

Contents

1	Introduction	1
1.1	Implied and Historical Volatility	1
1.2	High-Frequency Data	2
1.3	Fourier Analysis for Volatility Measurement	3
2	A First Glance at Fourier Method	5
2.1	Main Convolution Formula	5
2.2	Specific Features of the Fourier Approach	8
3	Estimation of Integrated Volatility	13
3.1	Univariate Estimator	13
3.1.1	Asymptotic Results	16
3.1.2	Finite Sample Properties	17
3.2	Feasibility	20
3.2.1	Fourier Estimator of Quarticity	20
3.3	Multivariate Estimator	22
3.3.1	Asymptotic Results	24
3.3.2	Asynchronicity Issues	25
3.3.3	Comparison Study	27
3.3.4	Positive Definiteness	30
4	Estimation of Instantaneous Volatility	31
4.1	Univariate Estimator	31
4.1.1	Asymptotic Results	32
4.1.2	Finite Sample Properties	34
4.2	Multivariate Estimator	37
4.2.1	Asymptotic Results	37
4.2.2	Bandwidth and Scale Selection	39
4.3	Fourier Method in the Presence of Jumps	45

- 5 High Frequency Analysis: Market Microstructure Noise Issues 49**
 - 5.1 What Is the Noise Effect on Fourier Estimator? 49
 - 5.2 The Case of Integrated Volatility 50
 - 5.2.1 Starting from the Additive MA(1) Model 51
 - 5.2.2 Moving to Alternative Microstructure Noise Models 55
 - 5.2.3 Comparison with Other Estimators 58
 - 5.2.4 An Empirical Application 61
 - 5.3 The Case of Integrated Covariance 63
 - 5.3.1 Comparison with Other Estimators 66
 - 5.3.2 An Empirical Application 69
 - 5.3.3 Asymptotic Results 70
 - 5.4 The Case of Spot Volatility 71
- 6 Getting Inside the Latent Volatility 75**
 - 6.1 Market Data Considerations 75
 - 6.2 Factor Identification for Stochastic Volatility Models 78
 - 6.2.1 Volatility of Volatility 79
 - 6.2.2 Leverage 81
 - 6.2.3 Empirical Analysis 82
 - 6.3 Volatility Feedback Effects 86
 - 6.3.1 An Empirical Application: Market Stability 88
 - 6.4 Volatility Forecasting Performance 91
 - 6.4.1 Monte Carlo Analysis 92
 - 6.4.2 An Empirical Application 95
 - 6.5 Further Readings 98
- A Mathematical Essentials 101**
 - A.1 Stochastic Processes 101
 - A.1.1 Diffusion Processes 101
 - A.1.2 Itô Energy Identity 103
 - A.1.3 Itô Formula 103
 - A.2 Fourier Analysis 105
 - A.2.1 Fejér’s Convergence Theorem 106
 - A.2.2 Product Formula 106
 - A.2.3 Nyquist Frequency 107
- B Codes for the Fourier Estimator 109**
 - B.1 Integrated Volatility 109
 - B.2 Estimated Bias and MSE 111
 - B.3 Integrated Covariance 115
 - B.4 Spot Volatility 117
 - B.5 Using Fast Fourier Transform Algorithm 118
 - B.6 Volatility of Volatility 120
