# Contents

Evaluating Variability Modeling Techniques for Supporting Cyber-Physical System Product Line Engineering .......................................................... 1  
*Safdar Aqeel Safdar, Tao Yue, Shaukat Ali, and Hong Lu*

Complex Event Processing in ThingML .................................................. 20  
*An Ngoc Lam and Øystein Haugen*

SDL: Meeting the IoT Challenge ......................................................... 36  
*Edel Sherratt*

Applying MDA and OMG Robotic Specification for Developing Robotic Systems .......................................................... 51  
*Claudia Pons, Gabriela Pérez, Roxana Giandini, and Gabriel Baum*

Domain Model Optimized Deployment and Execution of Cloud Applications with TOSCA ......................................................... 68  
*Fabian Glaser*

Representativeness and Descriptiveness of Task Trees Generated from Website Usage Traces ......................................................... 84  
*Patrick Harms*

Optimizing Performance of SDL Systems ........................................... 100  
*Mihal Brumbulli and Emmanuel Gaudin*

Evolving the ETSI Test Description Language ..................................... 116  
*Philip Makedonski, Gusztáv Adamis, Martti Käärik, Finn Kristoffersen, and Xavier Zeitoun*

Object-Oriented Operational Semantics ............................................ 132  
*Andreas Prinz, Birger Møller-Pedersen, and Joachim Fischer*

Model Driven Upgrade Campaign Generation for Highly Available Systems ......................................................... 148  
*Oussama Jebbar, Margarete Sackmann, Ferhat Khendek, and Maria Toeroe*

Model-Driven Approach to the Optimal Configuration of Time-Triggered Flows in a TTLEthernet Network ........................................... 164  
*Sofiene Beji, Abdelouahed Gherbi, John Mullins, and Pierre-Emmanuel Hladik*
Feature Location Through the Combination of Run-Time Architecture Models and Information Retrieval ............................................. 180
  Lorena Arcega, Jaime Font, Øystein Haugen, and Carlos Cetina

Exchanging the Target-Language in Existing, Non-Metamodel-Based Compilers ................................................................. 196
  Dorian Weber, Markus Scheidgen, and Joachim Fischer

Towards Rule-Based Detection of Design Patterns in Model Transformations ................................................................. 211
  Chihab eddine Mokaddem, Houari Sahraoui, and Eugene Syriani

Modular Solutions to Common Design Problems Using Activities and the Interface-Modular Method ............................................. 226
  Urooj Fatima and Rolv Bræk

Author Index ........................................................................ 243
System Analysis and Modeling. Technology-Specific Aspects of Models
9th International Conference, SAM 2016, Saint-Melo, France, October 3-4, 2016. Proceedings
Jens, G.; Herbold, S. (Eds.)
2016, X, 243 p. 99 illus., Softcover
ISBN: 978-3-319-46612-5
