MWDA 2016

Modeling User Preference from Rating Data Based on the Bayesian Network with a Latent Variable	3
<i>Renshang Gao, Kun Yue, Hao Wu, Binbin Zhang, and Xiaodong Fu</i>	
A Hybrid Approach for Sparse Data Classification Based on Topic Model. . .	17
<i>Guangjing Wang, Jie Zhang, Xiaobin Yang, and Li Li</i>	
Human Activity Recognition in a Smart Home Environment with Stacked Denoising Autoencoders	29
<i>Aiguo Wang, Guilin Chen, Cuijuan Shang, Miaofei Zhang, and Li Liu</i>	
Ranking Online Services by Aggregating Ordinal Preferences.	41
<i>Ying Chen, Xiao-dong Fu, Kun Yue, Li Liu, and Li-jun Liu</i>	
DroidDelver: An Android Malware Detection System Using Deep Belief Network Based on API Call Blocks.	54
<i>Shifu Hou, Aaron Saas, Yanfang Ye, and Lifei Chen</i>	
A Novel Feature Extraction Method on Activity Recognition Using Smartphone	67
<i>Dachuan Wang, Li Liu, Xianlong Wang, and Yonggang Lu</i>	
Fault-Tolerant Adaptive Routing in n -D Mesh	77
<i>Meirun Chen and Yi Yang</i>	
An Improved Slope One Algorithm Combining KNN Method Weighted by User Similarity.	88
<i>Songrui Tian and Ling Ou</i>	
Urban Anomalous Events Analysis Based on Bayes Probabilistic Model from Mobile Phone Records.	99
<i>Rong Xie and Ming Huang</i>	
A Combined Model Based on Neural Networks, LSSVM and Weight Coefficients Optimization for Short-Term Electric Load Forecasting	109
<i>Caihong Li, Zhaoshuang He, and Yachen Wang</i>	

SDMMW 2016

Efficient Context-Aware Nested Complex Event Processing over RFID Streams 125
Shanglian Peng and Jia He

Using Convex Combination Kernel Function to Extract Entity Relation in Specific Field 137
Qi Shang, Jianyi Guo, Yantuan Xian, Zhengtao Yu, and Yonghua Wen

A Novel Method of Influence Ranking via Node Degree and H-index for Community Detection. 149
Qiang Liu, Lu Deng, Junxing Zhu, Fenglan Li, Bin Zhou, and Peng Zou

Efficient and Load Balancing Strategy for Task Scheduling in Spatial Crowdsourcing 161
Dezhi Sun, Yong Gao, and Dan Yu

How Surfing Habits Affect Academic Performance: An Experimental Study . . . 174
Xing Xu, Jianzhong Wang, and Haoran Wang

Preference-Aware Top-k Spatio-Textual Queries 186
Yunpeng Gao, Yao Wang, and Shengwei Yi

Result Diversification in Event-Based Social Networks 198
Yuan Liang, Haogang Zhu, and Xiao Chen

Complicated-Skills-Based Task Assignment in Spatial Crowdsourcing 211
Jiaxu Liu, Haogang Zhu, and Xiao Chen

Market-Driven Optimal Task Assignment in Spatial Crowdsourcing 224
Kaitian Tan and Qian Tao

SemiBDMA 2016

A Shortest Path Query Method Based on Tree Decomposition and Label Coverage. 239
Xiaohuan Shan, Xin Wang, Jun Pang, Liyan Jiang, and Baoyan Song

An Efficient Two-Table Join Query Processing Based on Extended Bloom Filter in MapReduce 249
Junlu Wang, Jun Pang, Xiaoyan Li, Baishuo Han, Lei Huang, and Linlin Ding

An Improved Community Detection Method in Bipartite Networks 259
Fan Chunlong, Song Yan, Song Huimin, and Ding Guohui

Community Detection Algorithm of the Large-Scale Complex Networks
Based on Random Walk 269
Ding Guohui, Song Huimin, Fan Chunlong, and Song Yan

Efficient Interval Indexing and Searching on Cloud. 283
Xin Zhou, Jun Zhang, and GuanYu Li

Filtering Uncertain XML Documents by Threshold XPEs. 292
Bo Ning, Yu Wang, Ansheng Deng, Yi Li, and Yawen Zheng

Storing and Querying Semi-structured Spatio-Temporal Data in HBase 303
Chong Zhang, Xiaoying Chen, Xiaosheng Feng, and Bin Ge

Efficient Approximation of Well-Designed SPARQL Queries. 315
*Zhenyu Song, Zhiyong Feng, Xiaowang Zhang, Xin Wang,
and Guozheng Rao*
