Part I Compact Shelving of the Projects

1 Introduction	3
Martin Bossert	
1.1 History of InKoMBio	4
1.2 List of Funded Projects	5
1.3 Meetings and Workshops	6
1.4 MicroRNA as an Integral Part of Cell Communication: Regularized Target Prediction and Network Prediction	7
1.5 Information Flow in a Mammalian Signal Transduction Pathway	13
1.6 Information-Theoretic Concepts to Unravel Cell-Cell Communication	17
1.7 Finding New Overlapping Genes and Their Theory (FOG-Theory)	19
1.8 The Evolutive Adaptation of the Transcriptional Information Transmission in Escherichia Coli	27
1.9 Improving the Reliability of RNA-Seq: Approaching Single-Cell Transcriptomics to Explore Individuality in Bacteria	30
1.10 Morning and Evening Peaking Rhythmic Genes Are Regulated by Distinct Transcription Factors in <i>Neurospora crassa</i>	33
1.11 Evolution of the AMP-Activated Protein Kinase Controlled Gene Regulatory Network	37
1.12 Semiotic Structures and Meaningful Information in Biological Systems	43
1.13 Information Transfer in the Mammalian Circadian Clock	50
1.14 The DNA from a Coding Perspective	55
1.15 Application of Methods from Information Theory in Protein- Interaction Analysis	61

1.16	Identification of Causal Dependences in Gene Regulatory Networks Using Algorithmic Information Theory	64
1.17	Molekulare Mechanismen der Datenintegration und Entscheidung Zur Einleitung der Reproduktiven Phase in Pflanzen	68
1.18	An Information-Theoretic Approach to Stimulus Processing in the Olfactory System	70
1.19	RNA Structures as Processing Signals	73
	References.	77

Part II Detailed Descriptions

2	MicroRNA as an Integral Part of Cell Communication: Regularized Target Prediction and Network Prediction	85
	Rolf Backofen, Fabrizio Costa, Fabian Theis, Carsten Marr, Martin Preusse, Claude Becker, Sita Saunders, Klaus Palme and Oleksandr Dovzhenko	
2.1	Conclusion	87
2.1.1	Summary of the Essential Results	87
2.1.2	Possible Future Work	88
2.2	Working and Results Report.	88
2.2.1	Starting Point.	88
2.2.2	Work Performed	89
2.2.3	Future Work	97
2.2.4	Interdisciplinary Development	98
2.2.5	Educational Qualification of Researchers.	98
	Publications Within the Project.	99
	Other Publications	99
3	Information Flow in a Mammalian Signal Transduction Pathway	101
	Manuela Benary, Ilias Nolis, Nils Blüthgen and Alexander Loewer	
3.1	Conclusion	103
3.1.1	Summary of the Essential Results	103
3.1.2	Possible Future Work	103
3.2	Working and Results Report.	104
3.2.1	Starting Point.	104
3.2.2	Work Performed	105
3.2.3	Interdisciplinary Development	112
3.2.4	Educational Qualification of Researchers.	113
	Publications Within the Project.	113
	Other Publications	113

4	Information Theoretic Concepts to Unravel Cell–Cell Communication	115
	Nikola Müller, Steffen Sass, Barbara Offermann, Amit Singh, Steffen Knauer, Andreas Schüttler, Juliana Nascimento Minardi, Fabian Theis, Hauke Busch and Melanie Boerries	
4.1	Conclusion	117
4.1.1	Summary of the Essential Results	117
4.1.2	Possible Future Work	118
4.2	Working and Results Report.	118
4.2.1	Starting Point.	118
4.2.2	Work Performed	120
4.2.3	Future Work	129
4.2.4	Interdisciplinary Development	132
4.2.5	Educational Qualification of Researchers.	132
	Publications Within the Project.	132
	Other Publications	133
5	Finding New Overlapping Genes and Their Theory (FOG Theory)	137
	Siegfried Scherer, Klaus Neuhaus, Martin Bossert, Katharina Mir, Daniel Keim and Svenja Simon	
5.1	Conclusion	139
5.1.1	Summary of the Essential Results	139
5.1.2	Possible Future Work	140
5.2	Working and Results Report.	141
5.2.1	Starting Point.	141
5.2.2	Work Performed	142
5.2.3	Future Work	154
5.2.4	Interdisciplinary Development	155
5.2.5	Educational Qualification of Researchers.	156
	Publications Within the Project.	157
	Other Publications	158
6	The Evolutive Adaptation of the Transcriptional Information Transmission in <i>Escherichia Coli</i>	161
	Ronny Feuer, Katrin Gottlieb, Johannes Klotz, Joachim von Wulffen, Martin Bossert, Georg Sprenger and Oliver Sawodny	
6.1	Conclusion	162
6.1.1	Summary of the Essential Results	162
6.1.2	Possible Future Work	163
6.2	Working and Results Report.	163
6.2.1	Starting Point.	164

6.2.2	Work Performed	165
6.2.2.1	Adaptive Evolution and Chemostat Conditions	165
6.2.2.2	Adaptive Evolution of Metabolically Impaired Strains	167
6.2.2.3	Adaptive Evolution of Transcriptional Network	169
6.2.2.4	Theoretical Investigation of Transcriptional Regulatory Network	172
6.2.2.5	Construction of Cooperating Strains	175
6.2.3	Future Work	176
6.2.4	Interdisciplinary Development	177
6.2.5	Educational Qualification of Researchers	177
	Other Publications	178
7	Improving the Reliability of RNA-seq: Approaching Single-Cell Transcriptomics To Explore Individuality in Bacteria	181
	Martin Bossert, David Kracht, Siegfried Scherer, Richard Landstorfer and Klaus Neuhaus	
7.1	Conclusion	182
7.1.1	Summary of the Essential Results	182
7.1.2	Possible Future Work	184
7.2	Working and Results Report	184
7.2.1	Starting Point	184
7.2.2	Work Performed	187
7.2.3	Future Work	194
7.2.4	Interdisciplinary Development	195
7.2.5	Educational Qualification of Researchers	195
	Publications Within the Project	196
	Other Publications	196
8	Morning and Evening Peaking Rhythmic Genes are Regulated by Distinct Transcription Factors in <i>Neurospora crassa</i>	199
	Robert Lehmann, Hanspeter Herzel, Michael Brunner, Gencer Sancar, Cigdem Sancar and Bharath Ananthasubramaniam	
8.1	Conclusion	200
8.1.1	Summary of the Essential Results	200
8.1.2	Possible Future Work	201
8.2	Working and Results Report	201
8.2.1	Starting Point	201
8.2.2	Work Performed	202
8.2.3	Conclusion	209
8.2.4	Educational Qualification of Researchers	209
	Other Publications	209

9 Evolution of the AMP-Activated Protein Kinase Controlled Gene Regulatory Network 211
 Constance Mehlgarten, Ralf Eggeling, André Gohr, Markus Bönn, Ioana Lemnian, Martin Netting, Katharina Strödecke, Carolin Kleindienst, Ivo Grosse and Karin D. Breunig

9.1 Conclusion 213
 9.1.1 Summary of the Essential Results 213
 9.1.2 Possible Future Work 214

9.2 Working and Results Report. 214
 9.2.1 Starting Point. 214
 9.2.2 Work Performed 215
 9.2.3 Future Work 235
 9.2.4 Interdisciplinary Development 235
 9.2.5 Educational Qualification of Researchers. 236

Publications Within the Project. 236
 Other Publications 237

10 Semiotic Structures and Meaningful Information in Biological Systems. 239
 Stephan Diekmann, Peter Dittrich and Bashar Ibrahim

10.1 Conclusion 240
 10.1.1 Summary of the Essential Results 240
 10.1.2 Possible Future Work 241

10.2 Working and Results Report. 242
 10.2.1 Starting Point. 242
 10.2.2 Work Performed (Main Results) 242
 10.2.3 Future Work 245
 10.2.4 Interdisciplinary Development 245
 10.2.5 Educational Qualification of Researchers. 245

Publications Within the Project. 245
 Other Publication 246

11 Information Transfer in the Mammalian Circadian Clock 247
 Adrián E. Granada, Hanspeter Herzog, Achim Kramer and Ute Abraham

11.1 Conclusion 248
 11.1.1 Summary of the Essential Results 248
 11.1.2 Possible Future Work 249

11.2 Working and Result Report 249
 11.2.1 Introduction. 249
 11.2.2 Methods 250
 11.2.3 Results. 252

- 11.2.4 Conclusions 255
- 11.2.5 Educational Qualification of Researchers 256
- Other Publications 257
- 12 The DNA from a Coding Perspective 259**
 Werner Henkel, Georgi Muskhelishvili, Dawit Nigatu
 and Patrick Sobetzko
- 12.1 Conclusion 260
 - 12.1.1 Summary of the Essential Results 260
- 12.2 Working and Results Report 263
 - 12.2.1 Starting Point 263
 - 12.2.2 Work Performed 264
 - 12.2.3 Future Work 289
 - 12.2.4 Interdisciplinary Development 289
 - 12.2.5 Educational Qualification of Researchers 290
- Publications within the Project 290
- Other Publications 291
- 13 Application of Methods from Information Theory
 in Protein-Interaction Analysis 293**
 Arno G. Stefani, Achim Sandmann, Andreas Burkovski,
 Johannes B. Huber, Heinrich Sticht and Christophe Jardin
- 13.1 Conclusion 295
 - 13.1.1 Summary of the Essential Results 295
 - 13.1.2 Possible Future Work 295
- 13.2 Working and Results Report 295
 - 13.2.1 Starting Point 295
 - 13.2.2 Work Performed 296
 - 13.2.3 Future Work 311
 - 13.2.4 Interdisciplinary Development 311
 - 13.2.5 Educational Qualification of Researchers 311
- Publications within the Project 312
- Other Publications 312
- 14 Identification of Causal Dependences in Gene Regulatory
 Networks Using Algorithmic Information Theory 315**
 Jan Lohmann and Dominik Janzing
- 14.1 Conclusion 316
 - 14.1.1 Summary of the Essential Results 316
 - 14.1.2 Possible Future Work 317
- 14.2 Working and Results Report 317
 - 14.2.1 Starting Point 317
 - 14.2.2 Work Performed 318
 - 14.2.3 Future Work 327

14.2.4	Interdisciplinary Development	328
14.2.5	Educational Qualification of Researchers	328
	Publications Within the Project	328
	Other Publications	329
15	Molekulare Mechanismen der Datenintegration und Entscheidung zur Einleitung der Reproduktiven Phase in Pflanzen	331
	Markus Kollmann and Franziska Turck	
15.1	Conclusion	332
15.1.1	Summary of the Essential Results	332
15.2	Working and Results Report	332
15.2.1	Starting Point	332
15.2.2	Work Performed	333
15.2.3	Future Work	338
15.2.4	Interdisciplinary Development	339
15.2.5	Educational Qualification of Researchers	339
16	An Information Theoretic Approach to Stimulus Processing in the Olfactory System	341
	Martijn Arts, Rudolf Mathar and Marc Spehr	
16.1	Conclusion	342
16.1.1	Summary of the Essential Results	342
16.1.2	Possible Future Work	343
16.2	Working and Results Report	344
16.2.1	Starting Point	344
16.2.2	Work Performed	350
16.2.3	Future Work	360
16.2.4	Interdisciplinary Development	361
16.2.5	Educational Qualification of Researchers	362
	Publications Within the Project	362
	Other Publications	362
17	RNA Structures as Processing Signals	367
	Uwe Schöning, Thomas Schnattinger, Hans A. Kestler, Britta Stoll and Anita Marchfelder	
17.1	Conclusion	368
17.1.1	Summary of the Essential Results	368
17.1.2	Possible Future Work	369
17.2	Working and Results Report	369
17.2.1	Starting Point	369
17.2.2	Work Performed	370
17.2.2.1	Unpublished Results	370
17.2.2.2	Published Results	371
17.2.3	Future Work	372

17.2.4 Interdisciplinary Development	372
17.2.5 Educational Qualification of Researchers	373
Publications Within the Project	373
Other Publications	374

Information- and Communication Theory in Molecular
Biology

Bossert, M. (Ed.)

2018, XVI, 374 p. 118 illus., 95 illus. in color., Hardcover

ISBN: 978-3-319-54728-2
