

# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	Motivations .....	1
1.1.1	Wireless Networks: Trends and Challenges .....	1
1.1.2	VWN: Requirements .....	3
1.1.3	VWN: User-Association and Resource-Allocation Issues...	4
1.2	Emerging Technologies: A Brief Overview .....	5
1.2.1	User-Association and Resource-Allocation .....	5
1.2.2	Cloud-Radio Access Network (C-RAN) .....	6
1.2.3	Massive MIMO .....	7
1.2.4	Non-orthogonal Multiple Access (NOMA) .....	8
1.3	Structure of This Brief .....	9
	References .....	10
<b>2</b>	<b>Bandwidth-Efficient Joint User-Association and Resource-Allocation in Multi-Cell VWN</b> .....	13
2.1	Introduction .....	13
2.2	System Model and Problem Formulation .....	15
2.3	Proposed Two-Level Iterative Algorithm.....	17
2.3.1	User-Association Problem .....	18
2.3.2	Power-Allocation Problem .....	22
2.4	Numerical Results and Discussions .....	24
2.4.1	System Parameters .....	24
2.4.2	Reference Resource Allocation .....	24
2.4.3	Total Rate and Rate-Outage Evaluation .....	25
2.4.4	Coverage Analysis .....	27
2.4.5	Optimality Gap Study .....	32
2.4.6	Computational Complexity and Convergence Analysis .....	32
2.5	Concluding Remarks .....	33
	References .....	35

<b>3</b>	<b>Power-Efficient Joint User-Association and Resource-Allocation in Multi-Cell VWN</b> .....	37
3.1	Introduction .....	37
3.2	System Model and Problem Formulation .....	38
3.3	Proposed Algorithm .....	40
3.3.1	User-Association Problem .....	40
3.3.2	Power Minimization Problem .....	43
3.4	Numerical Results and Discussions .....	44
3.5	Concluding Remarks .....	46
	References .....	47
<b>4</b>	<b>Uplink Resource-Allocation in VWN with Massive-MIMO and Dynamic Pilot-Duration</b> .....	49
4.1	Introduction .....	49
4.2	System Model and Problem Formulation .....	50
4.3	Iterative Algorithm for Joint Resource and Adaptive Pilot Duration Allocation .....	55
4.4	Numerical Results and Discussions .....	58
4.5	Concluding Remarks .....	61
	References .....	61
<b>5</b>	<b>User-Association and Resource-Allocation in a C-RAN-Based VWN</b> .....	63
5.1	Introduction .....	63
5.2	System Model .....	65
5.3	Proposed Two-Level Iterative Algorithm .....	70
5.3.1	Association Algorithm .....	70
5.3.2	RRH Adjusting Algorithm .....	74
5.4	Numerical Results and Discussions .....	77
5.4.1	System Parameters .....	77
5.4.2	Performance Analysis .....	77
5.5	Concluding Remarks .....	80
	References .....	81
<b>6</b>	<b>Resource Allocation in a NOMA-Based VWN</b> .....	83
6.1	Introduction .....	83
6.2	System Model .....	84
6.2.1	NOMA .....	85
6.2.2	OFDMA .....	86
6.3	Proposed Algorithm .....	87
6.3.1	Iterative Algorithm for NOMA-Based Resource Allocation .....	88
6.3.2	Dual Approach for OFDMA-Based Resource Allocation ...	89
6.4	Numerical Results and Discussions .....	91
6.5	Concluding Remarks .....	94
	References .....	94

- 7 Conclusion** ..... 95
  - 7.1 Summary ..... 95
  - 7.2 Potential Future Works ..... 96
  
- Appendix Brief Notes on Geometric Programming  
and Successive Convex Approximation** ..... 99
  - A.1 Introduction to Geometric Programming ..... 99
    - A.1.1 Monomial and Posynomial Function ..... 99
    - A.1.2 Arithmetic-Geometric Mean Approximation ..... 99
    - A.1.3 Geometric Programming ..... 100
    - A.1.4 Complementary Geometric Programming ..... 100
  - A.2 Multi-Block Successive Convex Approximation ..... 102
- References ..... 103
