# Contents

1 Introduction ............................................. 1

2 Model-Based Reasoning .................................... 9  
   2.1 Scientific Models ...................................... 9  
   2.2 The Inquiry Cycle ...................................... 12  
   2.3 Some Relevant Results from Psychology ............. 14  
      2.3.1 Experiential Aspects of Model-Based Reasoning . 14  
      2.3.2 Reflective Aspects of Model-Based Reasoning . 15  
      2.3.3 Higher-Level Skills ............................. 16  
      2.3.4 Implications for Assessment Use Cases ......... 17  

3 Evidence-Centered Assessment Design ....................... 19  
   3.1 Assessment Arguments ................................. 20  
   3.2 Design Patterns ...................................... 22  

4 Design Patterns for Model-Based Reasoning .................. 25  

5 Model Formation .......................................... 31  
   5.1 Rationale, Focal KSAs, and Characteristic Task Features 31  
   5.2 Additional KSAs ..................................... 36  
   5.3 Variable Task Features ................................ 39  
   5.4 Potential Work Products and Potential Observations . 42  
   5.5 Considerations for Larger Investigations .............. 46  
   5.6 Some Connections to Other Design Patterns .......... 47  

6 Model Use ................................................. 49  
   6.1 Rationale, Focal KSAs, and Characteristic Task Features 49  
   6.2 Additional KSAs ..................................... 53  
   6.3 Variable Task Features ................................ 55  
   6.4 Potential Work Products and Potential Observations . 55  
   6.5 Some Connections with Other Design Patterns ........ 57
Assessing Model-Based Reasoning using Evidence-Centered Design
A Suite of Research-Based Design Patterns
2017, XVII, 130 p. 23 illus., 9 illus. in color., Softcover
ISBN: 978-3-319-52245-6
