît Rotttembourg

Optimizing Shortwave Radio Broadcast Resource Allocation via Pseudo-Boolean Constraint Solving and Local Search ................................. 650
   Feifei Ma, Xin Gao, Minghao Yin, Linjie Pan, Jiwei Jin, Hai Liu, and Jian Zhang

Availability Optimization in Cloud-Based In-Memory Data Grids ........................................ 666
   Samir Sebbah, Claire Bagley, Mike Colena, and Serdar Kadioglu

Computational Sustainability Track

Online HVAC-Aware Occupancy Scheduling with Adaptive Temperature Control ............................. 683
   BoonPing Lim, Hassan Hijazi, Sylvie Thiébaux, and Menkes van den Briel

Behavior Identification in Two-Stage Games for Incentivizing Citizen Science Exploration ............ 701
   Yexiang Xue, Ian Davies, Daniel Fink, Christopher Wood, and Carla P. Gomes

CP and Biology Track

Constraining Redundancy to Improve Protein Docking ....................................................... 721
   Ludwig Krippahl and Pedro Barahona

Guaranteed Weighted Counting for Affinity Computation: Beyond Determinism and Structure .......... 733
   Clément Viricel, David Simoncini, Sophie Barbe, and Thomas Schiex
Music Track

Finding Alternative Musical Scales ......................................................... 753
J.N. Hooker

Assisted Lead Sheet Composition Using FlowComposer .......................... 769
Alexandre Papadopoulos, Pierre Roy, and François Pachet

Enforcing Structure on Temporal Sequences: The Allen Constraint .......... 786
Pierre Roy, Guillaume Perez, Jean-Charles Régis,
Alexandre Papadopoulos, François Pachet, and Marco Marchini

Constraint Programming Approach to the Problem of Generating Milton
Babbitt’s All-Partition Arrays ................................................................. 802
Tsubasa Tanaka, Brian Bemman, and David Meredith

Preference, Social Choice and Optimization Track

A Dynamic Programming-Based MCMC Framework for Solving DCOPs
with GPUs ................................................................................................. 813
Ferdinando Fioretto, William Yeoh, and Enrico Pontelli

Morphing Between Stable Matching Problems ........................................ 832
Ciaran McCreesh, Patrick Prosser, and James Trimble

Testing and Verification Track

Using Graph-Based CSP to Solve the Address Translation Problem .......... 843
Merav Aharoni, Yael Ben-Haim, Shai Doron, Anatoly Koyfman,
Elena Tsanko, and Michael Veksler

Finding Unsatisfiable Cores of a Set of Polynomials Using the Gröbner
Basis Algorithm ....................................................................................... 859
Xiaojun Sun, Irina Ilioaea, Priyank Kalla, and Florian Enescu

The Power of Propagation: When GAC Is Enough .................................. 877
David A. Cohen and Peter G. Jeavons

Constraint Programming for Planning Test Campaigns
of Telecommunication Satellites .............................................................. 879
Emmanuel Hebrard, Marie-José Huguet, Daniel Veysseire,
Ludivine Boche Sauvan, and Bertrand Cabon

Graphical Models for Optimal Power Flow .......................................... 880
Krishnamurthy Dvijotham, Pascal Van Hentenryck, Michael Cherkov,
Sidhant Misra, and Marc Vuffray
“Almost-Stable” Matchings in the Hospitals/Residents Problem with Couples ................................. 882
  David F. Manlove, Iain McBride, and James Trimble

Mixed-Integer and Constraint Programming Techniques for Mobile Robot Task Planning ................................. 883
  Kyle E.C. Booth, Tony T. Tran, Goldie Nejat, and J. Christopher Beck

The Power of Arc Consistency for CSPs Defined by Partially-Ordered Forbidden Patterns .................................. 884
  Martin C. Cooper and Stanislav Živný

DASH: Dynamic Approach for Switching Heuristics ................................................................. 886
  Giovanni Di Liberto, Serdar Kadioglu, Kevin Leo, and Yuri Malitsky

AHP Based Portfolio Selection with Risk Preference Modeling ......................................................... 887
  Cristinca Fulga

STR3: A Path-Optimal Filtering Algorithm for Table Constraints ..................................................... 888
  Christophe Lecoutre, Chavalit Likitvivatanavong, and Roland H.C. Yap

Boosting Symmetry Breaking During Search in Constraint Programming ................................... 889
  Jimmy H.M. Lee and Zichen Zhu

Enhancing Partial Symmetry Breaking in Constraint Programming ................................................. 891
  Jimmy H.M. Lee and Zichen Zhu

Decomposition of the Factor Encoding for CSPs ................................................................. 893
  Chavalit Likitvivatanavong, Wei Xia, and Roland H.C. Yap

Tightness of LP Relaxations for Almost Balanced Models ......................................................... 894
  Adrian Weller, Mark Rowland, and David Sontag

Author Index ......................................................... 897
Principles and Practice of Constraint Programming
22nd International Conference, CP 2016, Toulouse, France, September 5-9, 2016, Proceedings
Rueher, M. (Ed.)
2016, XXVIII, 899 p. 186 illus., Softcover
ISBN: 978-3-319-44952-4
