

Contents

1	Introduction	1
1.1	Energetic Use of the Subsurface	1
1.2	Geotechnical Use of Rock Salt	2
1.3	Gas Storage in Salt Caverns	3
1.4	Scope and Structure of This Tutorial	5
2	Basics of Thermomechanics and Inelasticity	7
2.1	Governing Equations	7
2.2	Finite Element Implementation and the Kelvin Mapping	10
2.3	Integration of Inelastic Constitutive Models	13
2.4	Thermo-Mechanical Coupling in OGS	16
2.5	Constitutive Models	17
3	Simulation of Laboratory Tests	23
3.1	Non-isothermal Triaxial Creep Test	23
3.2	Triaxial Test with Plasticity	35
4	Simulating Gas Storage in Salt Caverns	45
4.1	Scenario	45
4.2	General Set-Up	47
4.3	Isothermal Model Set-Up	53
4.4	Non-isothermal Model Set-Up	56
4.5	Comparison of Results	57
5	Closing Remarks	63
	References	65
	Index	69

Computational Geotechnics

Storage of Energy Carriers

Nagel, Th.; Böttcher, N.; Görke, U.-J.; Kolditz, O.

2017, XII, 70 p. 29 illus., 26 illus. in color., Softcover

ISBN: 978-3-319-56960-4
