

Contents

1 Introduction	1
1.1 Overview of MSNs	1
1.1.1 Mobile Social Networks	1
1.1.2 Architecture of MSNs	2
1.1.3 Access to MSNs	4
1.2 Applications in MSNs	5
1.2.1 Multimedia Services	5
1.2.2 Healthcare Services	7
1.2.3 Security Services	8
1.3 Research Issues in MSNs	9
1.3.1 Community Detection	9
1.3.2 Content Distribution	10
1.3.3 Mobility	10
1.3.4 Privacy	11
1.3.5 Security	12
1.4 Modeling and Optimization for MSNs	13
1.5 Aim of the Monograph	13
References	14
2 Modeling of Epidemic Information Dissemination for MSNs	19
2.1 Information Dissemination in MSNs	19
2.2 Related Work	21
2.2.1 Epidemic Information Dissemination Model	21
2.2.2 General Information Dissemination Model	22
2.3 System Model	23
2.3.1 MSN-Based Social Graph	23
2.3.2 Opportunistic Links	24
2.3.3 Information Transmission Mechanism	24
2.4 Proposed Analytical Scheme for Information Dissemination	26

2.5	Performance Evaluation	32
2.5.1	Simulation Setup	32
2.5.2	Model Validation	32
2.5.3	Time Evolutions of Nodes	34
2.5.4	Performance of Information Dissemination	35
2.6	Summary	37
	References.	38
3	Modeling of Selfishness-Aware Incentive for MSNs	41
3.1	Selfishness-Aware Incentive in MSNs	41
3.2	Related Work	42
3.3	System Model.	43
3.3.1	Social Network	43
3.3.2	Mobility Model	45
3.3.3	Node Selfishness	45
3.4	Proposed Model with a Novel Selfishness Division	45
3.5	Performance Evaluation	49
3.5.1	Simulation Setup	49
3.5.2	Effect of Weak Selfishness	49
3.5.3	Effect of Extreme Selfishness	50
3.6	Summary	52
	References.	53
4	Optimal Relay Services for MSNs	55
4.1	Relay Services in MSNs.	55
4.2	Related Work	56
4.3	System Model.	58
4.3.1	Network Model	58
4.3.2	Node Model	59
4.3.3	Bundle Model	59
4.3.4	Design Goals.	60
4.4	Relay Service Scheme	60
4.4.1	Node Status.	60
4.4.2	Node Selection	61
4.4.3	Bargain Game	62
4.4.4	Bundle Delivery Framework	68
4.5	Performance Evaluations.	69
4.5.1	Simulation Setup	69
4.5.2	Performance Comparison	70
4.6	Summary	73
	References.	73

5	Optimal Cloud Resource Allocation for MSNs	75
5.1	Cloud Resource Allocation in MSNs	75
5.2	Related Work	76
5.2.1	Multimedia Social Networks with Mobile Users	76
5.2.2	Resource Allocation with Media Cloud	77
5.3	System Model	78
5.3.1	System Model	78
5.3.2	QoE Model	80
5.3.3	Design Goals	81
5.4	Problem Formulation	81
5.4.1	Resource Allocation Framework	81
5.4.2	Utility Functions	82
5.4.3	Four Stage Stackelberg Game	85
5.5	Analysis of the Proposed Four Stage Game	85
5.5.1	Evolution Game Among Users in Stage IV	85
5.5.2	Non-cooperative Game Among Brokers in Stage II and Stage III	87
5.5.3	Strategy of Media Cloud in Stage I	88
5.5.4	Algorithm Design for Scheme Implementation	89
5.6	Performance Evaluation	90
5.6.1	Simulation Setup	90
5.6.2	Numerical Results	91
5.7	Summary	95
	References	95
6	Optimization of Heterogeneous MSN Architecture	99
6.1	Network Architecture for Heterogeneous MSNs	99
6.2	Mobile Content Delivery	100
6.2.1	Requirement of Mobile Communication	100
6.2.2	Advance of Network Architecture for Mobile Social Contents	101
6.2.3	Challenges in Mobile Content Delivery in MSNs	101
6.3	Content Centric Mobile Social Networks	103
6.3.1	Content Centric Networks	103
6.3.2	Content Centric Mobile Social Networks	104
6.4	Architecture of Content Centric Mobile Content Delivery	106
6.4.1	Network Architecture	106
6.4.2	Process of Mobile Interest and Content Delivery	108
6.4.3	Caching for a Content Store in a CCN Node in a Small Cell	110
6.4.4	Performance Evaluation	111
6.5	Summary	112
	References	112
