## Contents

1 Musielak-Orlicz Hardy Spaces .................................................. 1  
  1.1 Growth Functions ................................................................. 1  
  1.2 Musielak-Orlicz Hardy Spaces ................................................ 16  
  1.3 Atomic Decompositions ....................................................... 19  
     1.3.1 Some Basic Properties of $H_m^p(\mathbb{R}^n)$ and $H_{at}^p(\mathbb{R}^n)$ .... 19  
     1.3.2 Calderón-Zygmund Decompositions .................................. 23  
     1.3.3 Atomic Decompositions of $H_m^p(\mathbb{R}^n)$ ......................... 29  
  1.4 Dual Spaces ........................................................................... 33  
  1.5 Class of Pointwise Multipliers for BMO(\mathbb{R}^n) ...................... 39  
  1.6 Finite Atomic Decompositions and Their Applications ............... 42  
  1.7 Notes and Further Results .................................................... 56  

2 Maximal Function Characterizations of Musielak-Orlicz Hardy Spaces .................................................. 59  
  2.1 Musielak-Orlicz Fefferman-Stein Vector-Valued Inequality .......... 59  
  2.2 Maximal Function Characterizations of $H_m^p(\mathbb{R}^n)$ .......... 65  
  2.3 Notes and Further Results .................................................... 69  

3 Littlewood-Paley Function and Molecular Characterizations of Musielak-Orlicz Hardy Spaces .................................................. 71  
  3.1 Musielak-Orlicz Tent Spaces .................................................. 71  
  3.2 Lusin Area Function and Molecular Characterizations of $H_m^p(\mathbb{R}^n)$ ............................................................. 80  
  3.3 Littlewood-Paley Function Characterizations of $H_m^p(\mathbb{R}^n)$ .... 97  
  3.4 Notes and Further Results .................................................... 105  

4 Riesz Transform Characterizations of Musielak-Orlicz Hardy Spaces .................................................. 109  
  4.1 First Order Riesz Transform Characterizations ........................ 109  
     4.1.1 Musielak-Orlicz Hardy Spaces $H_m^p(\mathbb{R}_{++}^{n+1})$ of Harmonic Functions ................................................................. 110
9 Musielak-Orlicz Besov-Type and Triebel-Lizorkin-Type Spaces ..... 329
  9.1 Musielak-Orlicz Besov-Triebel-Lizorkin-Type Spaces .......... 329
  9.2 Characterizations via Peetre Maximal Functions .......... 350
  9.3 The Space $\dot{A}^{\psi_1,\tau}_{q_1,q_2}(\mathbb{R}^n)$ with Some Special $\tau$ ..... 363
  9.4 Smooth Atomic and Molecular Characterizations .......... 368
  9.5 Boundedness of Fourier Multipliers on $\dot{A}^{\psi_1,\tau}_{q_1,q_2}(\mathbb{R}^n)$ .... 382
  9.6 Examples .................................................. 391
  9.7 Notes and Further Results .................................. 394

10 Paraproducts and Products of Functions in BMO($\mathbb{R}^n$) and $H^1(\mathbb{R}^n)$ Through Wavelets .............................................. 397
  10.1 The Space $H^{log}(\mathbb{R}^n)$ and A Generalized Hölder Inequality ...... 397
  10.2 Prerequisites on Wavelets .................................. 400
  10.3 Products of Functions in $H^1(\mathbb{R}^n)$ and BMO($\mathbb{R}^n$) .......... 409
  10.4 Div-Curl Lemma .......................................... 419
  10.5 Notes and Further Results .................................. 422

11 Bilinear Decompositions and Commutators
of Calderón-Zygmund Operators .......................................... 423
  11.1 The Class $K$ ........................................... 424
  11.2 Bilinear, Subbilinear Decompositions and Commutators .... 428
  11.3 The Space $H^1_b(\mathbb{R}^n)$ ................................ 433
  11.4 Boundedness of Commutators on Hardy Spaces .......... 438
  11.5 Commutators of Fractional Integrals ......................... 451
  11.6 Notes and Further Results .................................. 452

References ............................................................. 453

Index ................................................................. 463
