Contents

Re-envisioning Computing Across Disciplines .......................... 1
Samuel B. Fee, Amanda M. Holland-Minkley
and Thomas E. Lombardi

Part I  The Case for Interdisciplinary Computing Education

Good (and Bad) Reasons to Teach All Students Computer Science ..................................................... 15
Colleen M. Lewis

Approaching Computer Science Education Through Making ........ 35
Michael Eisenberg

Computer Science and the Liberal Arts: Hidden Synergies and Boundless Opportunities .......................... 45
Gary R. Skuse, Daniel A. Walzer, Kathryn Tomasek,
Douglas Baldwin and Mark Bailey

Task-Driven Programming Pedagogy in the Digital Humanities .... 63
David J. Birnbaum and Alison Langmead

Macroanalysis in the Arts and Sciences ................................. 87
Thomas E. Lombardi

Part II  Pedagogical and Curricular Approaches

An Unnamed Intersection: Where Computing Meets Liberal Arts ............................................................. 103
Enid Arbelo Bryant

Adapting the Studio Based Learning Methodology to Computer Science Education ......................................... 119
Paula Alexandra Silva, Blanca J. Polo and Martha E. Crosby
The Curricular Soundtrack: Designing Interdisciplinary Music Technology Degrees Through Cognitive Apprenticeship and Situated Learning ................................. 143
Daniel A. Walzer

An Interdisciplinary Model for Liberal Arts Computing Curricula ................................................ 161
Amanda M. Holland-Minkley and Samuel B. Fee

Part III  Case Studies and Examples

The Development of a B.A. in Computer Science and Computational Thinking .......................... 187
Kathie A. Yerion, Robert L. Bryant and Shawn Bowers

Disciplinary Thinking, Computational Doing: Collaborating for Mutual Enrichment .................. 201
Valerie Barr

A Capstone Experience in Information Technology ................................................................. 217
William H. Thomas, Loren K. Rhodes and Gerald W. Kruse

Trial by a Many-Colored Flame: A Multi-disciplinary, Community-Centric Approach to Digital Media and Computing Education ........................................ 237
Adrienne Decker, Andrew Phelps and Christopher A. Egert

A GitHub Garage for a Digital Humanities Course ................................................................. 259
Elisa E. Beshero-Bondar and Rebecca J. Parker

Educators as Clinicians: Small Data for Education Research .............................................. 277
Thomas E. Lombardi and Amanda M. Holland-Minkley

Common Threads: Directions for Computing Education ...................................................... 295
Samuel B. Fee, Amanda M. Holland-Minkley and Thomas E. Lombardi

Author Index .......................................................................................................................... 305

Subject Index .......................................................................................................................... 307
New Directions for Computing Education
Embedding Computing Across Disciplines
Fee, S.B.; Holland-Minkley, A.; Lombardi, Th.E. (Eds.)
2017, XI, 308 p. 11 illus., Hardcover
ISBN: 978-3-319-54225-6
