Contents

1 Peptide Synthesis of Libraries of Non-natural Amino Acids ........ 1
  1.1 Statement of the Problem .................................. 1
  1.2 Solid-Phase Organic Synthesis ............................ 4
    1.2.1 Specific of SPOS ................................ 4
    1.2.2 Polymers Used .................................. 5
    1.2.3 Methodology and Principal Stages of SPOS ............ 6
  1.3 Practical Implementation of the Task ....................... 12
    1.3.1 Stage 1: Immobilization of Amino Acids on Supports ... 12
    1.3.2 Stage 2: Removal of Protective Groups ............... 16
    1.3.3 Synthesis of Heterocycles with a Readily Leaving
          Group ......................................... 18
    1.3.4 Realization of Stage 3 (Solid-Phase Nucleophilic
          Substitution) and Stage 4 (Product Removal
          from Polymer Support) ............................ 19
  1.4 Conclusions .......................................... 26
  References ................................................ 27

2 The Choice of Tools for Implementing Multistage
  Transformations. SPOS for Beginners ........................... 29
  2.1 Bill-Board Technique ................................... 30
    2.1.1 Chemical Aspect of the Task ........................ 30
    2.1.2 Specific Features of the Bill-Board Kit ............. 31
    2.1.3 A Brief Description of the Task ..................... 32
    2.1.4 Reagents Used .................................. 32
    2.1.5 Implementation of the Task ......................... 34
  2.2 Tea-Bag Technique ..................................... 39
    2.2.1 Reaction Sequence ............................... 39
    2.2.2 Implementation of the Work ........................ 40
  2.3 Syntheses with Lantern Rods ................................ 44
    2.3.1 Choice of Model Reaction .......................... 47
6.5  Biologically Active 2-Aminoimidazoles.......................... 108
6.6  Other Examples of Practical Application of New Reactions...... 111
6.7  Conclusions ..................................................... 114
References ............................................................ 115
Incorporation of Heterocycles into Combinatorial Chemistry
Babaev, E.
2017, XI, 117 p. 106 illus., Softcover
ISBN: 978-3-319-50013-3
