## Contents

1. Why Was Human Evolution So Rapid? .................................................. 1  
   Ian Tattersall

2. Wallace’s Controversy with Darwin on Man’s Mental Evolution,  
on the Position of the Natives in Human Evolution, and His Anticipation  
of Cultural Evolution, as Distinct from Biological Evolution .................. 11  
   Joseph Neumann

3. Man’s Place in Past and Future Evolution: A Historical Survey  
of Remarkable Ideas .............................................................................. 21  
   David Wool

4. The Paleoeconomy of the Upper Ndolanya Beds, Laetoli, Tanzania,  
and Its Implications for Hominin Evolution ........................................ 31  
   Terry Harrison

5. The Australopithecine Brain: Controversies Perpetual ....................... 45  
   Ralph L. Holloway

6. Posture, Locomotion and Bipedality: The Case of the Gerenuk  
(Litocranius walleri) ........................................................................... 53  
   Matt Cartmill and Kaye Brown

7. Canine Height and Jaw Gape in Catarrhines with Reference  
to Canine Reduction in Early Hominins ............................................. 71  
   William L. Hylander

8. Paranthropus: Where Do Things Stand? .......................................... 95  
   Bernard Wood and Kes Schroer

9. Feeding Behavior and Diet in Paranthropus boisei: The Limits  
of Functional Inference from the Mandible ....................................... 109  
   David J. Daegling and Frederick E. Grine

10. Aspects of Mandibular Ontogeny in Australopithecus afarensis ......... 127  
    Halszka Glowacka, William H. Kimbel and Donald C. Johanson

11. Middle Pleistocene Homo Crania from Broken Hill and Petralona:  
    Morphology, Metric Comparisons, and Evolutionary Relationships .... 145  
    G. Philip Rightmire

12. Thermoregulation in Homo erectus and the Neanderthals:  
    A Reassessment Using a Segmented Model ...................................... 161  
    Mark Collard and Alan Cross
