Contents

A Computational Study of Neighborhood Operators for Job-Shop Scheduling Problems with Regular Objectives ........................................ 1
   Hayfa Hammami and Thomas Stützle

A Genetic Algorithm for Multi-component Optimization Problems:
The Case of the Travelling Thief Problem ........................................ 18
   Daniel K.S. Vieira, Gustavo L. Soares, João A. Vasconcelos,
   and Marcus H.S. Mendes

A Hybrid Feature Selection Algorithm Based on Large Neighborhood Search ................................................................. 30
   Gelareh Taghizadeh and Nysret Musliu

A Memetic Algorithm to Maximise the Employee Substitutability in Personnel Shift Scheduling ................................................. 44
   Jonas Ingels and Broos Maenhout

Construct, Merge, Solve and Adapt Versus Large Neighborhood Search for Solving the Multi-dimensional Knapsack Problem: Which One Works Better When? ............................................................. 60
   Evelia Lizárraga, María J. Blesa, and Christian Blum

Decomposing SAT Instances with Pseudo Backbones ........................ 75
   Wenxiang Chen and Darrell Whitley

Efficient Consideration of Soft Time Windows in a Large Neighborhood Search for the Districting and Routing Problem for Security Control ................................. 91
   Bong-Min Kim, Christian Kloimüller, and Günther R. Raidl

Estimation of Distribution Algorithms for the Firefighter Problem ......... 108
   Krzysztof Michalak

LCS-Based Selective Route Exchange Crossover for the Pickup and Delivery Problem with Time Windows ........................................ 124
   Mirosław Blocho and Jakub Nalepa

Multi-rendezvous Spacecraft Trajectory Optimization with Beam P-ACO .............................................................................. 141
   Luís F. Simões, Dario Izzo, Evert Haasdijk, and A.E. Eiben

Optimizing Charging Station Locations for Electric Car-Sharing Systems ............................................................................. 157
   Benjamin Biesinger, Bin Hu, Martin Stubenschrott, Ulrike Ritzinger, and Matthias Prandtstetter
