

# Contents

<b>1</b>	<b>Introduction: Physico-Chemical Experiments as the Key to Diamond Genesis Problems</b> . . . . .	1
1.1	Diamond-Hosted Inclusions as a “Window” into the Mantle Diamond-Parental Media . . . . .	1
1.2	General Composition of Diamond-Producing System from Syngenetic Inclusions. . . . .	3
1.3	Principal Problems in Genesis of Diamond and Associated Phases. . . . .	4
1.4	Physico-Chemical Experiments in Study of Diamond Origin . . . . .	4
1.5	Early Assumptions for Diamond-Parental Medium. . . . .	6
<b>2</b>	<b>Mantle Rocks and Diamond-Associated Phases: Role in Diamond Origin</b> . . . . .	7
2.1	Xenoliths of Native Upper-Mantle Rocks in Kimberlites . . . . .	8
2.2	Transition-Zone and Lower-Mantle Petrology from High-Pressure Experiments. . . . .	11
2.3	Primary Mineral Inclusions in Upper-Mantle Diamonds. . . . .	13
2.4	Primary Mineral Inclusions in Transition-Zone and Lower-Mantle Diamonds . . . . .	16
2.5	Xenoliths of Diamond-Bearing Rocks in Kimberlites. . . . .	20
	References. . . . .	23
<b>3</b>	<b>Strongly Compressed Carbonate Systems in Diamond Genesis</b> . . . . .	31
3.1	Congruent Melting of Carbonate Minerals at High Pressure. . . . .	32
3.2	Melting of Multicomponent Carbonate Systems as to Mantle Geothermal Regime . . . . .	38
3.3	Complete Liquid Miscibility in Silicate-(±Oxide)-Carbonate Systems . . . . .	41

3.4	Diamond Solubility and Carbon-Oversaturated Carbonate-Bearing Melts-Solutions. . . . .	42
	References. . . . .	49
<b>4</b>	<b>Upper-Mantle Diamond-Parental Systems in Physico-Chemical Experiment . . . . .</b>	<b>55</b>
4.1	Syngensis Criterion for Parental Melts of Diamonds and Associated Minerals. . . . .	56
4.2	Concentration Barrier of Diamond Nucleation . . . . .	63
4.3	Physico-Chemical Mechanisms of Syngensis of Diamonds and Associated Phases . . . . .	67
4.4	Xenogenetic Upper-Mantle Minerals in Diamond-Producing Processes . . . . .	74
4.5	Principles of Genetic Classification of Syngenetic Inclusions in Upper-Mantle Diamonds . . . . .	81
	References. . . . .	83
<b>5</b>	<b>Physico-Chemical Features of Lower-Mantle Diamond-Parental Systems . . . . .</b>	<b>87</b>
5.1	Paradoxical Assemblage of Stishovite and Oxide Inclusions in Lower-Mantle Diamonds . . . . .	87
5.2	Physico-Chemical Mechanism of Stishovite Paradox by Experimental Evidence . . . . .	89
5.3	Parental Melts and Genetic Mechanisms for Lower-Mantle Diamonds and Inclusions . . . . .	94
5.4	Some Remarks on Genetic Classification of Syngenetic Inclusions in Lower-Mantle Diamonds . . . . .	96
	References. . . . .	96
<b>6</b>	<b>Ultrabasic-Basic Fractionating of Mantle Magmas and Diamond-Parental Melts . . . . .</b>	<b>99</b>
6.1	Peritectic Reactions of Orthopyroxene and Olivine in Upper-Mantle Magma Evolution . . . . .	99
6.2	Olivine Garnetization and Evolution of Upper-Mantle Diamond-Parental Melts . . . . .	102
6.3	Fractionary Syngensis Diagram for Upper-Mantle Diamonds and Associated Phases . . . . .	107
6.4	Fractionary Evolution of Lower-Mantle Magmas and Diamond-Parental Melts. . . . .	110
	References. . . . .	112

- 7 Mantle-Carbonatite Conception of Diamond and Associated Phases Genesis . . . . . 115**
- 7.1 Generalized Composition Diagram of Upper-Mantle Diamond-Parental Medium . . . . . 115
- 7.2 Generalized Composition Diagrams of Lower-Mantle and Transition-Zone Diamond-Parental Media . . . . . 118
- 7.3 Basics of the Mantle-Carbonatite Theory of Diamond Genesis . . . . . 121
- 7.4 Experimental TE Partition Coefficients for Diamond-Parental Systems . . . . . 123
- 7.5 Formation and Evolution of the Mantle Reservoirs of Silicate-Oxide-Carbonate-Carbon Melts Parental for Diamonds and Associated Phases . . . . . 129

Genesis of Diamonds and Associated Phases

Litvin, Y.A.

2017, XIV, 137 p. 45 illus., 4 illus. in color., Hardcover

ISBN: 978-3-319-54542-4
