1	Basic Statistical Concepts	1
1.1	Tables, Distributions and Histograms	1
1.2	Probability Density	14
1.3	Mean Value	15
1.4	Measures of Dispersion	18
1.4.1	Range	18
1.4.2	Deviation from the Mean and Mean Absolute Deviation from the Mean	19
1.4.3	Standard Deviation	20
2	Measurement Errors	39
2.1	Errors of Measurements	39
2.1.1	Accidental or Random Errors	39
2.1.2	Systematic Errors	40
2.1.3	Personal Errors	42
2.1.4	Occasional Errors	42
2.1.5	The Errors in Reading the Indications of Instruments	43
2.2	Errors in Compound Quantities	45
2.2.1	Error in a Sum or a Difference	46
2.2.2	Error in a Product	48
2.2.3	Error in a Power	48
2.2.4	Error in a Quotient	49
2.2.5	The Use of Differentials	50
3	A Thought Experiment	57
3.1	The Thought Experiment	57
	Reference	75
4	The Statistical Analysis of Experimental Results	77
4.1	The Mean and the Dispersion of the Results of Measurements	77

4.2	The Standard Deviations	80
4.2.1	The Standard Deviation of the Measurements.	80
4.2.2	The Standard Deviation of the Mean	90
4.2.3	The Relationship Between σ and $\sigma_{\bar{x}}$	93
4.2.4	The Relationship Between s_x and σ and $\sigma_{\bar{x}}$	94
4.3	The Standard Deviation of the Standard Deviation of the Mean	98
4.4	Information Derived from the Measurement of \bar{x} and s_x	100
4.4.1	The Mean Value of the Results of the Measurements and Its Standard Deviation	100
4.4.2	The Statistical Distribution of the Results of the Measurements.	103
4.4.3	Statistical Estimates for the Mean.	115
4.4.4	Summary of the Method of Analysis of the Results	116
	References	121
5	The Presentation of Numerical Results	123
5.1	Significant Figures and Rounding of Numbers.	123
5.2	The Presentation of a Numerical Result of a Series of Measurements	124
5.3	The Number of Significant Figures Used in the Presentation of Numerical Results	126
5.4	The International System of Units (S.I.) and the Rules of Its Use.	129
5.5	Recommendations on the Notation Used for Mathematical Constants, Algebraic Parameters, Variables, Indices, Mathematical Functions, Operators, Physical Units, Elementary Particles and Isotopes	134
	Reference	136
6	The Propagation of Errors.	137
6.1	The Combination of Two Series of Measurements of the Same Physical Magnitude	137
6.1.1	The Mean \bar{x} of All the Measurements.	138
6.1.2	The Standard Deviation s_x of All the Measurements.	138
6.1.3	The Standard Deviation of the Mean $\sigma_{\bar{x}}$ of All the Measurements.	139
6.2	The Mean and the Standard Deviation of a Function of Measured Quantities	141
6.2.1	The Mean and the Standard Deviations of a Function of One Variable	141
6.2.2	The Mean and the Standard Deviation of an Algebraic Sum.	146

6.2.3	The Mean and the Standard Deviations of a General Function of Many Variables.	149
6.2.4	Another Approach to the Evaluation of the Mean and the Standard Deviation of a Compound Quantity	155
6.3	The Error in $\overline{Q}(\overline{x}, \overline{y}, \overline{z}, \dots)$ Due to the Errors in $\overline{x}, \overline{y}, \overline{z}, \dots$	157
6.3.1	The Case of Asymmetrical Errors.	158
7	The Three Basic Probability Distributions	163
7.1	Histograms of Experimental Probabilities.	163
7.2	The Binomial or Bernoulli Distribution	166
7.2.1	The Normalization of the Binomial Distribution.	178
7.2.2	The Mean Value of x for the Binomial Distribution . . .	178
7.2.3	The Standard Deviation of x from the Mean for a Binomial Distribution.	179
7.3	The Poisson Distribution	180
7.3.1	The Normalization of the Poisson Distribution	188
7.3.2	The Mean Value of x for the Poisson Distribution	188
7.3.3	The Standard Deviation from the Mean of x for the Poisson Distribution	188
7.4	The Normal or Gaussian Distribution.	192
7.4.1	The Normalization of the Gaussian Distribution	200
7.4.2	The Mean Value of x for the Gaussian Distribution . . .	200
7.4.3	The Standard Deviation of x from the Mean for the Gaussian Distribution	200
7.4.4	Testing Whether a Set of Data Has a Gaussian Distribution.	201
7.4.5	The Gaussian Distribution and the Phenomenon of Diffusion	209
