

# Contents

|          |   |    |
|----------|---|----|
| <b>1</b> | <b>Humans and the Sky</b> . . . . .                               | 1  |
| 1.1      | Repeating Days and Nights . . . . .                               | 3  |
| 1.2      | Cycles of the Seasons . . . . .                                   | 4  |
| 1.3      | Early Sky Watchers . . . . .                                      | 4  |
| 1.4      | Worship of the Sun . . . . .                                      | 5  |
| 1.5      | The Orderly Heaven . . . . .                                      | 7  |
| 1.6      | Questions to Think About . . . . .                                | 9  |
| <b>2</b> | <b>Effects of Celestial Motions on Human Activities</b> . . . . . | 11 |
| 2.1      | Daily Motion of the Sun . . . . .                                 | 12 |
| 2.2      | The Annual Motion of the Sun . . . . .                            | 12 |
| 2.3      | The Seasons . . . . .   | 14 |
| 2.4      | Regular But Not Simple . . . . .                                  | 15 |
| 2.5      | Questions to Think About . . . . .                                | 15 |
| <b>3</b> | <b>Ancient Models of the Universe</b> . . . . .                   | 17 |
| 3.1      | A Spherical Heaven . . . . .                                      | 17 |
| 3.2      | Chasing the Shadows . . . . .                                     | 18 |
| 3.3      | Not All Directions Are Equal . . . . .                            | 18 |
| 3.4      | Path of the Sun . . . . .   | 21 |
| 3.5      | Where Does the Sun Go at Night? . . . . .                         | 22 |
| 3.6      | Questions to Think About . . . . .                                | 24 |
| <b>4</b> | <b>Turning of the Heavens</b> . . . . .                           | 25 |
| 4.1      | The Pole of Heaven . . . . .                                      | 26 |
| 4.2      | The Heaven Is Tilted . . . . .                                    | 29 |
| 4.3      | A Free Floating Earth . . . . .                                   | 31 |
| 4.4      | Questions to Think About . . . . .                                | 31 |
| <b>5</b> | <b>A Spherical Earth</b> . . . . .                                | 33 |
| 5.1      | The Sun Moves in Complete Circles . . . . .                       | 33 |
| 5.2      | A Different Show for Everyone . . . . .                           | 35 |

- 5.3 Evidence for a Non-flat Earth . . . . . 35
- 5.4 The Changing Horizon . . . . . 37
- 5.5 How High Can the Sun Go? . . . . . 41
- 5.6 Different Lengths of Daylight . . . . . 42
- 5.7 Pole Star and Latitude . . . . . 42
- 5.8 Celestial Navigation . . . . . 44
- 5.9 Are There Stars We Can't See? . . . . . 46
- 5.10 Success of the Round-Earth Hypothesis . . . . . 47
- 5.11 Questions to Think About . . . . . 48
- 6 Journey of the Sun Among the Stars . . . . . 49**
  - 6.1 The Sun Moving Through the Stars . . . . . 49
  - 6.2 Two Kinds of Motion of the Sun . . . . . 53
  - 6.3 Inclination of the Ecliptic . . . . . 54
  - 6.4 Placing Stars on the Celestial Sphere . . . . . 56
  - 6.5 An Asymmetric Universe . . . . . 58
  - 6.6 Questions to Think About . . . . . 59
- 7 A Two-Sphere Universe . . . . . 61**
  - 7.1 An Inner Sphere for Humans, an Outer Sphere for Celestial  
Objects . . . . . 61
  - 7.2 The Armillary Sphere . . . . . 63
  - 7.3 Armillary Spheres as Observing Instruments . . . . . 67
  - 7.4 The Two-Sphere Cosmology . . . . . 67
  - 7.5 Questions to Think About . . . . . 69
- 8 Dance of the Moon . . . . . 71**
  - 8.1 Shifting Locations of Moonrise . . . . . 72
  - 8.2 Two Different Lengths of a Month . . . . . 75
  - 8.3 Eclipses and Phases of the Moon . . . . . 77
  - 8.4 Size and Distance to the Moon . . . . . 78
  - 8.5 The Self-spinning Moon . . . . . 80
  - 8.6 Questions to Think About . . . . . 81
- 9 The Calendars . . . . . 83**
  - 9.1 How Long Is a Year? . . . . . 84
  - 9.2 Star Calendar . . . . . 84
  - 9.3 What Defines a Year? . . . . . 86
  - 9.4 Different Calendars Around the World . . . . . 87
  - 9.5 Reform of the Julian Calendar . . . . . 89
  - 9.6 What Is so Special About a 24-hour Day? . . . . . 90
  - 9.7 Questions to Think About . . . . . 91
- 10 The Wanderers . . . . . 93**
  - 10.1 The Ten Patterns of Venus . . . . . 96
  - 10.2 Mars at Opposition . . . . . 100

|           |  |            |
|-----------|--|------------|
| 10.3      | Moving Backwards . . . . .   | 101        |
| 10.4      | Two Different Periods for Each Planet . . . . .  | 103        |
| 10.5      | Astrology . . . . .  | 106        |
| 10.6      | Planets in the Scheme of the Universe . . . . .  | 108        |
| 10.7      | Questions to Think About . . . . .   | 109        |
| <b>11</b> | <b>The Mystery of Uneven Seasons . . . . .</b>   | <b>111</b> |
| 11.1      | Is the Earth moving? . . . . .   | 112        |
| 11.2      | Earth Not Exactly at the Center . . . . .  | 115        |
| 11.3      | The Pole Is Moving . . . . .   | 120        |
| 11.4      | Shifts of the Zodiac Signs . . . . .   | 123        |
| 11.5      | Questions to Think About . . . . .   | 125        |
| <b>12</b> | <b>Size of the Earth . . . . .</b>   | <b>127</b> |
| 12.1      | First Measurement of the Size of the Earth . . . . .   | 128        |
| 12.2      | How Far Away Is the Sun? . . . . .   | 130        |
| 12.3      | Revival of a Flat Earth . . . . .  | 131        |
| 12.4      | Practical Proof that the Earth Is Round . . . . .  | 133        |
| 12.5      | Questions to Think About . . . . .   | 134        |
| <b>13</b> | <b>Cycles Upon Cycles . . . . .</b>  | <b>137</b> |
| 13.1      | Moving in Circles . . . . .  | 137        |
| 13.2      | Three Artificial Constructions . . . . .   | 139        |
| 13.3      | Questions to Think About . . . . .   | 142        |
| <b>14</b> | <b>Cosmology According to Aristotle . . . . .</b>  | <b>143</b> |
| 14.1      | Two Worlds and Four Elements . . . . .   | 144        |
| 14.2      | The Marriage of Cosmology and Religion . . . . .   | 145        |
| 14.3      | Questions to Think About . . . . .   | 147        |
| <b>15</b> | <b>The Post-Ptolemy World . . . . .</b>  | <b>149</b> |
| 15.1      | Size of the Universe According to Ptolemy . . . . .  | 149        |
| 15.2      | Passing the Torch to the Islamic World . . . . .   | 151        |
| 15.3      | Not Everything Is Well in the Ptolemy Universe . . . . .                                       | 154        |
| 15.4      | A Thousand Year Bandwagon . . . . .  | 156        |
| 15.5      | Questions to Think About . . . . .   | 157        |
| <b>16</b> | <b>The Copernicus Revolution . . . . .</b>   | <b>159</b> |
| 16.1      | The Sun-Centered Universe . . . . .  | 161        |
| 16.2      | How Far Away Are the Planets? . . . . .  | 165        |
| 16.3      | Six Books on the Revolutions of the Heavenly Spheres . . . . .                                 | 166        |
| 16.4      | Questions to Think About . . . . .   | 168        |
| <b>17</b> | <b>Does the Earth Really Go Around the Sun? . . . . .</b>                                      | <b>169</b> |
| 17.1      | The Equivalency of the Geocentric and Heliocentric Models<br>in Their Simplest Forms . . . . . | 169        |
| 17.2      | New Explanations of Old Facts . . . . .  | 172        |

17.3 What Copernicus Really Accomplished . . . . . 174

17.4 Questions to Think About . . . . . 175

**18 The Legacy of Copernicus . . . . . 177**

18.1 A Larger Universe . . . . . 178

18.2 An Infinite Universe? . . . . . 179

18.3 No Place for Heaven . . . . . 179

18.4 Copernicus Meets Confucius . . . . . 182

18.5 What We Learned from Copernicus . . . . . 182

18.6 Questions to Think About . . . . . 183

**19 A New Star in the Sky . . . . . 185**

19.1 A Need for more Accurate Measurements . . . . . 187

19.2 A Geometric Universe . . . . . 189

19.3 The Role of the Sun . . . . . 192

19.4 The Way It Is, Rather than the Way It Should Be . . . . . 194

19.5 Motivation and Legacy . . . . . 195

19.6 Questions to Think About . . . . . 196

**20 The Imperfect Heaven . . . . . 197**

20.1 More Stars in the Sky . . . . . 197

20.2 Galileo’s Promotion of Copernicus . . . . . 198

20.3 How Things Move . . . . . 201

20.4 Galileo’s Explanation of a Moving Earth . . . . . 202

20.5 Questions to Think About . . . . . 203

**21 Unification of Heaven and Earth . . . . . 205**

21.1 The Moon Is Falling . . . . . 206

21.2 Prediction of Future Space Flights . . . . . 207

21.3 A Force Without Agent . . . . . 208

21.4 A Physical Universe . . . . . 209

21.5 Questions to Think About . . . . . 210

**22 Epilogue . . . . . 213**

**Appendix A: Longitudes and Latitudes of Cities Around the World . . . . . 217**

**Appendix B: Astronomical Measurements . . . . . 219**

**Appendix C: How Long Does It Take for the Sun to Rise and Set? . . . . . 221**

**Appendix D: How Long Is a Day? . . . . . 223**

**Appendix E: What Time Is Noon? . . . . . 225**

**Appendix F: How Far Can We See? . . . . . 227**

**Appendix G: Decrease of the Obliquity of the Ecliptic . . . . .** 229

**Appendix H: Synodic and Sidereal Periods . . . . .** 231

**Appendix I: Modern Evidence for the Roundness of the Earth . . . . .** 233

**Appendix J: Modern Evidence for the Rotation and Revolution  
of the Earth . . . . .** 235

**Appendix K: Escape from Earth . . . . .** 237

**Appendix L: Travel to the Planets . . . . .** 239

**Review Exercises . . . . .** 241

**Laboratory Exercises . . . . .** 249

**Glossary . . . . .** 255

**Further Reading . . . . .** 261

**Index . . . . .** 263
