## Contents

1 Basic Concepts Related to Intuitionistic Fuzzy Numbers  
   1.1 Introduction to Intuitionistic Fuzzy Numbers  
   1.2 Basic Operations Between Intuitionistic Fuzzy Numbers  
      1.2.1 Geometrical Analysis of the Operations of IFNs  
      1.2.2 Algebraic Analysis of the Operations of IFNs  
   1.3 Order Relations of IFNs  
      1.3.1 Three Kinds of Orders of IFNs and Relationships Among Them  
      1.3.2 Properties of the Order Based on the Operations of IFNs  
   1.4 Conclusions  

2 Derivatives and Differentials of Intuitionistic Fuzzy Functions  
   2.1 Intuitionistic Fuzzy Functions  
   2.2 Derivatives of Intuitionistic Fuzzy Functions  
   2.3 Differentials of Intuitionistic Fuzzy Functions  
   2.4 Conclusions  

3 Integrals of Intuitionistic Fuzzy Functions  
   3.1 Indefinite Integrals of Intuitionistic Fuzzy Functions  
   3.2 Definite Integrals of Intuitionistic Fuzzy Functions  
      3.2.1 Generating Ways of Definite Integrals of IFFs  
      3.2.2 Properties of Definite Integrals of IFFs  
   3.3 Fundamental Theorem of Intuitionistic Fuzzy Calculus  
   3.4 Application of the Definite Integrals of IFFs  
      3.4.1 Aggregating Operator Based on the Definite Integrals of IFFs  
      3.4.2 Properties of Aggregation Operator Built by the Definite Integrals of IFFs  
   3.5 Conclusions
4 Aggregation Operations of Continuous Intuitionistic Fuzzy Information

4.1 Method Dealing with Continuous Intuitionistic Fuzzy Information ........................................... 74
4.2 Properties of Integral Aggregating Value .......................................................... 80
4.3 Application of the Integral Aggregating Value .................................................. 86
4.4 Conclusions ........................................................................................................ 96

5 Relationships Among IFWA Operator, IFIA Operator and Definite Integrals of IFFs

5.1 IFWA Operator and Definite Integrals of IFFs ........................................ 99
5.2 IFIA Operator and Definite Integrals of IFFs ....................................... 108
5.3 IFWA Operator and IFIA Operator ......................................................... 120
  5.3.1 Integral Aggregating Value Based on Archimedean T-Norm and T-Conorm 122
  5.3.2 IFIA Operator Based on Archimedean T-Norm and T-Conorm 128
5.4 Conclusions ........................................................................................................ 131

6 Complement Theory of Intuitionistic Fuzzy Calculus

6.1 Complements of Fundamental Knowledge Related to IFNs 133
6.2 Complements of Derivatives and Differentials of IFFs 136
  6.2.1 Complements of Derivatives of IFFs .................................................. 137
  6.2.2 Complements of Differentials of IFFs ............................................. 141
6.3 Complements of Integrals of IFFs ............................................................ 143
  6.3.1 Complements of Indefinite Integrals of IFFs .................................. 143
  6.3.2 Complements of Definite Integrals of IFFs .................................... 147
6.4 Complements of Aggregation Operators .................................................. 151
  6.4.1 Complements of IFWA Operator and IFIA Operator ............. 151
  6.4.2 Integral Forms of Complements of IFWA Operator and IFIA Operator 156
6.5 Conclusions ........................................................................................................ 164
