## Contents

### Part I  Invited Lectures

**Studies of Shock Wave Reflections and Interactions (Paul Vieille Lecture)**  
B.W. Skews  

3

**Dispelling Misconceptions about Blast Waves (Irvine Israel Glass Lecture)**  
Charles Needham  

11

**A Review of the Richtmyer-Meshkov Instability from an Experimental Perspective**  
R. Bonazza  

23

**Medical and Biomedical Applications of Shock Waves: The State of the Art and the Near Future**  
Achim M. Loske  

29

**Making Shock Waves Pay: The Commercial Aspects of Shock Waves**  
K.P.J. Reddy  

35

**Time-Developing 3D-CT Measurement of Shock Waves and Supersonic Density Flow Field**  
K. Maeno  

39

**Chemical Kinetics and Reacting Flows**  
R.K. Hanson and D.F. Davidson  

47

**Shock-Induced Combustion and Its Applications to Power and Thrust Generation**  
M. Brouillette, M. Picard, D. Rancourt, and J.-S. Plante  

53

**The Shock Fitting Technique from Gino Moretti Towards the Future**  
Marcello Onofri, Francesco Nasuti, Renato Paciorri, and Aldo Bonfiglioli  

59

### Part II  Nozzle Flow

**New Modified Pekkari Model to Analyse the Aeroelastic Stability Behaviour for a Flexible Overexpanded Rocket Nozzle**  
N. Bekka, M. Sellam, and A. Chpoun  

67

**Adaptation of the Transpiration Method to Simulate the Fluid–Structure Interaction Phenomena for a Flexible Overexpanded Rocket Nozzle**  
N. Bekka, M. Sellam, and A. Chpoun  

71

**Transverse Jet Injection into a Supersonic Nozzle Flow**  
V. Emelyanov, K. Volkov, and M. Yakovchuck  

77
Flow Visualization in Out-of-Round Rocket Nozzles ................................. 83
C. Génin, S. Jack, and R. Stark

Effect of the Adiabatic Index on the Shock Reflection in Overexpanded Nozzle Flow ................................. 89
Emanuele Martelli, Barbara Betti, Francesco Nasuti, and Marcello Onofri

Mixing Enhancement in Free Jets from Supersonic ESTS Lobed Nozzles ........................................ 95
Albin Varghese, S.K. Karthick, Srisha M.V. Rao, and Gopalan Jagadeesh

Study of Cluster Linear Plug Nozzle Flow Field in Freestream Flow ................................. 101
M. Viji, Kiran Chutkey, and S.B. Verma

Studies in Free Jets from Supersonic ESTS Lobed Nozzles ................................. 107
Albin Varghese, P. Suriyanarayanan, Srisha M.V. Rao, and Gopalan Jagadeesh

Unsteadiness of Supersonic Flows in Over-Expanded Nozzles ........................................ 113
A. Piquet, A. Georges-Picot, and A. Hadjadj

Design of Optimized Two-Dimensional Scramjet Nozzle Contour for Hypersonic Vehicle Using Evolutionary Algorithms ........................................ 119
A. Govinda, Manoj Kumar K. Devaraj, Yogendra Singh, Nimesh Thakor, Venkat Rao Kulkarni, S.N. Omkar, and Gopalan Jagadeesh

Passive Flow Control in Laval Nozzles Due to Bypass Mass Flow in Narrow Longitudinal Gaps ........................................ 125
M. Giglmaier, M. Krüger-Sprengel, J.F. Quaatz, and N.A. Adams

Part III Hypersonic Flow
Investigation of Chemical Non-equilibrium Hypersonic Flows in Carbon Dioxide–Nitrogen Atmospheres Using a Coupled Euler–Boundary-Layer Method ........................................ 133
M. Starkloff and Ch. Mundt

Radiative Heat flux Measurements for Titan Atmospheric Entry Condition in a Superorbital Expansion Tunnel ........................................ 139
H. Porat, R.G. Morgan, and T.J. McIntyre

Study of Hypersonic Dissociating Flows over Spheres Using the Space-Time CE/SE Method ........................................ 145
H. Saldivar Massimi, H. Shen, and C.Y. Wen

The Direct Measurement of Skin Friction in Shock Tunnel ........................................ 149
Lv Zhiguo, Li Guojun, Zhao Rongjuan, Jiang Hua, Liu Jichun, Huang Jun, and Liu Shiran

Effects of Attack Angle on Starting Performance of a Hypersonic Inlet ........................................ 155
Shuaitao Guo, Wenzhi Gao, Enlai Zhang, Zhufei Li, and Jiming Yang

Optimization of Hypersonic Power Law Derived Waverider Using TLBO ........................................ 161
Yogendra Singh, Manoj Kumar K. Devaraj, S.N. Omkar, and Gopalan Jagadeesh

</table>
Thermomechanical Deformation Behavior of a Hypersonic Waverider Using Finite Element Method ........................................... 251
N.K. Gopinath, V. Vignesh, Yogendra Singh, Manoj Kumar K. Devaraj, and D. Roy Mahapatra

Effect of Mach Number on Shock Oscillations in Supersonic Diffusers ............ 257
S. Manoj Prabakar, Chimakurthy Srikanth, and T.M. Muruganandam

Turbulence Compressibility Effects for Supersonic and Hypersonic Separated Flows ....................................................... 263
S. Seror and L. Kosarev

Imaging of the Conical Kelvin-Helmholtz Instability ................................. 269
R.T. Paton and B.W. Skews

Shock Standoff Distance over Spheres in Unsteady Flows .......................... 275
T. Kikuchi, Kazuyoshi Takayama, Dan Igra, and J. Falcoivitz

Part V Supersonic Jets

The Formation of Mach Waves from Supersonic Jets with Outer Co-flowing .................. 281
H. Oertel sen., F. Seiler, and J. Srulijes

The Limits of Mach Wave Emission from Supersonic Jets .......................... 287
H. Oertel sen., F. Seiler, and J. Srulijes

Overexpanded Jet Flow Theoretical Analysis in the Vicinity of the Nozzle Lip ................................................................. 293
M.V. Silnikov, M.V. Chernyshov, and V.N. Uskov

Design and Validation of an Uncooled Pitot Probe for Hot, Supersonic Flow Investigations ..................................................... 299
Felix J. Förster, Nils C. Dröske, Jens von Wolfersdorf, and Bernhard Weigand

Large Eddy Simulation of a Supersonic Underexpanded Square Jet ................... 305
Huanhao Zhang and Zhihua Chen

Part VI Chemical Kinetics and Chemical Reacting Flows

Species Time-History Measurements During Jet Fuel Pyrolysis .................... 309
D.F. Davidson, A. Tulgestke, Y. Zhu, S. Wang, and R.K. Hanson

Rapid Chemiluminescent Imaging Behind Reflected Shock Waves ................. 313
D.F. Davidson, A. Tulgestke, C. Strand, M.F. Campbell, V.A. Troutman, V.A. Miller, and R.K. Hanson

Shock Tube Experimental and Theoretical Study on the Thermal Decomposition of 2-Phenylethanol ........................................ 317
M. Kiran Singh, K.P.J. Reddy, and E. Arunan

Soot Formation During Pyrolysis and Oxidation of Aliphatic and Aromatic Hydrocarbons in Shock Waves: Experiments and Detailed Kinetic Modeling ............................................................ 321

3-Carene Oxidation Mechanism ........................................................... 327
N. Sharath, K.P.J. Reddy, P.K. Barhai, and E. Arunan

Shock Tube Ignition Delay Studies of Dicyclopentadiene ................................... 333
Kunal V. Dhoke, K.P.J. Reddy, and E. Arunan
Model Order Reduction for Reacting Flows: Laminar Gaussian Flame Applications .................................................. 337
Van Bo Nguyen, H.-S. Dou, K. Willcox, and Boo-Cheong Khoo

Numerical Simulation of the Flow with Chemical Reactions Around a Wedge .................................................. 345
Georgy Shoev and Yevgeny A. Bondar

Computations of a Shock Layer Flow Field with Global and Detailed Chemistry Models ................................................. 351
Marie-Claude Druguet, Arnaud Bultel, Julien Annaloro, and Pierre Omaly

On a Relaxation Zone Structure for Shock Waves Forming in Non-equilibrium Air Flows ............................................. 357
O. Kunova and E. Nagnibeda

Investigation of Non-catalytic Reaction of Shock-Heated Nitrogen Gas with Powder SiO₂ .............................................. 361

Part VII  Detonation, Combustion and Ignition

On the Deflagration-to-Detonation Transition in Narrow Tube with Varying Prechamber-Initiator ............................................ 369
S. Golovastov, G. Bivol, and V. Golub

Experimental Research on Deflagration-to-Detonation Transition (DDT) in an S-Shaped Tube .................................................. 375
Li Lei, Teo Chiang Juay, Li Jiun-Ming, Po-Shiung Chang, and Boo-Cheong Khoo

DDT Triggered by SWBLI: Numerical and Experimental Research ................................................................. 381
E. Dzieminska, A.K. Hayashi, T. Machida, and J. Misawa

Flame Acceleration and DDT in a Torus Geometry ........................................................................................................ 385
M. Kuznetsov, J. Yanez, and J. Grune

Unconfined Hybrid Detonation in Gas–Particle Flow .............................................................................................. 391
F. Zhang, A. Yoshinaka, and R.C. Ripley

Numerical Simulation of Combustion Process for Two-Phase Fuel Flows Related to Pulse Detonation Engines ........................................................................................................ 397
Van Bo Nguyen, Li Jiun-Ming, Teo Chiang Juay, and Boo-Cheong Khoo

Simulation of Laser-Induced Detonation in Particulate Systems with Applications to Pulse Detonation Engines .................................................................................................................. 405
P. Bulat and K. Volkov

Criterion for Detonation Transition in Liquid-Fuel Pulse Detonation Engines .............................................................. 411
J. Li, C.J. Teo, L. Li, P.H. Chang, and Boo-Cheong Khoo

Numerical Simulation of Reactive Gas Mixes Flows in the Detonation Engines .......................................................... 415
S.N. Martyushov
Stabilization of Detonation Combustion of a Supersonic Flow
due to Using the Special Form Plane Channel
V.A. Levin and T.A. Zhuravskaya ........................................... 419

Role of Wall Temperature on Shock Train
in a Rectangular Isolator
Lianjie Yue, Hongbo Lu, Yabin Xiao, Li Hong Chen, and Xinyu Chang 425

The Correlation Between Detonation Cell Size
and Ignition Delay Time
Y.F. Liu, W. Zhang, and Z. Jiang ........................................... 431

An Investigation of the Prompt Oblique Detonation Wave Induced
by a Finite-Length Wedge
Yan Liu and Jianping Wang ........................................... 435

Formation of 3D Detonation in Supersonic Flows by Solid Walls
of Special Shape
V.A. Levin, I.S. Manuylovich, and V.V. Markov ................. 441

Cellular and Spin Detonation in 3D Channels
V.A. Levin, I.S. Manuylovich, and V.V. Markov .................. 447

Galloping Detonation in a Fuel Mixture Jet
V.A. Levin, I.S. Manuylovich, and V.V. Markov .................. 453

Propagation of Out Warding Flame for Combustible Gas
in Cylindrical Confinement
Wenhu Han and Wenjun Kong ........................................ 457

Investigation on PIV and PLIF Laser Diagnostics in Turbulent
Combustion Field
Long Zhang, Furong Yang, Tie Su, Shuang Chen, Jianjun Yang,
and Yungang Wu .................................................. 461

Modeling of Aerobic Combustion
T. Hartmann, E. Rottenkolber, and A. Boimel .................. 467

Investigations of Equivalence Ratio on Operational Liquid-Fuel
Pulse Detonation Engines
J. Li, C.J. Teo, L. Li, K.S. Lim, and Boo-Cheong Khoo ......... 473

Detonation of Mechanoactivated Mixture of Ammonium Perchlorate
with Aluminum
Alexander Dolgoborodov, Vladimir Kirilenko, Michael Brazhnikov,
Arseny Shevchenko, and Victor Teselkin .................. 479

Detonation Transition in Relatively Short Tubes
M. Kuznetsov, A. Lelyakin, V. Alekseev, and I. Matsukov .... 481

Propagation of a Pressure-Dependent Detonation with Different
Acoustic Impedance Confinements
Jianling Li, Xiaocheng Mi, and Andrew J. Higgins .......... 487

Kerosene Ignition and Combustion: An Experimental Study
Alexander Burcat, Erna Olchansky, Ulla Steil,
and Marina Braun-Unkhoff ........................................ 493
On Influence of Carbon Tetrachloride on Combustible Mixtures
Ignition at Various Temperature Ranges ........................................... 501
A. Drakon and A. Eremin

Temperature Measurements in the Combustion Zone Behind
the Reflected Shock Waves .......................................................... 507
A. Drakon, A. Eremin, E. Gurentsov, and E. Mikheyeva

On the Initiation of Combustion by Means of Supersonic
High-Enthalpy Jet ........................................................................ 511
S.S. Katsnelson, G.A. Pozdnyakov, and D.A. Aleksandrovsky

A Test of Ignition Behaviors Induced by a Smoothly Convergent
Cylindrical Shock ......................................................................... 519
Yang Jianting, Yujian Zhu, and Jiming Yang

Part VIII   Propulsion

Nonstationary Interaction of Incoming Flow with Ablative Jet
in Supersonic Laser Propulsion ..................................................... 527
A.A. Schmidt and Yu. A. Rezunkov

Axisymmetric Compressible Flow for the Resistojet
Thruster Module ........................................................................... 531
S.M. Chang

Secondary Injectant Gas Thermodynamic Properties Effects
on Fluidic Thrust Vectoring Performances
of a Supersonic Nozzle ................................................................. 539
A. Chpoun, M. Sellam, V. Zmijanovic, and L. Leger

Part IX   Shock Wave Reflection and Interaction

Three-Dimensional Bow-Shock Interactions Between High-Speed
Slender Bodies at Incidence ............................................................ 547
S.J. Hoosieria and B.W. Skews

Flow Behind Mach Reflection and the Neumann Paradox ................. 553
A. Sakurai

The Mach Reflection of a Converging Cylindrical Shock
Wave Segment Encountering a Straight Wedge ............................. 559
B.J. Gray and B.W. Skews

Reflection of Cylindrical Converging Shock Wave Over Wedge ....... 563
Zhigang Zhai, Fu Zhang, and Xisheng Luo

Numerical Study of the Interaction Process Between a Planar Shock
Wave and a Square Cavity Filled with Different Gases .................... 569
Dan Igra and Ozer Igra

Flow Phenomena of An Expansion Wave Entering a Cylindrical Cavity 575
M.S. Whalley, B.W. Skews, and R.T. Paton

Investigation of an Expansion Fan/Shock Wave Interaction Between
Low Aspect Ratio Wedges .............................................................. 581
L. Nel and B.W. Skews
