

Contents

Introduction	1
1 Basics of thermodynamics	3
1.1 Structure of matter	3
1.2 Heat and temperature	4
1.3 Thermal expansion	6
1.4 Ideal gas law	7
1.4.1 Dalton's law	9
1.5 First law of thermodynamics	10
1.6 Specific heat capacity	13
1.7 Phase transitions	16
2 Heat transfer	21
2.1 Introduction	21
2.2 Conduction	21
2.2.1 Fourier's law	22
2.2.2 Thermal resistance of multiple layers	23
2.2.3 Multidimensional conduction	26
2.2.4 Dynamic conduction	28
2.2.5 Half-space material with the harmonic change of temperature	32
2.2.6 Contact of two materials at different temperatures	35
2.3 Convection	37
2.3.1 Newton's law of cooling	38
2.4 Radiation	41
2.4.1 Grey bodies	44
2.4.2 Net radiation exchange between surfaces	47
2.4.3 Radiative transfer between the wall surface and the environment	52
2.4.4 Infrared thermography	54
3 Heat transfer in building components	59
3.1 Homogeneous building components	59
3.1.1 Solid wall	59
3.1.2 Determination of characteristic temperatures	62
3.1.3 Wall with airspace	66
3.1.4 Double-glazed window	69
3.1.5 Solar gain	72

3.2	Inhomogeneous building components and thermal bridges	74
3.2.1	Simplified calculation	75
3.2.2	Thermal bridges	78
3.2.3	Dimension systems	81
3.2.4	Linear thermal bridges	83
3.2.5	Point thermal bridges	84
3.2.6	Thermal transmittance of windows	85
3.3	Overall thermal losses of the building	86
3.3.1	Direct thermal losses	87
3.3.2	Thermal losses through the ground	88
3.3.3	Thermal losses through ventilation	91
3.3.4	Thermal losses through unconditioned spaces	91
3.3.5	Transmission and overall thermal losses	93
3.4	Passive house	93
4	Moisture in building components	99
4.1	Introduction	99
4.2	Air humidity	102
4.3	Psychrometrics	106
4.4	Building components moisture	111
4.4.1	Hygroscopic damping	112
4.4.2	Capillary damping	114
4.5	Water vapour diffusion	118
4.5.1	Fick's first law	118
4.5.2	Mass convection	120
4.5.3	Water vapour diffusion through the building component	121
4.5.4	Determination of characteristic water vapour pressures	123
4.5.5	Multidimensional diffusion	127
4.5.6	Dynamic diffusion	129
4.6	Moisture transfer with condensation	132
4.6.1	Glaser method	132
4.6.2	Dynamic moisture and heat transfer	138
4.7	Requirements concerning building components	141
4.8	Comfort conditions	143
5	Basics of waves	147
5.1	Disturbance and pulse	147
5.2	Travelling waves	149
5.3	Wave equation	151
5.4	Pulse interactions	153
5.4.1	Reflection	154
5.4.2	Transmission	155
5.4.3	Superposition	156
5.5	Standing waves	156
6	Sound propagation	161
6.1	Introduction	161
6.1.1	Wave function	163

6.1.2	Power and energy transfer	166
6.1.3	Logarithmic description of sound power and intensity . . .	168
6.2	Sound sources and their properties	171
6.2.1	Isotropic point sound source	171
6.2.2	Isotropic linear sound source	172
6.2.3	Isotropic surface sound source	173
6.2.4	Directivity correction	174
6.2.5	Spectral characteristics	175
6.3	Human perception of sound and sound rating	176
6.3.1	Noise	176
6.3.2	Physiological perception	176
6.3.3	Psychological perception	178
6.4	Determination of the environmental sound pressure level	181
6.4.1	Measurement of environmental noise	182
6.4.2	Calculation of environmental noise	183
6.4.3	Road traffic	185
6.5	Noise abatement	187
7	Building acoustics	191
7.1	Acoustic properties of materials	191
7.2	Room acoustics	193
7.2.1	Echo	193
7.2.2	Diffuse sound field	194
7.2.3	Reverberation time	197
7.3	Sound absorbers	199
7.3.1	Porous sound absorbers	199
7.3.2	Membrane sound absorbers	201
7.3.3	Helmholtz sound absorbers	201
7.4	Sound transmission and insulation	203
7.4.1	Mass law	206
7.4.2	Measuring and rating the airborne sound reduction index	208
7.4.3	Measuring and rating the impact sound pressure level	210
8	Illumination	215
8.1	Introduction	215
8.2	Optical properties of materials	217
8.3	Photometry	219
8.3.1	Wavelength perception	219
8.3.2	Directivity perception	221
8.3.3	Diffusive light sources	225
8.3.4	View factor	228
8.4	Light sources	229
8.4.1	Position of the Sun	229
8.4.2	Natural light sources	233
8.4.3	Artificial light sources	235
8.5	Calculation of illuminance	237
8.6	Requirements regarding building illumination	239

Building Physics

From physical principles to international standards

Pinterić, M.

2017, XII, 254 p. 153 illus., 40 illus. in color., Hardcover

ISBN: 978-3-319-57483-7
