

Contents

1	Instead of Introduction	1
Part I Internal Variables in Thermomechanics		
2	Introduction	21
3	Thermomechanical Single Internal Variable Theory	35
4	Dual Internal Variables	59
Part II Dispersive Elastic Waves in One Dimension		
5	Internal Variables and Microinertia	75
6	Dispersive Elastic Waves	85
7	One-Dimensional Microelasticity	99
8	Influence of Nonlinearity	113
Part III Thermal Effects		
9	The Role of Heterogeneity in Heat Pulse Propagation in a Solid with Inner Structure	123
10	Heat Conduction in Microstructured Solids	131
11	One-Dimensional Thermoelasticity with Dual Internal Variables	147
12	Influence of Microstructure on Thermoelastic Wave Propagation	163

Part IV Weakly Nonlocal Thermoelasticity for Microstructured Solids

13 Microdeformation and Microtemperature 175
Summary 191
Appendix A: Sketch of Thermostatistics 193
Appendix B: Finite-Volume Numerical Algorithm 201
Index 219
