Contents

Currying Self-* Actions in Autonomic Systems ......................... 1
    Phan Cong Vinh and Nguyen Thanh Tung

Towards User-Aware Service Composition .............................. 11
    Giacomo Cabri, Mauro Leoncini, Riccardo Martoglia,
    and Franco Zambonelli

Dense 3D Mapping Using Volume Registration .......................... 22
    Luke Lincoln and Ruben Gonzalez

Energy Efficient Spectrum Allocation in IP-over-EON with Traffic
    Grooming .................................................................. 33
    Bingbing Li and Young-Chon Kim

Comparison Between Parametric and Non-Parametric Approaches
    for Time-Varying Delay Estimation with Application to Electromyography
    Signals .................................................................. 43
    Gia Thien Luu and Tran Trung Duy

An Approach to Detecting Brown Plant Hopper Based on Morphological
    Operations .............................................................. 52
    An C. Tran, Nghi C. Tran, and Hiep X. Huynh

An Efficient Virtual Machine Migration Algorithm Based on Minimization
    of Migration in Cloud Computing ..................................... 62
    Nguyen Khac Chien, Vo Sy Giang Dong, Nguyen Hong Son,
    and Ho Dac Loc

Fast Bilateral Symmetry Detection Using Inverted Gradient Hash Maps 72
    R. Gonzalez and L. Lincoln

A Review of Two Approaches for Joining 3D Meshes .................... 82
    Anh-Cang Phan, Romain Raffin, and Marc Daniel

A Synchronous Network for Brown Planthopper Surveillance
    Based on Hexagonal Cellular Automata ............................. 97
    Bao Hoai Lam, Huu-Hung Huynh, Hiep Xuan Huynh,
    and Bernard Pottier

Optimizing Energy Consumption with Delay Constraint in Wireless Sensor
    Networks .................................................................. 113
    Trong-Thua Huynh, Bui Cong Giao, Cong-Hung Tran,
    and Anh-Vu Dinh-Duc
Construction of Vietnamese Argument Annotated Dataset for Why-Question Answering Method .................................................. 124
   Chinh Trong Nguyen and Dang Tuan Nguyen

FRFE: Fast Recursive Feature Elimination for Credit Scoring .............. 133
   Van-Sang Ha and Ha-Nam Nguyen

Joint Load Balancing and Coverage Optimizing Based on Tilt Adjusting in LTE Networks .......................................................... 143
   Phan Nhu Quan, Jiang Huilin, Bui Thi Oanh, Li Pei, Pan Zhiwen, and Liu Nan

Resource-Bounded Context-Aware Applications:
A Survey and Early Experiment .................................................. 153
   Ijaz Uddin, Hafiz Mahfooz Ul Haque, Abdur Rakib, and Mohamad Rafi Segi Rahmat

Optimizing the Light Trap Position for Brown Planthopper (BPH) Surveillance Network ......................................................... 165
   Huong Hoang Luong, Tuyen Phong Truong, Ky Minh Nguyen, Bao Hoai Lam, and Hiep Xuan Huynh

Some Efficient Segmentation-Based Techniques to Improve Time Series Discord Discovery ....................................................... 179
   Huynh Thi Thu Thuy, Duong Tuan Anh, and Vo Thi Ngoc Chau

Improving SPRING Method in Similarity Search Over Time-Series Streams by Data Normalization ............................................. 189
   Bui Cong Giao and Duong Tuan Anh

Hybrid Mean-Variance Mapping Optimization for Economic Dispatch with Multiple Fuels Considering Valve-Point Effects .............. 203
   Khoa H. Truong, Pandian Vasant, M.S. Balbir Singh, and Dieu N. Vo

Heuristic Solutions for the Lifetime Problem of Wireless Sensor Networks... 217
   Nguyen Thanh Tung and Phan Cong Vinh

Harnessing Collective Intelligence to Preserve and Learn Endangered Languages ................................................................. 224
   Asfahaan Mirza and David Sundaram

An Abstract-Based Approach for Text Classification ................................ 237
   Quoc Dinh Truong, Hiep Xuan Huynh, and Cuong Ngoc Nguyen

An Hierarchical Scheduled Algorithm for Data Dissemination in a Brown Planthopper Surveillance Network ................................ 246
   Bao Hoai Lam, Tuyen Phong Truong, Ky Minh Nguyen, Hiep Xuan Huynh, and Bernard Pottier
CFBM - A Framework for Data Driven Approach in Agent-Based Modeling and Simulation

Thai Minh Truong, Frédéric Amblard, Benoît Gaudou, and Christophe Sibertin Blanc

Graph Methods for Social Network Analysis

Quoc Dinh Truong, Quoc Bao Truong, and Taoufiq Dkaki

Maintenance Process Control: Cellular Automata Approach

Mustapha Ouardouz, Abdessamed Bernoussi, Hamidou Kassogué, and Mina Amharref

Modeling and Optimizing of Connections for Dynamic Sensor Fields Based on BT-Graph

Tuyen Phong Truong, Huong Hoang Luong, Hung Huu Huynh, Hiep Xuan Huynh, and Bernard Pottier

Toward an Agent-Based and Equation-Based Coupling Framework

Huynh Quang Nhi, Tri Nguyen-Huu, Arnaud Grignard, Hiep Xuan Huynh, and Alexis Drogoul

Active Contour Based on Curvelet Domain in Medical Images

Vo Thi Hong Tuyet

Computational and Comparative Study on Multiple Kernel Learning Approaches for the Classification Problem of Alzheimer’s Disease

Ahlam Mallak, Jeonghwan Gwak, Jong-In Song, and Sang-Woong Lee for the Alzheimer’s Disease Neuroimaging initiative

Improving Salient Object via Global Contrast Combined with Color Distribution

Nguyen Duy Dat and Nguyen Thanh Binh

Edge Detection in Low Quality Medical Images

Vo Thi Hong Tuyet and Nguyen Thanh Binh

People Counting in Conference Scenes in Shearlet Domain

Nguyen Thanh Binh

Developing Database of Vietnamese Abbreviations and Some Applications

Nguyen Nho Tuy and Phan Huy Khanh

Architectural Pattern for Inter-Organizational Middleware Systems

Radhouane B.N. Jrad and David Sundaram

Twitter Sentiment Analysis Using Binary Classification Technique

B.N. Supriya, Vish Kallimani, S. Prakash, and C.B. Akki

Author Index
Nature of Computation and Communication
Second International Conference, ICTCC 2016, Rach Gia, Vietnam, March 17-18, 2016, Revised Selected Papers
Vinh, P.C.; Barolli, L. (Eds.)
2016, XIII, 398 p. 175 illus., Softcover
ISBN: 978-3-319-46908-9
