1 Lateral-Line Inspired MEMS Neuromast Sensors ................. 1
   Ajay Giri Prakash Kottapalli and Mohsen Asadnia
   1.1 Introduction ......................................... 1
   1.2 Bioinspiration: Lateral-Line Sensors ....................... 1
   1.3 Biological Neuromast Sensors ........................... 3
   1.4 Biologically Inspired MEMS Sensors ...................... 4
   1.5 Division of Labour: Two Types of Sensors ................. 4
       1.5.1 LCP Hair Cell Sensors .......................... 4
       1.5.2 Piezoelectric Hair Cell Sensors ................. 5
   1.6 Design of the Hair Cell like Structure ..................... 6
   1.7 Piezoelectric Hair Cell Sensor ........................... 7
   1.8 Artificial SN Array: Steady-State Flow Sensing .............. 8
       1.8.1 Air Flow Sensing ................................ 9
       1.8.2 Water Flow Sensing ................................ 10
   1.9 Artificial CN Array: Oscillatory Flow Sensing .......... 11
   1.10 Biomimetic Neuromast Sensors with Artificial Cupula ... 15
       1.10.1 Artificial Cupula Sensor Structure ............ 16
       1.10.2 Hydrogel Cupula with Nanofibril Scaffold ........ 16
   1.11 Conclusion .......................................... 18
   References................................................ 19

2 Biological Olfaction Inspired Chemical Sensors ................. 23
   Nan Wang
   2.1 Biological Olfactory Sensing System ....................... 23
       2.1.1 Olfactory System of Terrestrial Animals ........ 23
       2.1.2 Olfactory System of Aquatic Animals ............ 26
   2.2 Artificial Sensors Inspired by the Olfactory System of Terrestrial Animals .......... 30
       2.2.1 Olfactory Glomeruli Inspired Optical System .... 31
       2.2.2 Olfactory Mucosa Inspired Gas Sensor Array ...... 32
### 2.2.3 Olfactory Receptor Protein Inspired Gas Nanosensor

### 2.2.4 Olfactory Sensilla Inspired Nanopores

### 2.3 Artificial Sensors Inspired by the Olfactory System
of Aquatic Animals

#### 2.3.1 Bio-inspired Sensor Design

#### 2.3.2 CFD Simulation with the Sensor

#### 2.3.3 Characterization of the Sensor

#### 2.3.4 Heavy Metal Detection with the Sensor

### 2.4 Conclusions and Future Work

### References
