## Contents

Verification of Networks of Smart Energy Systems over the Cloud ........... 1  
*Alessandro Abate*

Proving Properties on PWA Systems Using Copositive and  
Semidefinite Programming .................................................. 15  
*Assalé Adjé*

Formal Analysis of Engineering Systems Based on Signal-Flow-Graph  
Theory................................................................................. 31  
*Sidi Mohamed Beillahi, Umair Siddique, and Sofiène Tahar*

Computing a Correct and Tight Rounding Error Bound Using  
Rounding-to-Nearest ............................................................. 47  
*Sylvie Boldo*

Studying Sequences of Jumps in Hybrid Systems to Detect Zeno  
Phenomenon........................................................................... 52  
*Alexandre Chapoutot and Julien Alexandre dit Sandretto*

Toward a Standard Benchmark Format and Suite for Floating-Point  
Analysis.................................................................................. 63  
*Nasrine Damouche, Matthieu Martel, Pavel Panchekha, Chen Qiu,  
Alexander Sanchez-Stern, and Zachary Tatlock*

Falsification of Dynamical Systems – An Industrial Perspective ........... 78  
*Thomas Heinz*

Model Based Automatic Code Generation for Nonlinear Model Predictive  
Control .................................................................................. 85  
*Behzad Samadi*

Reduce the Complexity of the Polyhedron Minimization Using the Max  
Plus Pruning Method............................................................... 96  
*Yassamine Seladjji*

A Mode-Aware Contract Language for Reactive Systems ................. 105  
*Cesare Tinelli*

**Author Index** ...................................................................... 107
