1	Introduction	1
1.1	Introduction	1
1.2	An Identity of Euler	2
1.3	Our First Proof of Jacobi's Triple Product Identity	3
1.4	Our Second Proof of Jacobi's Triple Product Identity	5
1.5	Some Important Special Cases of Jacobi's Triple Product Identity.	8
1.6	Euler's Pentagonal Numbers Theorem	10
1.7	Jacobi's Formula for the Cube of Euler's Product	11
1.8	Polynomial Versions of Earlier Results	12
1.9	m -Dissection.	14
1.10	Linear Transformations	15
2	Jacobi's Two-Squares and Four-Squares Theorems	19
2.1	Introduction	19
2.2	Our First Proof of Jacobi's Two-Squares Theorem	20
2.3	Our Second Proof of Jacobi's Two-Squares Theorem	22
2.4	A Proof of Jacobi's Four-Squares Theorem	23
3	Ramanujan's Partition Congruences	27
3.1	Introduction	27
3.2	$p(5n + 4) \equiv 0 \pmod{5}$	30
3.3	$p(5n + 4) \equiv 0 \pmod{5}$ Again	32
3.4	$p(7n + 5) \equiv 0 \pmod{7}$	32
3.5	$p(11n + 6) \equiv 0 \pmod{11}$	33
3.6	The Atkin–Swinnerton-Dyer Congruences for the Modulus 5	35
3.7	The Atkin–Swinnerton-Dyer Congruences for the Modulus 7	37

3.8	The Atkin–Swinnerton-Dyer Congruences for the Modulus 11	39
4	Ramanujan’s Partition Congruences—A Uniform Proof	43
4.1	Introduction	43
4.2	$p(5n + 4) \equiv 0 \pmod{5}$	43
4.3	$p(7n + 5) \equiv 0 \pmod{7}$	48
4.4	$p(11n + 6) \equiv 0 \pmod{11}$	51
5	Ramanujan’s Most Beautiful Identity	55
5.1	Introduction	55
5.2	The 5-Dissection of the Partition Generating Function	55
5.3	Two Surprising Results	57
5.4	Ramanujan’s Most Beautiful Identity	58
6	Ramanujan’s Partition Congruences for Powers of 5	59
6.1	Introduction	59
6.2	The Modular Equation of Degree 5	59
6.3	Ramanujan’s Most Beautiful Identity Again	61
6.4	The Generating Function $\sum_{n \geq 0} p(5^n n + \delta_\alpha) q^n$	62
6.5	Ramanujan’s Partition Congruences for Powers of 5	66
6.6	A Conjecture of Ramanujan	67
6.7	Some Comments	68
7	Ramanujan’s Partition Congruences for Powers of 7	71
7.1	Introduction	71
7.2	The 7-Dissection of Euler’s Product	71
7.3	The 7-Analogue of Ramanujan’s Most Beautiful Identity	73
7.4	The Modular Equation of Degree 7	76
7.5	Ramanujan’s Partition Congruences for Powers of 7	78
7.6	Two More Formulas	82
8	Ramanujan’s 5-Dissection of Euler’s Product	85
8.1	Introduction	85
8.2	Our First Proof of Ramanujan’s 5-Dissection of Euler’s Product	86
8.3	Our Second Proof of Ramanujan’s 5-Dissection of Euler’s Product	87
8.4	Review of Earlier Results	88
8.5	A Factorisation of Identity (8.4.3)	89
8.6	Ramanujan’s Versions of (8.3.1) and (8.3.2), (8.5.4) and (8.5.5)	91
9	A “Difficult and Deep” Identity of Ramanujan	93
9.1	Introduction	93
9.2	Proof Inspired by Chadwick Gugg	93
9.3	Proof Inspired by G.N. Watson	95

- 10 The Quintuple Product Identity** 99
 - 10.1 Introduction 99
 - 10.2 Proof of the Quintuple Product Identity 100
 - 10.3 A Generalisation of the Quintuple Product Identity 101
 - 10.4 Ramanujan’s 5-Dissection of Euler’s Product Again 102
 - 10.5 The 7-Dissection of Euler’s Product. 103
 - 10.6 The 11-Dissection of Euler’s Product. 103
 - 10.7 Two Identities of Ramanujan 104
 - 10.8 Continuation. 105
 - 10.9 Some Interesting Results 108
- 11 Winquist’s Identity** 109
 - 11.1 Introduction 109
 - 11.2 A Proof of Winquist’s Identity. 110
- 12 The Crank of a Partition** 113
 - 12.1 Introduction 113
 - 12.2 Introducing the Crank 114
 - 12.3 Proofs of (12.2.9)–(12.2.11). 116
 - 12.4 The Definition of the Crank. 120
- 13 Two More Proofs of $p(11n + 6) \equiv 0 \pmod{11}$, and More**. 123
 - 13.1 Introduction 123
 - 13.2 The Expansion of $E(q)^{10}$ 124
 - 13.3 $p(11n + 6) \equiv 0 \pmod{11}$ Again 125
 - 13.4 The Atkin–Swinnerton-Dyer Congruences for Modulus 11 128
- 14 Partitions Where Even Parts Come in Two Colours** 131
 - 14.1 Introduction 131
 - 14.2 The Generating Function for the $p^*(n)$ 131
 - 14.3 The 3-Dissection of $F(q)$ 132
 - 14.4 Hei-Chi Chan’s Most Beautiful Identity? 132
 - 14.5 The Modular Equation of Degree 3 133
 - 14.6 The Generating Function $\sum_{n \geq 0} p^*(3^\alpha n + \delta_\alpha) q^n$ 135
 - 14.7 Hei-Chi Chan’s Partition Congruences. 136
 - 14.8 Some New Results. 137
- 15 The Rogers–Ramanujan Identities and the Rogers–Ramanujan Continued Fraction**. 139
 - 15.1 Introduction 139
 - 15.2 Ramanujan’s Proof of the Rogers–Ramanujan Identities 141
 - 15.3 Andrews’ Proof of the Rogers–Ramanujan Identities. 143
 - 15.4 The Rogers–Ramanujan Continued Fraction (Ramanujan’s Original Derivation). 143
 - 15.5 The Rogers–Ramanujan Continued Fraction (Second Derivation) 144

15.6	A Finite Version of the Rogers–Ramanujan Continued Fraction	146
15.7	The “Difficult and Deep” Identity of Chapter 9	147
16	The Series Expansion of the Rogers–Ramanujan Continued Fraction and Its Reciprocal	149
16.1	Introduction	149
16.2	Expanding the Rogers–Ramanujan Continued Fraction and Its Reciprocal	150
16.3	Proofs of Szekeres’s Observations	150
17	The 2- and 4-Dissections of the Rogers–Ramanujan Continued Fraction and Its Reciprocal	157
17.1	Introduction	157
17.2	The 2-Dissections.	158
17.3	The 4-Dissections.	159
17.4	Forty Identities of Ramanujan	160
18	The Series Expansion of the Ramanujan–Göllnitz–Gordon Continued Fraction and Its Reciprocal	163
18.1	Introduction	163
18.2	The 2-, 4- and 8-dissections.	164
19	Jacobi’s “<i>aequatio identica satis abstrusa</i>”	169
19.1	Introduction	169
19.2	Our First Proof of Jacobi’s <i>identica abstrusa</i>	169
19.3	Our Second Proof of <i>identica abstrusa</i>	171
19.4	Some Remarkable Formulations.	171
19.5	A Simple Generalisation of Jacobi’s <i>identica abstrusa</i>	174
20	Two Modular Equations	175
20.1	Introduction	175
20.2	Proof of the First Modular Equation	175
20.3	Proof of the Second Modular Equation	176
20.4	Combinatorial Interpretations	177
21	A Letter from Fitzroy House	179
21.1	Introduction	179
21.2	Proof of the Lorenz–Ramanujan Identity (21.1.1)	179
21.3	Further Identities Involving $\sum_{m,n=-\infty}^{\infty} q^{m^2+mn+n^2}$	183
22	The Cubic Theta-Function Analogues of Borwein, Borwein and Garvan	185
22.1	Introduction	185
22.2	The 3-Dissections of $a(q)$ and $b(q)$	188
22.3	Expression of $b(q)$ and $c(q)$ as Products	189

22.4	Expressions for $b(q)$ and $c(q)$ Analogous to (21.1.1)	190
22.5	A Fine Recurrence for $p(n)$	191
22.6	The 2-Dissections of $a(q)$, $b(q)$ and $q^{-\frac{1}{2}}c(q)$	192
22.7	Two Further Relations Between $b(q)$ and $c(q)$	195
22.8	Two Relations Between $a(q)$, $b(q)$ and $c(q)$	196
22.9	Partitions Where Even Parts Come in Two Colours.	199
22.10	Two Identities	200
22.11	Some More Interesting Results.	201
23	Some Classical Results on Representations.	205
23.1	Introduction	205
23.2	Proof of the Two Triangles Result (23.1.2)	206
23.3	Square + 3×Square	206
23.4	Triangle + 3×Triangle	208
23.5	Our Second Proof of the Modular Equation (20.1.1)	209
24	Further Classical Results on Representations.	211
24.1	Introduction	211
24.2	Dirichlet’s Result for Square + 2×Square.	212
24.3	Our Third Proof of Jacobi’s Two-Squares Theorem.	212
24.4	Our Second Proof of Jacobi’s Four-Squares Theorem	213
24.5	Our Second Proof of the Square + 3×Square Result	214
24.6	Proof of Lorenz’s Partial Fractions Result	214
25	Further Results on Representations.	217
25.1	Introduction	217
25.2	Preliminary Result	219
25.3	Our Third Proof of the Modular Equation (20.1.1)	220
25.4	Proofs of the Representation Results (25.1.12)–(25.1.28).	220
26	Even More Representation Results	225
26.1	Introduction	225
26.2	Proofs.	227
27	Representation Results and Lambert Series	229
27.1	Introduction	229
27.2	Statements of Lambert Series and Bilateral Lambert Series Results.	231
28	The Jordan–Kronecker Identity	235
28.1	Introduction	235
28.2	The Jordan–Kronecker Identity	235
28.3	The Two Triangles Result	237
28.4	Triangle + 2×Triangle	238
28.5	Triangle + 3×Triangle	238
28.6	Triangle + 4×Triangle	238

28.7	Triangle + Square	239
28.8	Triangle + 2×Square	240
28.9	2×Triangle + 3×Square	241
28.10	4×Triangle + Square	243
28.11	6×Triangle + Square	243
28.12	Our Fourth Proof of the Modular Equation (20.1.1).	245
28.13	Proof of (22.11.5).	245
29	Melham’s Identities	247
29.1	Introduction	247
29.2	Triangle + 5×Triangle	248
29.3	Triangle + 6×Triangle	251
29.4	Pentagon + 5×Pentagon	253
30	Partitions into Four Squares	257
30.1	Introduction	257
30.2	The Generating Functions	257
30.3	Some Relations	261
30.4	An Important Corollary	264
30.5	Some Congruences.	265
30.6	The Generating Function for $a(72n + 69)$	267
30.7	A Remarkable Identity	269
30.8	The Generating Function for $b(72n + 69)$	271
30.9	The Generating Function for $c(72n + 69)$	274
30.10	Some Important and Useful 2-Dissections	278
30.11	The Final Steps in the Proofs of (30.5.5)–(30.5.8).	281
30.12	Our Fifth Proof of the Modular Equation (20.1.1)	284
30.13	A Formula for $p_{4\Box}(n)$	285
31	Partitions into Four Distinct Squares of Equal Parity	289
31.1	Introduction	289
31.2	The Generating Function for $p_{4o}^d(8n + 4)$	290
31.3	The Generating Function for $p_{4e}^d(8n + 4) + p_{4e}^{d+}(8n + 4)$	293
31.4	Completing the Proof of (31.1.2)	294
31.5	Some More Interesting Facts	294
32	Partitions with Odd Parts Distinct	297
32.1	Introduction	297
32.2	The Generating Function for $pod(n)$	297
32.3	Some Congruences.	298
32.4	Proof of the Congruence (32.1.1).	300
33	Partitions with Even Parts Distinct	303
33.1	Introduction	303
33.2	The Generating Function for $ped(n)$ and Other Preliminaries	303
33.3	The Derivation of (33.1.3)	305

33.4	Some Congruences.	306
33.5	Proofs of the Congruences (33.1.1) and (33.1.2)	308
34	Some Identities Involving $\phi(q)$ and $\psi(q)$	311
34.1	Introduction	311
34.2	Proofs of (34.1.1) and (34.1.2).	314
34.3	Proofs of (34.1.3) and (34.1.4).	316
34.4	Proofs of (34.1.5) and (34.1.6).	319
34.5	Proofs of (34.1.7) and (34.1.8).	321
34.6	Proofs of (34.1.9) and (34.1.10).	325
34.7	Proofs of (34.1.11) and (34.1.12)	327
34.8	Proofs of (34.1.13)–(34.1.23)	329
34.9	Proofs of (34.1.24) and (34.1.25)	331
34.10	The 2^n -dissection of Euler’s Product	331
35	Some Useful Parametrisations	335
35.1	Introduction	335
35.2	The Derivations	336
36	Overpartitions.	339
36.1	Introduction	339
36.2	Congruences for $\bar{p}(n)$ Modulo Powers of 2	340
36.3	Our First Proof that $\bar{p}(40n + 35) \equiv 0 \pmod{40}$	341
36.4	Our Second Proof that $\bar{p}(40n + 35) \equiv 0 \pmod{40}$	343
37	Bipartitions with Odd Parts Distinct.	345
37.1	Introduction	345
37.2	The Mod 3 Results.	346
37.3	The Mod 5 Results.	348
38	Overcubic Partitions.	351
38.1	Introduction	351
38.2	The Generating Function and First Steps	352
38.3	Completion.	353
39	Generalised Frobenius Partitions.	357
39.1	Introduction	357
39.2	Proofs of (39.1.1) and (39.1.2).	358
39.3	Proof of (39.1.3)	361
39.4	Proof of (39.1.4)	362
40	Some Modular Equations of Ramanujan	365
40.1	Introduction	365
40.2	Proofs of (40.1.4)–(40.1.11).	366
40.3	Proof of (40.1.12).	368

41	Identities Involving $k = r(q)r(q^2)^2$	373
41.1	Introduction	373
41.2	Proofs of (41.1.2) and (41.1.3).	375
41.3	Proof of (41.1.4)	376
41.4	Proof of (41.1.5)	376
41.5	Proof of (41.1.6)	376
41.6	Proofs of (41.1.7) and (41.1.8).	377
41.7	Proofs of (41.1.9) and (41.1.10).	377
41.8	Proofs of (41.1.11) and (41.1.12).	380
42	Identities Involving $\nu = q^{\frac{1}{2}}(q, q^7; q^8)_{\infty} / (q^3, q^5; q^8)_{\infty}$	383
42.1	Introduction	383
42.2	Proofs of (42.1.2), (42.1.9) and (42.1.10).	385
42.3	Proofs of (42.1.3), (42.1.11) and (42.1.12).	387
42.4	Proofs of (42.1.4), (42.1.5) and (42.1.6).	389
42.5	Proofs of (42.1.13) and (42.1.14).	390
42.6	Proofs of (42.1.15) and (42.1.16), (42.1.7) and (42.1.8).	392
43	Ramanujan's Tau Function	393
43.1	Introduction	393
43.2	$p = 2$	393
43.3	$p = 3$	396
43.4	$p = 5$	398
43.5	$p = 7$	399
	Erratum to: The Power of q	E1
