Part I Defining ISE

2 Formerly ISE: Preparation for Continual Science Learning .... 13
   Phyllis Katz
   The Challenge of Words .................................. 15
   A Little History .......................................... 16
   ISE: Language, Teaching and Learning ..................... 21
   Continual Science Learning (CSL), Adaptive Core .......... 22
   A New Vision Has Been Growing .......................... 24
   Words and Actions ........................................ 25
   Preparing Continual Science Learners: Implications for Teaching 28
   Continual Science Learning (CSL) Teacher Preparation
   for Career Teaching/Learning .............................. 31
   Implications for Policy .................................. 34
   Implications for Funding .................................. 34
   Conclusion and Discussion ................................ 35
   References ............................................... 37
Part II Professional Development

3 Informal Science Educators and the Nine Dimensions of Reflective Practice .................................................. 41
Patricia G. Patrick
Reflective Practice in ISE ........................................... 42
Theory and Research ................................................ 44
Evaluate Teaching Using Research .............................. 44
Link Theory with Practice by Reading the Literature and Critically Analyze Your Personal Theories and Beliefs .... 45
Teaching .................................................................... 49
Study Teaching for Personal Improvement and Reflect Often ..... 49
Be Innovative by Trying Out New Strategies and Ideas .......... 50
Maximize the Learning Potential of the Audience .............. 53
Be an Effective Practitioner by Enhancing the Quality of Teaching ................................................................. 57
Peers ........................................................................ 58
Utilize Learning Conversations with Peers or Mentors to Discuss Alternative Perspectives and Possibilities ........ 58
Improve Your Teaching by Being Involved in Professional Development and Training .................................. 59
Reflective Practice Is Critical ....................................... 61
References ..................................................................... 62

4 Facilitating Deep Conceptual Learning: The Role of Reflection and Learning Communities .......................... 67
Heather King and Lynn Tran
Supporting Deep Conceptual Learning .......................... 68
Organizing Knowledge into Mental Models ...................... 68
The Value of Externalizing and Reflecting ....................... 69
Learning as a Social Process ........................................ 70
Learning Requires Effort ............................................. 70
Examining the Support for Learning in the Informal Sector ............................................................................. 71
Context ...................................................................... 72
Content ...................................................................... 72
Objects ....................................................................... 73
Choice and Motivation ................................................ 73
Learning Research ..................................................... 74
“Talk” ....................................................................... 75
Examples from Practice .............................................. 75
Professional Development for Informal Educators .......... 77
Building Professional Learning Communities .................. 78
Reflecting on Practice—A Professional Development Program for Informal Educators ................................. 79
5 From Acquisition to Inquiry: Supporting Informal Educators Through Iterative Implementation of Practice

Lauren B. Allen and Kevin Crowley

The Challenge of Professional Development for Part-Time Informal Educators

A New Approach to School Trips to the Natural History Museum

Iterative Implementation as Professional Development

Guiding Principles for Inquiry-Based Learning

Learner Autonomy

Conversation with Reflection

Deep Investigation of a Few Concepts

The Leadership Team and the Core Objectives

Inside Iterative Implementation

17  Multiple Approaches to Using Informal Science Education
Contexts to Prepare Informal and Formal Science Educators . 311
Emily Hestness, Kelly Riedinger and J. Randy McGinnis
Literature Review ............................................. 313
Influence of Prior Teaching and Learning Experiences .......... 314
Modeling Research-Based Approaches to Foster Learning .... 315
Valuing Reflective Practice .................................... 316
Valuing Communities of Practice: Shared Practices and Shared
Vocabulary ...................................................... 317
Unique Dimensions of Teaching in Informal Science Education
Contexts ......................................................... 318
Summary ............................................... 319
Educator Preparation Using Informal Science Education Contexts:
Four Approaches .......................................... 319
Approach 1: An Informal Science Education Internship
Experience for Undergraduate Elementary Education Majors
Preparing to Teach in Formal Settings ........................ 320
Approach 2: An Innovative Science Methods Course
for Undergraduate Elementary Education Majors Preparing
to Teach in Formal Education Contexts ....................... 321
Approach 3: A Course on Connecting Formal and Informal
Science Education for Graduate Elementary Education
and Environmental Education Students ....................... 323
Approach 4: A Course on Informal Science Education
for Graduate and Undergraduate Education and Environmental
Science Students ........................................... 325
Discussion ............................................... 327
Connections to Literature on Informal Science Educator
Preparation .................................................. 327
Connections to the Strands of Science Literacy Emphasized
in Informal Science Education Settings ....................... 331
Conclusions .............................................. 333

## Part V  Science Communication

### 22 Preparing Scientists to Be Science Communicators  
Ayelet Baram-Tsabari and Bruce V. Lewenstein

- Motivation for Communication Training for Scientists  
- Approaches to Science Communication Training  
- Potential Learning Goals  
- Assessment  
  - An Online Attitudes and Knowledge Questionnaire  
  - A Rubric for Assessing Written Popular Communication by Scientists  
  - Assessing Clarity: Language  
  - Assessing Clarity: Type of Explanation  
  - Dialogic Approach: Acknowledge and Show Respect to Multiple World Views  
- Effective Pedagogies  
- Course Description  
- Performance Tasks  
- Peer Assessment and Revision  
- Reflection (Self-assessment)  
- Concluding Remark  

### 23 ‘User-Generated’ Educators: The New Frontier or a Far-Fetched Dream?  
Maria Xanthoudaki and Enrico Miotto

- It Looks Like Fun, but Do They Learn?  
- Today’s Learning for Tomorrow’s World  
- Learning and Learning Experts at the National Museum of Science and Technology Leonardo da Vinci  
- Training of Learning Experts at MUST: In Principle, In Practice  
- The Observation Grid  
- Apprenticeship  
- Putting Museum Learning Experts’ Training in Perspective  
- Conclusions
