

# Contents

<b>1</b>	<b>Introduction</b> . . . . .	<b>1</b>
	Wojciech Stanek	
<b>Part I Fundamentals</b>		
<b>2</b>	<b>Resources. Production. Depletion</b> . . . . .	<b>7</b>
	Wojciech Stanek, Alicia Valero, Guiomar Calvo and Lucyna Czarnowska	
<b>3</b>	<b>Fundamentals of Exergy Analysis</b> . . . . .	<b>37</b>
	Wojciech Stanek, Jan Szargut and Sergio Usón	
<b>4</b>	<b>“Input-Output” Approach to Energy Production Systems</b> . . . . .	<b>81</b>
	Andrzej Ziębik	
<b>5</b>	<b>Cumulative Calculus and Life Cycle Evaluation</b> . . . . .	<b>109</b>
	Wojciech Stanek, Lucyna Czarnowska and Paweł Gładysz	
<b>6</b>	<b>Thermodynamic Methods to Evaluate Resources</b> . . . . .	<b>131</b>
	Wojciech Stanek, Alicia Valero, Antonio Valero, Javier Uche and Guiomar Calvo	
<b>7</b>	<b>Theory of Exergy Cost and Thermo-ecological Cost</b> . . . . .	<b>167</b>
	Antonio Valero, Sergio Usón, César Torres and Wojciech Stanek	
<b>8</b>	<b>The Thermodynamic Rarity Concept for the Evaluation of Mineral Resources</b> . . . . .	<b>203</b>
	Antonio Valero, Alicia Valero and Adriana Domínguez	
<b>9</b>	<b>Externalities Burdening Production Processes and Systems</b> . . . . .	<b>233</b>
	Lucyna Czarnowska	

## Part II Applications

- 10 Computable Examples of the Application of “Input-Output” Models of Energy Production Systems** . . . . . 255  
Andrzej Ziębik and Paweł Gładysz
- 11 Application of Thermo-ecological Cost (TEC) as Sustainability Measure for Useful Products** . . . . . 289  
Wojciech Stanek, Jan Szargut and Lucyna Czarnowska
- 12 Integrating the Thermo-ecological and Exergy Replacement Costs to Assess Mineral Processing** . . . . . 337  
Adriana Domínguez, Alicia Valero and Wojciech Stanek
- 13 Application of Thermo-economic Analysis (TEA) to Industrial Ecology (IE)** . . . . . 353  
Sergio Usón and Wojciech Stanek
- 14 Assessment of Water Resources by Exergy Cost** . . . . . 371  
Javier Uche, Amaya Martínez and Beatriz Carrasquer
- 15 Exergo-ecological Assessment of Multi-generation Energy Systems** . . . . . 405  
Wojciech Stanek, Wiesław Gazda, Wojciech Kostowski and Sergio Usón
- 16 Thermo-ecological Evaluation of Advanced Coal-Fired Power Technologies** . . . . . 443  
Paweł Gładysz and Andrzej Ziębik
- 17 Cumulative Green-House Gasses (GHG) Emissions as Total Measure of Global Warming Potential** . . . . . 473  
Ryszard Białecki and Wojciech Stanek
- 18 Thermo-ecological System Analysis as a Tool Supporting the Analysis of the National Energy and Environmental Policy** . . . . . 489  
Andrzej Ziębik, Wojciech Stanek and Paweł Gładysz
