

Contents

Part I Radiation

1	Particles and Forces	3
1.1	Units of Energy and Mass	3
1.2	Elementary Particles and Antiparticles	5
1.3	Fundamental Forces and the Higgs Boson	8
1.4	Feynman Diagrams	11
1.5	Hadrons	12
1.6	Lepton and Quark Numbers	15
	Glossary	17
	References	18
2	Natural Sources of Radiation	19
2.1	Cosmic Microwave Background	19
2.2	Cosmic Radiation	21
2.3	Solar Radiation	25
2.4	Natural Radioactivity	30
	Glossary	34
	References	35
3	Dosimetry	37
3.1	Flux, Activity and the Radioactive Decay Law	37
3.2	Radiological Units	39
3.3	Radiation Doses in Life and the Environment	44
3.4	Biological Effects of Radiation	46
3.5	Recommended Dose Limits	48
	Glossary	49
	References	52

4	Relativistic Kinematics and Collisions	53
4.1	Motion at Classical and Relativistic Speeds	53
4.2	Mass of a Set of Particles	60
4.3	Particle Formation in Collisions	62
4.4	Compton Scattering	66
4.5	Cross Section	68
	Glossary	70
	References.	72
5	Elements of Accelerator Physics	73
5.1	Cockcroft–Walton and Van de Graaff Accelerators.	73
5.2	Linear and Radio Frequency Accelerators.	76
5.3	Cyclotrons and Betatrons	79
5.4	Synchrotrons and Colliders.	81
5.5	Beam Transport	83
5.6	Transverse Focusing	85
5.7	Acceleration and Longitudinal Focusing	89
	Glossary	92
	References.	93
 Part II Interaction Mechanisms and Detectors		
6	Ionisation and Multiple Scattering	97
6.1	Ionisation: Bohr Classical Derivation	97
6.2	Bethe-Block Formula	100
6.3	Particle Identification Through Energy Loss	103
6.4	Statistical Distribution of Energy Loss and the Range	104
6.5	Bragg Peak	106
6.6	Multiple Scattering	108
	Glossary	110
	References.	111
7	Gaseous and Liquid Ionisation Detectors	113
7.1	Principles of Ionisation Detectors	113
7.2	General Characteristics of Ionisation Detectors.	116
7.3	Ionisation Processes and Transport	117
7.4	Ionisation Chamber.	121
7.5	Proportional Chamber.	123
7.6	Multi Wire Proportional Chamber.	127
7.7	Multi Strip Gas Chamber and Resistive Plate Chamber	128
7.8	Drift Chamber.	129
7.9	Time Projection Chamber	132
7.10	Liquid Ionisation Detectors.	133
	Glossary	134
	References.	135

- 8 Semiconductor Detectors** 137
 - 8.1 Basic Semiconductor Properties 137
 - 8.2 Doped Semiconductors 142
 - 8.3 p-n Semiconductor Junction 143
 - 8.4 Silicon Detector Configurations 146
 - 8.5 Particle Tracking and Momentum Measurement 149
 - Glossary 151
 - References. 152

- 9 Scintillation Process and Light Detectors**. 155
 - 9.1 Scintillation for Radiation Detection. 155
 - 9.2 Inorganic Scintillators 157
 - 9.3 Organic Scintillators 160
 - 9.4 Transport and Detection of Light 162
 - 9.5 Bolometers 166
 - Glossary 168
 - References. 169

- 10 Electromagnetic and Hadronic Showers: Calorimeters** 171
 - 10.1 Interaction of Electrons with Matter 171
 - 10.2 Interaction of Photons with Matter 174
 - 10.3 Electromagnetic Showers 176
 - 10.4 Electromagnetic Calorimeters 178
 - 10.5 Hadronic Showers and Calorimeters 182
 - Glossary 183
 - References. 184

- 11 Cherenkov and Transition Radiation: Detectors for PID and Neutrinos** 187
 - 11.1 Cherenkov Radiation 187
 - 11.2 Transition Radiation 190
 - 11.3 Detecting Neutrinos 192
 - Glossary 195
 - References. 196

- Appendix: Statistics and Probability** 197

- Index** 207

Radiation and Detectors

Introduction to the Physics of Radiation and Detection
Devices

Cerrito, L.

2017, XIV, 210 p. 142 illus., 50 illus. in color., Hardcover

ISBN: 978-3-319-53179-3
