Contents

Part I Introduction/Background

1 When and How Did It All Begin? A Brief History of Intravenous Anesthesia .................................................. 3
   John William Sear

2 The Development and Regulation of Commercial Devices for Target-Controlled Drug Infusion ......................... 9
   John B. Glen

3 The Memory Labyrinth: Systems, Processes, and Boundaries ................. 31
   Robert A. Veselis

4 Consciousness and Anesthesia ................................... 63
   Ram Adapa

5 Mechanisms of Intravenous Anesthetic Action ............................... 79
   Hugh C. Hemmings Jr. and Karl F. Herold

Part II Principles of Pharmacological Modeling

6 Basic Pharmacology: Kinetics and Dynamics for Dummies .............. 99
   Johan Ræder

7 Pharmacokinetic–Pharmacodynamic Modelling of Anesthetic Drugs ... 117
   Johannes Hans Proost

8 Principles of Target-Controlled Infusions ..................................... 147
   Steven L. Shafer

9 Performance of Target-Controlled Infusion Systems .................. 159
   Matthew T.V. Chan

10 How to Select a PK/PD Model ................................... 171
   Kenichi Masui

Part III Pharmacology of the Intravenous Anesthetic Agents

11 Propofol PK-PD .......................................................... 191
   Douglas J. Eleveld

12 Etomidate and Etomidate Analogues: Molecular Pharmacology and Behavioral Actions ............................................ 209
   Douglas E. Raines

13 Dexmedetomidine: The Science and Clinical Aspects in Adults and Children ........................................ 221
   Mohamed Mahmoud
