

Contents

Part I Model Systems of Kidney Development and Disease

1	<i>Drosophila</i> Malpighian Tubules: A Model for Understanding Kidney Development, Function, and Disease	3
	Naveen Kumar Gautam, Puja Verma, and Madhu G. Tapadia	
2	Zebrafish Pronephros Development	27
	Richard W. Naylor, Sarah S. Qubisi, and Alan J. Davidson	
3	Zebrafish as a Model of Kidney Disease	55
	Elvin E. Morales and Rebecca A. Wingert	
4	Use of <i>Xenopus</i> Frogs to Study Renal Development/Repair	77
	Shoshoni T. Droz and Kelly A. McLaughlin	

Part II Cell Renewal, Differentiation and Fate in Nephrogenesis

5	Tissue-Specific Functions of p53 During Kidney Development	111
	Zubaida Saifudeen	
6	Growth Factor Regulation in the Nephrogenic Zone of the Developing Kidney	137
	Leif Oxburgh, Sree Deepthi Muthukrishnan, and Aaron Brown	
7	Development and Diseases of the Collecting Duct System	165
	Lihe Chen, Paul J. Higgins, and Wenzheng Zhang	
8	Origin and Function of the Renal Stroma in Health and Disease	205
	Christopher J. Rowan, Sepideh Sheybani-Deloui, and Norman D. Rosenblum	

Part III Nephron Morphogenesis and Maintenance

- 9 Imaging, Analysing and Interpreting Branching Morphogenesis in the Developing Kidney 233**
Kieran M. Short and Ian M. Smyth
- 10 Genetic Syndromes Affecting Kidney Development 257**
Abhijeet Pal and Kimberly J Reidy
- 11 Primary Cilia in Cystic Kidney Disease 281**
Prachee Avasthi, Robin L. Maser, and Pamela V. Tran
- 12 Inflammation and Fibrosis in Polycystic Kidney Disease 323**
Cheng Jack Song, Kurt A. Zimmerman, Scott J. Henke,
and Bradley K. Yoder
- 13 Epithelial to Mesenchymal Transition (EMT) and Endothelial to Mesenchymal Transition (EndMT): Role and Implications in Kidney Fibrosis 345**
Ana S. Cruz-Solbes and Keith Youker
