Contents

1 Introduction .................................................. 1
  1.1 Electricity Network Business Environment ............... 1
  1.2 The Maintenance Management Problem .................... 3
  1.3 Research Scope, Objectives and Questions ............... 5
    1.3.1 Research Scope ................................ 5
    1.3.2 Research Questions ............................. 6
    1.3.3 Research Approach ............................. 6
References .................................................. 8

2 Asset, Risk and Maintenance Management .................. 9
  2.1 Introduction .......................................... 9
  2.2 Asset Management ..................................... 9
    2.2.1 Asset Management as Business Approach .......... 9
    2.2.2 Short History of Asset Management .............. 11
    2.2.3 Publicly Available Specification 55: Asset Management (PAS-55) ................................... 13
    2.2.4 ISO 55000 Series ................................ 14
  2.3 Risk Management ...................................... 15
    2.3.1 Risk Management as Decision-Making Method ....... 15
    2.3.2 Risk Management Standards ..................... 18
  2.4 Maintenance Management ............................... 20
    2.4.1 Definitions ..................................... 20
    2.4.2 Maintenance Action, Policy and Concept .......... 20
  2.5 Developments and Supporting Pillars of Maintenance Management ............................................. 23
    2.5.1 State-of-the-Art Maintenance Management Developments ............................................... 23
    2.5.2 Supporting Pillars for Maintenance Management .... 27
3 Organisation-Wide Maintenance Improvement Framework .... 31
3.1 Introduction .......................................... 31
3.2 Objectives for Maintenance Improvements ................. 32
  3.2.1 Maintenance Management Decision Levels ............. 32
  3.2.2 Underlying Objectives for Steering Maintenance
         Improvement ..................................... 33
  3.2.3 Cyclic Continuous Improvement Approach ............. 34
  3.2.4 Organisational Pillars Steering Maintenance
         Improvement ..................................... 35
  3.2.5 Maintenance Management Maturity Model (M^4) .......... 38
  3.2.6 Maintenance Key Performance Indicators (KPI's) .... 45
3.3 Conclusions and Outlook ................................ 51
  3.3.1 Conclusions ..................................... 51
  3.3.2 Outlook ........................................ 52
References ................................................ 52

4 Risk Linked Reliability-Centred Maintenance
   Management Model ...................................... 55
4.1 Introduction .......................................... 55
4.2 Reliability-Centred Maintenance (RCM) Basic Principles .. 56
  4.2.1 Reliability-Centred Maintenance (RCM) ............... 56
  4.2.2 RCM Analysis Process ............................ 57
  4.2.3 Risk Priority Number (RPN) ........................ 58
4.3 Concept of Risk and Its Relevance to Maintenance ......... 59
  4.3.1 Challenges with Incorporating Risk to RCM .......... 59
  4.3.2 Expanding the Traditional RPN Calculation .......... 62
4.4 Developed Risk Linked RCM Method ....................... 64
  4.4.1 Risk Linked RCM Analysis Process .................. 64
  4.4.2 Implications of Risk Linked RCM for a Maintenance
         Organisation ...................................... 64
4.5 Case Study: Risk Linked RCM Method ...................... 67
  4.5.1 Dutch Case Study: Power Transformers ............... 67
4.6 Conclusions and Outlook ................................ 79
  4.6.1 Conclusions ..................................... 79
  4.6.2 Outlook ........................................ 80
References ................................................ 81
5 Statistical-Based Computational Tools for Maintenance Management

5.1 Introduction ............................................. 83
5.2 Statistical Life Data Analysis ............................. 84
  5.2.1 Statistical Failure Distribution ....................... 84
  5.2.2 Parametric Distribution Fitting Procedure .............. 85
  5.2.3 Data Collection .................................. 86
5.3 Case Study: Application of Statistical Life Data Analysis for Medium Voltage Power Cables Joints.................... 87
  5.3.1 Medium Voltage (MV) Distribution Network ........... 88
  5.3.2 Available 10 kV Cable Joint Data ..................... 88
  5.3.3 Application of Parametric Distribution Fitting .......... 90
  5.3.4 Asset Management and Maintenance Decision Support .... 94
5.4 Case Study: Application of Monte Carlo Simulation (MCS) to Support Risk-Based Decision-Making ................... 98
  5.4.1 10 kV Subnetwork of Stedin with 12 Radial Feeders .... 99
5.5 Conclusion and Outlook ..................................... 101
  5.5.1 Conclusions ..................................... 101
  5.5.2 Outlook .......................................... 103
References ................................................ 103

6 Condition Monitoring Framework for Maintenance Management

6.1 Introduction ............................................. 105
6.2 Upcoming Role of Condition Monitoring in Maintenance Management ............................................. 105
  6.2.1 Condition Monitoring and Risk Management ........... 105
  6.2.2 Role of Condition Monitoring Within Risk-Based Maintenance ............................................. 108
  6.2.3 Survey Results: Perception Towards Condition Monitoring at a Dutch DNO ......................... 110
6.3 Towards a Framework for Condition Monitoring .............. 113
  6.3.1 Condition Monitoring Strategies ..................... 113
  6.3.2 Introducing a Condition Monitoring Framework ....... 114
6.4 Conclusions ............................................. 117
References ................................................ 118

7 Conclusions and Recommendations ............................................. 119
7.1 Book Recap ............................................. 119
7.2 Conclusions ............................................. 120
  7.2.1 Research Question 1: Organisation-Wide Maintenance Management ............................................. 120
  7.2.2 Research Question 2: Maintenance Management Maturity Model ............................................. 121
Risk-Based Maintenance for Electricity Network Organizations
Mehairjan, R.P.Y.
2017, XXI, 155 p. 64 illus., 62 illus. in color., Hardcover
ISBN: 978-3-319-49234-6
