Contents

Algorithmic Songwriting with ALYSIA ......................................................... 1
Margareta Ackerman and David Loker

On Symmetry, Aesthetics and Quantifying Symmetrical Complexity ........... 17
Mohammad Majid al-Rifaie, Anna Ursyn, Robert Zimmer, and Mohammad Ali Javaheri Javid

Towards Polyphony Reconstruction Using Multidimensional Multiple Sequence Alignment ................................................................. 33
Dimitrios Bountouridis, Frans Wiering, Dan Brown, and Remco C. Veltkamp

Melody Retrieval and Classification Using Biologically-Inspired Techniques ................................................................................................. 49
Dimitrios Bountouridis, Dan Brown, Hendrik Vincent Koops, Frans Wiering, and Remco C. Veltkamp

Evolved Aesthetic Analogies to Improve Artistic Experience ....................... 65
Aidan Breen, Colm O’Riordan, and Jerome Sheahan

Deep Artificial Composer: A Creative Neural Network Model for Automated Melody Generation ................................................................. 81
Florian Colombo, Alexander Seeholzer, and Wulfram Gerstner

A Kind of Bio-inspired Learning of mUsic stylE .......................................... 97
Roberto De Prisco, Delfina Malandrino, Gianluca Zaccagnino, Rocco Zaccagnino, and Rosalba Zizza

Using Autonomous Agents to Improvise Music Compositions in Real-Time . . 114
Patrick Hutchings and Jon McCormack

Generating Polyphonic Music Using Tied Parallel Networks ...................... 128
Daniel D. Johnson

Mixed-Initiative Creative Drawing with webIconoscope ............................. 144
Antonios Liapis

Clustering Agents for the Evolution of Autonomous Musical Fitness ............. 160
Róisín Loughran and Michael O’Neill

EvoFashion: Customising Fashion Through Evolution ................................ 176
Nuno Lourenço, Filipe Assunção, Catarina Maçãs, and Penousal Machado
A Swarm Environment for Experimental Performance and Improvisation . . . . . . . . 190
  Frank Mauceri and Stephen M. Majercik

Niche Constructing Drawing Robots ........................................... 201
  Jon McCormack

Automated Shape Design by Grammatical Evolution .................................. 217
  Manuel Muehlbauer, Jane Burry, and Andy Song

Evolutionary Image Transition Using Random Walks ................................ 230
  Aneta Neumann, Bradley Alexander, and Frank Neumann

Evaluation Rules for Evolutionary Generation of Drum Patterns in Jazz Solos .............................................................. 246
  Fabian Ostermann, Igor Vatolkin, and Günter Rudolph

Assessing Augmented Creativity: Putting a Lovelace Machine for Interactive Title Generation Through a Human Creativity Test ............. 262
  Yasser S. Arenas Rebolledo, Peter van der Putten, and Maarten H. Lamers

Play it Again: Evolved Audio Effects and Synthesizer Programming ......... 275
  Benjamin D. Smith

Fashion Design Aid System with Application of Interactive Genetic Algorithms .............................................................. 289
  Nazanin Alsadat Tabatabaei Anaraki

Generalisation Performance of Western Instrument Recognition Models in Polyphonic Mixtures with Ethnic Samples ............................... 304
  Igor Vatolkin

Exploring the *Exactitudes* Portrait Series with Restricted Boltzmann Machines .............................................................. 321
  Sam D. Verkoelen, Maarten H. Lamers, and Peter van der Putten

Evolving Mondrian-Style Artworks .............................................. 338
  Miri Weiss Cohen, Leticia Cherchiglia, and Rachel Costa

Predicting Expressive Bow Controls for Violin and Viola ..................... 354
  Lauren Jane Yu and Andrea Pohoreckyj Danyluk

Author Index ................................................................. 371
Computational Intelligence in Music, Sound, Art and Design
Correia, J.; Ciesielski, V.; Liapis, A. (Eds.)
2017, X, 371 p. 169 illus., Softcover
ISBN: 978-3-319-55749-6
