

# Contents

## Part I Theoretical Motor Control

|   |    |
|---|----|
| <b>Modularity for Motor Control and Motor Learning</b> . . . . .                                  | 3  |
| Andrea d’Avella   |    |
| <b>Synergies in Grasping</b> . . . . .  | 21 |
| Jeroen B.J. Smeets and Eli Brenner  |    |
| <b>Encoding Temporal Features of Skilled Movements—What, Whether and How?</b> . . . . .           | 35 |
| Katja Kornysheva  |    |
| <b>Predictability and Robustness in the Manipulation of Dynamically Complex Objects</b> . . . . . | 55 |
| Dagmar Sternad and Christopher J. Hasson  |    |

## Part II Fifty Years of the Equilibrium-Point Hypothesis

|   |     |
|---|-----|
| <b>Fifty Years of Physics of Living Systems</b> . . . . .   | 81  |
| Mark L. Latash  |     |
| <b>The Relationship Between Postural and Movement Stability</b> . . . . .                               | 105 |
| Anatol G. Feldman   |     |
| <b>Principles of Motor Recovery After Neurological Injury Based on a Motor Control Theory</b> . . . . . | 121 |
| Mindy F. Levin  |     |

## Part III Neurophysiological Mechanisms of Motor Control

|  |     |
|--|-----|
| <b>What Do TMS-Evoked Motor Potentials Tell Us About Motor Learning?</b> . . . . . | 143 |
| Richard G. Carson, Kathy L. Ruddy and Emmet McNickle                               |     |

**Motor Control of Human Spinal Cord Disconnected from the Brain and Under External Movement** . . . . . 159  
Winfried Mayr, Matthias Krenn and Milan R. Dimitrijevic

**Anticipation in Object Manipulation: Behavioral and Neural Correlates** . . . . . 173  
Thomas Schneider and Joachim Hermsdörfer

**Part IV Learning of Skilled Behavior**

**Brain Plasticity and the Concept of Metaplasticity in Skilled Musicians**. . . . . 197  
Eckart Altenmüller and Shinichi Furuya

**The Coordination Dynamics of Observational Learning: Relative Motion Direction and Relative Phase as Informational Content Linking Action-Perception to Action-Production** . . . . . 209  
John J. Buchanan

**Rethinking the Study of Volition for Clinical Use** . . . . . 229  
Elizabeth B. Torres

**Part V Impaired Motor Control and Rehabilitation**

**Motor Lateralization Provides a Foundation for Predicting and Treating Non-paretic Arm Motor Deficits in Stroke** . . . . . 257  
Robert L. Sainburg, Candice Maenza, Carolee Winstein and David Good

**Control of Cycling Limb Movements: Aspects for Rehabilitation** . . . . . 273  
Jozsef Laczko, Mariann Mravcsik and Peter Katona

**Impaired Voluntary Movement Control and Its Rehabilitation in Cerebral Palsy** . . . . . 291  
Andrew M. Gordon

**Can Motor Recovery in Stroke Be Improved by Non-invasive Brain Stimulation?** . . . . . 313  
John C. Rothwell

**Part VI Human-Machine Interface**

**Organizing and Reorganizing Coordination Patterns**. . . . . 327  
Rajiv Ranganathan and Robert A. Scheidt

**A Computational Index to Describe Slacking During Robot Therapy** . . . . . 351  
Davide Piovesan

|   |     |
|---|-----|
| <b>Toward a Proprioceptive Neural Interface That Mimics<br/>Natural Cortical Activity</b> . . . . . | 367 |
| Tucker Tomlinson and Lee E. Miller  |     |
| <b>Erratum to: Progress in Motor Control</b> . . . . .  | E1  |
| Jozsef Laczko and Mark L. Latash  |     |
