## Contents

1. **Lateral Vibration Attenuation of a Beam with Piezo-Elastic Supports Subject to Varying Axial Tensile and Compressive Loads**
   Benedict Götz, Roland Platz, and Tobias Melz
   
2. **Correlation of Non-contact Full-Field Dynamic Strain Measurements with Finite Element Predictions**
   Ibrahim A. Sever, Martyn Maguire, and Jose V. Garcia
   
3. **Nonlinear Prediction Surfaces for Estimating the Structural Response of Naval Vessels**
   Alysson Mondoro, Mohamed Soliman, and Dan M. Frangopol
   
4. **A Case Study in Predictive Modeling Beyond the Calibration Domain**
   Philip Graybill, Eyob Tarekegn, Ian Tomkinson, Kendra Van Buren, François Hemez, and Scott Cogan
   
5. **A Brief Overview of Code and Solution Verification in Numerical Simulation**
   François Hemez
   
6. **Robust Optimization of Shunted Piezoelectric Transducers for Vibration Attenuation Considering Different Values of Electromechanical Coupling**
   Anja Kuttich, Benedict Götz, and Stefan Ulbrich
   
7. **Parameter Estimation and Uncertainty Quantification of a Subframe with Mass Loaded Bushings**
   Mladen Gibanica and Thomas J.S. Abrahamsson
   
8. **Vibroacoustic Modelling of Piano Soundboards through Analytical Approaches in Frequency and Time Domains**
   B. Trévisan, K. Ege, and B. Laulagnet
   
9. **Combined Experimental and Numerical Investigation of Vibro-Mechanical Properties of Varnished Wood for Stringed Instruments**
   Sarah Louise Lämmlein, David Mannes, Francis Willis Mathew Schwarze, Ingo Burgert, and Marjan Sedighi Gilani
   
10. **Towards Robust Sustainable System Design: An Engineering Inspired Approach**
    Mario Holl and Peter F. Pelz
    
11. **Linear Parameter-Varying (LPV) Buckling Control of an Imperfect Beam-Column Subject to Time-Varying Axial Loads**
    Maximilian Schaeffner and Roland Platz
    
12. **Quantification and Evaluation of Uncertainty in the Mathematical Modelling of a Suspension Strut Using Bayesian Model Validation Approach**
    Shashidhar Mallapur and Roland Platz
    
    Zilong Wang and Young-Jin Cha

---

vii
14 Global Load Path Adaption in a Simple Kinematic Load-Bearing Structure to Compensate Uncertainty of Misalignment Due to Changing Stiffness Conditions of the Structure’s Supports ............. 133
Christopher M. Gehb, Roland Platz, and Tobias Melz

15 Assessment of Uncertainty Quantification of Bolted Joint Performance ........................................ 145
Nedzad Imamovic and Mohammed Hanafi

16 Sensitivity Analysis and Bayesian Calibration for 2014 Sandia Verification and Validation Challenge Problem ................................................................. 159
Ming Zhan, Qin-tao Guo, Lin Yue, and Bao-qiang Zhang

17 Non-probabilistic Uncertainty Evaluation in the Concept Phase for Airplane Landing Gear Design ........ 161
Roland Platz and Benedict Götz

18 Modular Analysis of Complex Systems with Numerically Described Multidimensional Probability Distributions .............................................................................................................. 171
J. Stefan Bald

19 Methods for Component Mode Synthesis Model Generation for Uncertainty Quantification ................. 177
A.R. Brink, D.G. Tipton, J.E. Freymiller, and B.L. Stevens

20 Parameterization of Large Variability Using the Hyper-Dual Meta-model ........................................... 189
Matthew S. Bonney and Daniel C. Kammer

21 Similitude Analysis of the Frequency Response Function for Scaled Structures ..................................... 209
Mohamad Eydani Asl, Christopher Niezrecki, James Sherwood, and Peter Avitabile

22 MPUQ-b: Bootstrapping Based Modal Parameter Uncertainty Quantification—Fundamental Principles ... 219
S. Chauhan and S.I. Ahmed

23 MPUQ-b: Bootstrapping Based Modal Parameter Uncertainty Quantification—Methodology and Application .............................................................................................................. 239
S. Chauhan

24 Evaluation of Truck-Induced Vibrations for a Multi-Beam Highway Bridge ........................................ 255
Kirk A. Grimmelsman and John B. Prader

25 Innovations and Info-Gaps: An Overview ......................................................................................... 263
Yakov Ben-Haim and Scott Cogan

26 Bayesian Optimal Experimental Design Using Asymptotic Approximations ........................................ 273
Costas Argyris and Costas Papadimitriou

27 Surrogate-Based Approach to Calculate the Bayes Factor ................................................................. 277
Ramin Madarshahian and Juan M. Caicedo

28 Vibrational Model Updating of Electric Motor Stator for Vibration and Noise Prediction .................. 283
M. Aguirre, I. Uresti, F. Martinez, G. Fernandez, and S. Cogan

29 A Comparison of Computer-Vision-Based Structural Dynamics Characterizations .............................. 295
Aral Sarrafi, Peyman Poozesh, and Zhu Mao

30 Sequential Gauss-Newton MCMC Algorithm for High-Dimensional Bayesian Model Updating ........... 303

31 Model Calibration with Big Data ........................................................................................................... 315
Guowei Cai and Sankaran Mahadevan

E.S. Doughty and N. Sarigul-Klijn

33 Structural Damage Detection Using Convolutional Neural Networks ............................................... 331
Nur Sila Gulgec, Martin Takáč, and Shamim N. Pakzad
34 Experimental Model Validation of an Aero-Engine Casing Assembly ............................................ 339
D. Di Maio, G. Ramakrishnan, and Y. Rajasagaran

35 Damage Detection in Railway Bridges Under Moving Train Load ................................................ 349
Riya C. George, Johanna Posey, Aakash Gupta, Suparno Mukhopadhyay, and Sudib K. Mishra

36 Multi-Fidelity Calibration of Input-Dependent Model Parameters ............................................... 355
G.N. Absi and S. Mahadevan

37 Empirically Improving Model Adequacy in Scientific Computing ................................................ 363
Sez Atamturktur, Garrison N. Stevens, and D. Andrew Brown

R. Viala, V. Placet, and S. Cogan

39 Experimental Examples for Identification of Structural Systems Using Degree of Freedom-Based Reduction Method ................................................................. 375
Heejun Sung, Seongmin Chang, and Maenghyo Cho
Model Validation and Uncertainty Quantification,
Volume 3
Proceedings of the 35th IMAC, A Conference and
Exposition on Structural Dynamics 2017
Barthorpe, R.; Platz, R.; Lopez, I.; Moaveni, B.;
Papadimitriou, C. (Eds.)
2017, IX, 378 p. 239 illus., 184 illus. in color., Hardcover
ISBN: 978-3-319-54857-9
