Materials Technology

Adaptation of the German “Guideline for Preventive Measures Against Harmful Alkali Reactions in Concrete” on Dolomite Rock Testing for Highway Projects in Bosnia and Herzegovina	3
Vedad Terzic, Thomas Mansfeld, and Gunther U. Aselmeyer	
Transfer of Innovative Research Results into the German Cement Industry	11
Patrick Schaeffel and Christoph Mueller	
From Laboratory into Practice - German Approach for Accelerating the Transfer of Innovative Materials in Civil Engineering	17
Kenji Reichling and Udo Wiens	
Kinetics of Drying Shrinkage and Creep: An Experimentally Based Code-Type Approach	24
Fernando Acosta and Harald S. Müller	
An Experimental Study of Autogenous and Drying Shrinkage	33
R. Ian Gilbert, Arnaud Castel, Inam Khan, Warren South, and James Mohammadi	
Comparative Study on the Drying Shrinkage and Mechanical Properties of Geopolymer Foam Concrete Incorporating Different Dosages of Fiber, Sand and Foam Agents	42
Zahra Abdollahnejad, Zuhua Zhang, Hao Wang, and Mohammad Mastali	
Finite Element Implementation of a Drying Shrinkage Model Based on Pore Evaporation Mechanics	49
K. Nijs and M. Ishikawa	
Numerical Analysis of Long Term Effects on Eigenstresses and Micro-cracking in Concrete	56
Gustaaf Chr. Bouquet and C. René Braam	

Mechanical Properties of Concrete with Blast Furnace Slag Fine Aggregates Subjected to Freeze-Thaw Cycles 65
 Muhammad Aboubakar Farooq, Kyoko Takeda, Yasuhiko Sato, and Kyoji Niitani

Chloride Ingress of Carbonated Blast Furnace Slag Cement Mortars 73
 Patrick E. Holthuisen, Oğuzhan Çopuroğlu, and Rob B. Polder

Detecting the Presence of Chloride in Hardened Mortar Using Microwave Non-Destructive Testing 83
 Alireza A. Chiniforush, Amin Noushini, Ali Akbarnezhad, and Hamid Valipour

Effect of Curing Regime and Controlled Permeability Formwork on Early Chloride Penetration into Fly Ash Concrete 91
 Henrik E. Sørensen and Søren L. Poulsen

Effect of the Cement Composition on the Temperature and Strength Rising at Early Age 100
 Agathe Bourchy, Laury Barnes, Laetitia Bessette, and Jean Michel Torrenti

Concrete with Flash-Calcined Dredging Sediments as a Novel Supplementary Cementitious Material 109
 Céline Van Bunderen, Ruben Snellings, Liesbeth Horckmans, Joris Dockx, Jos Vandekeybus, Lucie Vandewalle, and Özlem Cizer

High Performance Aerogel Concrete 117
 Torsten Welsch and Martina Schnellenbach-Held

Experimental Investigation on Thermal Conductivity and Mechanical Properties of a Novel Aerogel Concrete 125
 Ourania Tsioulou, Jesutomisin Ayegbusi, and Andreas Lampropoulos

Cellular Sprayed Concrete: A Very-Simple and Economic Method for Remixing an OPC into HPC at a Field 132
 Kyong-Ku Yun, NamKung Kyong, Seung-Yeon Han, and Kyeo-Re Lee

Specification Guidelines for Surface Preparation of Concrete Prior to Repair 140
 Luc Courard, Benoît Bissonnette, and Andrzej Garbacz

Bond Strength of Steel FRC Repairs to Concrete Substrate: Investigation on Adhesion Strength, Friction, and Bond Enhancing Mechanisms 148
 Giulia Rostagno, Brian Tingley, and Cristina Zanotti

Numerical Investigation of Strengthened Unreinforced Masonry (URM) Structures with Ultra High Performance Fibre Reinforced (UHPRFC) Layers. 157
 Andreas P. Lampropoulos, Ourania T. Tsioulou, and Stephanos E. Dritsos

Effects of Silane Treatment of Steel Fibres on Mechanical Properties and Durability of SFRC 165
 Hugh D. Miller, Ali Akbarnezhad, Stephen J. Foster, Sara Mesgari, and Ali Amin

The Effect of Fibre Orientation on the Uniaxial Tensile Response of UHPRFC: Experimental Evaluation and Analytical Modelling. 173
 Amin Abrishambaf, Mário Pimentel, and Sandra Nunes

Size Effect on Post-cracking Strength of High Performance Fibre-Reinforced Concrete 182
 Eduardo Galeote, Ana Blanco, Albert de la Fuente, Chris Goodier, and Simon Austin

Influence of the Anchor Fan Position on the Performance of FRP Anchors 191
 Paula Villanueva Llauradó, Jaime Fernández Gómez, and Francisco J. González Ramos

Engineering Properties and Durability of Mortars Containing New Nano Rice Husk Ash (RHA) 199
 Mohammad Balapour, Erfan Hajibandeh, and AliAkbar Ramezaniapour

Effect of Rice Husk Ash Properties on the Early Age and Long Term Strength of Mortar 207
 Binyamien I. Rasoul, Friederike K. Günzel, and M. Imran Rafiq

Rheological Behavior at Fresh State of Structural Recycled Aggregate Concrete. 215
 Mayara Amario, Marco Pepe, Enzo Martinelli, and Romildo Dias Toledo Filho

Recycling of End of Life Concrete Fines (0–4 mm) from Waste to Valuable Resources 224
 Somayeh Lotfi and Peter Rem

Behaviour of FRP-Confined Rubberised Concrete with Internal Recycled Tyre Steel Fibres 233
 Abdulaziz Alsaif, Reyes Garcia, Maurizio Guadagnini, and Kypros Pilakoutas

Investigation of New Repair Countermeasure Methods Using Crack Self-healing Technologies for Water Leakage Prevention on Subway Tunnels 242
 Keita Kamei, Tae-Ho Ahn, Jun-Hui Park, Tatsuro Hashimoto, Norihiko Ogura, and Toshiharu Kishi

The Estimation of the Self-healing Repair Technology for Cracked Underground Structures on the Urban Highway System 250
 Chien-wen Huang, Tae-Ho Ahn, Jun-Hui Park, Yuuji Konishi, Norihiko Ogura, Hiroshi Nishi, Koichiro Sato, Ryo Ishikawa, and Toshiharu Kishi

Impact of Different Conditions on Resin Coated Mortar 259
 Zain Ul-Abdin, Sarmad Zaman Rajper, Pieter De Winne, Ken Schotte, and Hans De Backer

Micromechanics-Based Prediction of the Elastic Properties of Polymer-Modified Cementitious Materials 264
 Luise Göbel, Clémence Bos, Ruth Schwaiger, and Andrea Osburg

Structural Restoration of Fractured Concrete Specimens Using Pressured Crack Injection Technology and Micro-silica Epoxy Resin Compounds 273
 Daniel Govender

Recent Development of Epoxy Coated and Filled Prestressing Strand and Behavior upon a Wire Break 284
 Shuichi Tanaka, Shinji Nakaue, Katsuhito Oshima, Yoshiyuki Matsubara, Masato Fukuda, and Keiichi Aoki

Gel as New Anticorrosion Medium in the Post Tension Industry – Scientific Study 294
 Kerstin Boigner

Optimising 3D Printed Concrete Structures Using Topology Optimisation 301
 Pascal Martens, Maarten Mathot, Freek Bos, and Jeroen Coenders

Modelling, Testing and Design

Towards Standardization: Testing and Design of Carbon Concrete Composites 313
 Jan Bielak, Josef Hegger, and Rostislav Chudoba

Load Bearing Capacity of PC Girders with and Without Fly Ash Affected by ASR Deteriorations 321
 Tuan M. Ha, Saiji Fukada, Kazuyuki Torii, Kazuhiro Kobayashi, and Toshiyuki Aoyama

Modelling the Multi-directional Distribution of ASR-Induced RC Expansions 330
 David Wald, Trevor D. Hrynyk, and Oguzhan Bayrak

Free and Restrained Shrinkage of Hybrid Steel Fibres Reinforced Concrete 339
 Zahran Al-Kamyani, Kypros Pilakoutas, Maurizio Guadagnini, and Panos Papastergiou

Hybrid Concrete Elements with Splitting Fiber Reinforcement Under Two-Dimensional Partial-Area Loading. 347
 Sven Plückerlmann, Fanbing Song, and Rolf Breitenbücher

Numerical Simulation of Steel Fibre Reinforced Concrete Girders Subjected to Cyclic Loads 356
 Peter Heek and Peter Mark

A Numerical Model for the Creep of Fiber Reinforced Concrete 366
 Rutger Vrijdaghs, Marco di Prisco, and Lucie Vandewalle

Engineering Model for SFRC Shear Strength Based on MC2010 MCFT Approach. 374
 Stijn Matthys and Tim Soetens

New Test for the Characterization of the Tensile Constitutive Behaviour of FRC. 382
 Luis Segura-Castillo, Renata Monte, and Antonio Domingues de Figueiredo

Effect of Fibers Amount on the Cracking Localization Phenomenon in Tensile Bars – An Experimental Study. 390
 Yuri S. Karinski and Avraham N. Dancygier

Tension Stiffening Behavior of Self Compacting High Strength Fiber Reinforced Concrete Incorporating River Gravels 396
 Marco Antonio Silva, Marco Pepe, Michele Pfeil, Barzin Mobasher, and Romildo Dias Toledo-Filho

Assessment of the Shear Strength of Steel Fibre-Reinforced Concrete 405
 Álvaro Picazo, Marcos G. Alberti, Alejandro Enfedaque, and Jaime C. Gálvez

Identification of FRCM Mechanical Parameters for the Retrofitting Design of Existing Structures. 413
 Marco C. Rampini, Giulio Zani, Matteo Colombo, and Marco di Prisco

On the Design Response of a FRC Statically Undetermined Structure. 422
 Marco di Prisco, Paolo Martinelli, and Matteo Colombo

Self-stressed Concrete Members Reinforced with FRP Bars 431
 Victar Tur, Manuel F. Herrador, and Volha Semianiuk

Bending Capacity of Thin UHPC Plates Based on Theoretical Predictions and In-situ Testing 439
 Jan Falbr

Shear Strength of UHPFRC Beams Without Stirrups: Fracture Mechanics Approach 447
 Sung-Gul Hong, Namhee Hong, and Ji-hyung Lee

Bond Behavior of Strands in UHPC 456
 Goran Vojvodic, Philipp Hadl, and NguyenViet Tue

A Laboratory Test of UHPC Connection for Precast Bridge Deck 466
 Yue Li, Zeren Jin, Xin Ruan, Biao Ma, and Xuefei Shi

Bending Behaviour of UHPC Reinforced with Rebars and Steel Fibres 473
 Simone Stürwald

Development of Ultra High Strength Fiber-Reinforced Concrete (ESCON) 482
 Narushige Matsunaga, Tadaaki Nozawa, Hiroki Maeda, and Yuki Kobayashi

Effect of Specimen Size and Initial Crack Location on Flexural Shear Behavior of UHPFRC 491
 Ji-hyung Lee, Sung-Gul Hong, and Changbin Joh

Shear Behaviour of UHPC Beams with Varying Degrees of Fibre and Shear Reinforcement 500
 Norbert Randl, Tamás Mészöly, and Peter Harsányi

Shear Behavior of Reinforced Recycled Aggregate Concrete Beams 508
 George Wardeh, Elhem Ghorbel, Hector Gomart, Bruno Fiorio, and Prosper Pliya

Bond and Cracking Behavior of Reinforced Concrete Members Incorporating Recycled Aggregates 516
 George Wardeh, Elhem Ghorbel, Hector Gomart, and Bruno Fiorio

Shrinkage and Expansion Strains in Self-compacting Concrete: Comparison of Methods of Measurements 524
 Katarzyna Zdanowicz and Steffen Marx

Sub-macroscopic Model of Confined Concrete According to Limit Analysis – Part 1: Principal Concrete Failure Mechanisms 533
 Lise Kjær Andersen and Lars German Hagsten

Sub-macroscopic Model of Confined Concrete According to Limit Analysis - Part 2: Estimation of Strength of Actively Confined Concrete Structures 543
 Lise Kjær Andersen and Lars German Hagsten

Ductility of Heavily Reinforced Concrete Beams 553
 Ann Van Gysel, Tom Molkens, and Inge Deygers

Investigation of Reinforcement Anchorages with Large Diameter Bars 561
 Janna Schoening and Josef Hegger

Concrete Columns with High Reinforcement Ratios 569
 Florian Wolfgang Held, Vincent Oettel, and Martin Empelmann

Efficient End-Zone Detailing of Pre-tensioned Concrete Elements 578
 Rik Steensels, Bram Vandoren, Lucie Vandewalle, and Hervé Degée

Stress-Strain Model for Concrete Under Compressive Stress that Has Undergone Freeze-Thaw Deterioration 587
 Hiroshi Hayashida

Bond Behaviour of Structural Lightweight Concrete 595
 Ayman Trad, Hassan Ghanem, and Raafat Ismail

Bearing Capacity of Partially Loaded Concrete Elements 604
 Matheus K.Y. Pamplona, Maurício P. Ferreira, and Robert L. Vollum

2D Modeling Temperature Development of Mass Concrete Structures at Early Age 612
 Tahsin Alper Yikici and Roger H.L. Chen

Deformation Patterns and Behavior of Reinforced Concrete Walls with Low Aspect Ratios 621
 Nikola Tatar and Boyan Mihaylov

Self Restrained Cracking of Reinforced Concrete Elements 631
 Costanza Anerdi, Gabriele Bertagnoli, Diego Gino, and Giuseppe Mancini

Extended Strip Model for Slabs Subjected to a Combination of Loads 641
 Eva O.L. Lantsoght, Cor van der Veen, and Ane de Boer

Shear Failure Tests on Large Specimens RC/SFRC, Including Statistical Repetition 650
 Ab van den Bos, Shen Ma, and Michael Menting

Experimental Investigations on the Shear Capacity of Prestressed Concrete Continuous Beams with Rectangular and I-Shaped Cross-Sections 658
 Martin Herbrand, Dominik Kueres, Martin Classen, and Josef Hegger

Effect of Post Shear Reinforcing Methods with Plate and Head Anchored Shear Reinforcing Bars	667
Yuji Kumagai, Takuro Nakamura, Jun Sakamoto, Hitoshi Takeda, and Junichiro Niwa	
Shear Capacity of Concrete Slabs Without Shear Reinforcement Under Concentrated Loads Close to Support	676
Günter Rombach and Lukas Henze	
Paradigms of Shear in Structural Concrete - Review and Experimental Verification	684
Alexander Beck and Walter Kaufmann	
Capacity Assessment of Concrete Box-Girder Bridge Webs Against the Combined Action of In-plane Shear and Transverse Bending.	693
Demis Karagiannis and Walter Kaufmann	
Shear Capacity – Crossing Borders.	701
Piet Barten and Marcel ‘t Hart	
Shear Bearing Behaviour of Slender Reinforced Concrete Members Without Shear Reinforcement Containing a Low Ratio of Longitudinal Reinforcement.	710
Philipp Riedel and Torsten Leutbecher	
Influence of Support Conditions on Shear in RC Members Without Shear Reinforcement	719
Viviane Adam, Karin Reissen, and Josef Hegger	
A New Shear Model for Fibre-Reinforced Concrete Members Without Shear Reinforcement	727
Ngoc Linh Tran	
Interface Stresses in Cracked Concrete: Testing for Review of Its Fundamentals	740
Max Tirassa, Miguel Fernández Ruiz, Guillaume Ancaux, and Aurelio Muttoni	
Quantification of the Uncertainty of Shear Strength Models Using Bayesian Inference	749
Arthur Slobbe, Diego Allaix, and Yuguang Yang	
Experimental Investigation of the Effect of Curtailed Reinforcement on the Shear Failure of RC Members Without Stirrups	758
Henrik Broener Joergensen and Søren Gustenhoff Hansen	
Shear Behavior of Steel or GFRP Reinforced Concrete Beams Without Stirrups.	769
Renata Kotynia, Monika Kaszubska, and Joaquim A.O. Barros	

Assessment of the Existing Formulations to Evaluate Shear-Punching Strength in RC Slabs with FRP Bars Without Transverse Reinforcement 778
 Eva Oller, Renata Kotynia, and Antonio Mari

Suitability of Shear Tension Code Requirements for the Assessment of Existing Structures Build-Up with Prestressed I- and T-Shape Girders 786
 Marco Roosen, Cor van der Veen, and Dick Hordijk

An Experimental Study on the Transition of Failure Between Flexural and Shear for RC Beams. 794
 Yuguang Yang, Cor van der Veen, Ane de Boer, and Dick Hordijk

On the Potential of Lattice Type Model for Predicting Shear Capacity of Reinforced Concrete and SHCC Structures 804
 Mladena Lukovic, Yuguang Yang, Erik Schlangen, and Dick Hordijk

Nonlinear Finite Element Analysis of Reinforced Concrete Flat Slabs Subjected to Reversed-Cyclic Loading. 814
 Andri Setiawan, Robert Vollum, and Lorenzo Macorini

Punching Shear Strength of RC Flat Slabs Provided with Shear-Heads at Interior Connections to Steel Columns. 823
 Dan V. Bompaa and Ahmed Y. Elghazouli

Punching Analyses of Symmetrically Reduced Concrete Slab Quarters 832
 Lennart Bocklenberg, Mark A. Ahrens, and Peter Mark

On the Distribution of Shear Forces in Non-axisymmetric Slab-Column Connections. 841
 Jürgen Einpaal, Robert L. Vollum, and António Pinho Ramos

Efficiency of Grooving Method Used for Deficient RC Beam-Column Joints Seismically Rehabilitated with CFRP Sheets 849
 Davood Mostofinejad and Alireza Akhlaghi

Shear Capacity Assessment of Posttensioned Concrete Girders Strengthened with CFRP Materials. 858
 Renata Kotynia, Michal Staśkiewicz, Julien Michels, Christoph Czaderski, and Masoud Motavalli

Development of New FRP Reinforcement for Optimized Concrete Structures 867
 Saverio Spadea, John Orr, Tim Ibell, and Antonio Nanni

Anchorage Systems Used in FRP Strengthening of Concrete Members 877
 Reem Jumaah, Robin Kalfat, Riadh Al-Mahaidi, and Kamiran Abdouka

Response of Earthquake-Damaged RC Columns Repaired with CFRP Composites Using Hybrid Simulation 887
 M. Javad Hashemi, Riadh Al-Mahaidi, Robin Kalfat, Yassamin Al-Ogaidi, and John L. Wilson

Seismic Performance of Reinforced Concrete Columns in Corrosive Environment 895
 Ngoc Son Vu and Bing Li

Damage Evaluation of Concrete Under Cyclic Loading by Crack Observation. 904
 Takuro Nakamura and Madoka Taniguchi

Fatigue Tests on Post-tensioned Bridge Decks 912
 Rutger T. Koekkoek, Cor van der Veen, and Ane de Boer

Fatigue of Semi-precast Slabs with Lattice Girders 921
 Katrin Wieneke and Josef Hegger

Definition of Loading Rate for the Experimental and Numerical Investigation of Reinforcement’s Bond in Concrete Under Impact Loading 929
 Petr Máca, Evmorfia Panteki, Ulrich Häußler-Combe, and Manfred Curbach

Required Thickness of Flexurally Rigid Baseplate for Anchor Fastenings 938
 Longfei Li

Experimental Research and Modelling of Corbel Strengthened by Steel Accessory. 948
 Łukasz Krawczyk and Tadeusz Urban

Creep Behavior of Bonded Anchor Under High Sustained Loading at Long Term Temperature. 956
 Giovanni Muciaccia, Andrea Consiglio, and Gianpaolo Rosati

Behavior of Anchorages with Supplementary Reinforcement Under Tension or Shear Forces 965
 Akanshu Sharma, Rolf Eligehausen, Joerg Asmus, and Jan Bujnak

Analytical Model for Anchorages with Supplementary Reinforcement Under Tension or Shear Forces 974
 Akanshu Sharma, Rolf Eligehausen, Joerg Asmus, Jan Bujnak, and Klaus Schmid

Experimental Assessment of an Innovative Beam to Column Connection 983
 Jan Bujnak, Wolfgang Roeser, Slavomir Matiasko, and Markus Böhm

Headed Bar Connections Between Precast Concrete Panels Loaded in Bending 989
 Jean Paul Vella, Robert Vollum, and Andrew Jackson

The Concept of Determining the Effective Strength of Joint Concrete in the Analysis of Internal and Edge Columns Intersected by Weaker Slab Concrete 998
 Michał Gołdyn and Tadeusz Urban

RC Fiber-Based Beam-Column Element with Flexure-Shear-Torsion Interaction 1006

Structural Assessment of an Existing Concrete Box-Girder Bridge, According to the German and the Dutch Standards	1804
Rik Cederhout and Rob P.H. Vergoossen	
Evaluation of Remained Fatigue Life of Expressway Reinforced Concrete Slab Strengthened by Steel Plate Adhesion Method	1813
Kazuyuki Onishi and Akinori Sato	
Bridge Reassessments – Realistic Shear Capacity Evaluation Using Arch Action Model	1822
Philipp A. Gleich and Reinhard Maurer	

Life Cycle Cost, As a Tool for Decision Making on Concrete Infrastructures 1832
 José Matos, Anders Solgaard, Carlos Santos, Mauricio Sanchez Silva, Poul Linneberg, Alfred Strauss, Joan Casas, Colin Caprani, and Mitsuyoshi Akiyama

Residual Service Life of Existing Concrete Structures – Is it Useful in Practice? 1840
 Joost J.W. Gulikers and Tom W. Groeneweg

Prediction of Complex Deterioration and Evaluation of RC Structural Performance 1849
 Hitoshi Ito and Toshiaki Mizobuchi

Reliability of Non-destructive Testing Methods by Detecting the Presence of Reinforcement in Existing Concrete Structures 1858
 Ibrahim Selek, Simon N.M. Wijte, and Maarten Swinkels

Long-Term Performance of External Bonding Under Moisture and Temperature Effects 1867
 Ueda Tamon, Justin Shrestha, Khuram Rashid, Ye Qian, and Zhang Dawei

Project OV-SAAL Cluster A: Widen an Existing Deck and Analyze Different Type of Joints 1877
 G.W. (Gert) van Essen and P.A. (Pieter) Bulsink

Elevation and Refurbishment of 4 Lock Bridges on the Albert Canal in Belgium 1887
 Robert Somers

Numerical Simulations of a Concrete Bridge Deck Loaded to Shear Failure 1898
 Mikael Hallgren, Isabell Eriksson, and Niklas Karlsson

Development of a Smart Key Performance Indicator for In-Situ Load Tests 1907
 Gerrie Dieteren, Agnieszka Bigaj van Vliet, Yuguang Yang, and Alex Sangers

Full-Scale Tests to Failure Compared to Assessments – Three Concrete Bridges 1917
 Niklas Bagge, Jonny Nilimaa, Arto Puurula, Björn Täljsten, Thomas Blanksvärd, Gabriel Sas, Lennart Elfgren, and Anders Carolin

Load Testing of Concrete Structures in Germany – General Practice and Recent Developments 1925
 Gregor Schacht, Guido Bolle, and Steffen Marx

Modifying and Renovating the 75 Year Old Maastunnel to Meet with Modern Standards	1933
Renee C.M. Boottink, Felix Leenders, and C.C.P. Biemans	
Restoration of Joban Line Railway Facilities Damaged by Tohoku-Pacific Ocean Earthquake	1942
Kosuke Fujimoto, Michitoshi Iwata, Shinichi Tatsuki, and Fumio Ishikawa	
Repair Strategy of the Deteriorated Immersed Maastunnel	1951
C.B.M. (Kees) Blom, M. (Mladena) Lukovic, E. (Erik) Taffijn, D.C. (Diederik) van Zanten, and W.A. (Alex) Gellweiler	
Investigations on the Strengthening of Existing Highway Bridges Under Shear and Flexural Loading with Textile Reinforced Mortar	1959
Martin Herbrand, Viviane Adam, and Josef Hegger	
Refurbishment of a Heritage Concrete Tied Arch Bridge Across River Lys	1968
Philippe Van Bogaert	
Existing Large and Thin Concrete Slab Damaged by Multiple Cracks Almost Pierced. Expertise, Diagnosis, Strengthening, Behavior and Control After Execution	1976
Augustin Popaescu, Ovidiu Deaconu, George Croitoru, and Dorin Radu	
Structural Improvement of the Construction Joint of the Cut and Cover Tunnels	1985
Yoshiki Taniguchi and Norihiko Agemi	
Post-tensioning Systems for the Strengthening of Structures	1994
Christian Gläser and Kay Löffler	
Strengthening of 100 Year Old Concrete Arch Bridge ‘Kuhbrücke/Hildesheim’	2004
Hermann Weiher, Andreas Praus, and Katrin Runtemund	
Effectiveness of S-FRCM Strengthening System Applied with Two Different Techniques	2011
Francesco Bencardino and Antonio Condello	
Durability and Life Time	
A Study of Test Methods on Alkaline Resistance and Creep Characteristic for Post-installed Bonded Anchors	2023
Mitsuhiro Nakamura, Shigenobu Iguchi, Daisuke Tsukishima, and Michitoshi Iwata	

Experimental Study on Anticorrosive Effect of New Developed Sacrificial Point Anode Method 2032
 Maki Koda, Toshiyuki Aoyama, Daisuke Yamamoto, and Hidenori Hamada

The Influence of Calcium Chloride on Flexural Strength of Cement-Based Materials. 2041
 Chunyu Qiao, Prannoy Suraneni, Marisol Tsui Chang, and Jason Weiss

Evaluation and Practical Implementation of Probabilistic Calculations of Chloride Penetration for Belgian Concretes in the Framework of a Durable Design 2049
 Liesbet De Winter, Peter Minne, Robby Caspeele, Bart Craeye, Geert De Schutter, Peter De Pauw, and Bram Dooms

Toward Performance Specifications for Concrete: Linking Resistivity, RCPT and Diffusion Predictions Using the Formation Factor for Use in Specifications 2057
 W. Jason Weiss, Robert P. Spragg, O. Burkan Isgor, M. Tyler Ley, and Thomas Van Dam

Accelerated Testing for Chloride Threshold of Reinforcing Steel in Concrete 2066
 Rob B. Polder, Marloes van Put, and Willy H.A. Peelen

A Proposal for Determining the Remaining Time to Chloride Induced Corrosion Initiation of Existing Reinforced Concrete Structures 2074
 Rob B. Polder, Michel M.R. Boutz, and Marc Ottel 

Investigations on Existing Concrete Cantilever Walls Subjected to Reinforcement Corrosion 2083
 Maciej Kwapisz, Alois Vorwagner, Matthias Rebhan, and Franz Tschuchnigg

Optimization of Corrosion Countermeasures for Chloride Attacked RC Bridge Piers in a Strengthening Project 2092
 Osamu Sanada and Hiroshi Yanagisawa

Corrosion Risk of Patch Repaired Reinforced Concrete Elements Under Influence of Internal Chloride Ions 2101
 Rohaya Abdul Malek, Atsushi Hattori, and Hirotaka Kawano

Influence of Crack Spacing on Corrosion Rate in Reinforced Concrete. 2109
 S.R. Bezuidenhout and G.P.A.G. van Zijl

Influence of Rebar Corrosion on RC Frame Push-Over Response 2118
 Alberto Lo Presti, Antonino Recupero, and Nino Spinella

Impact of Cyclic Loading and Corrosion on the Deflections of Reinforced Concrete Beams	2127
Rene P. Veerman	
New Russian Norms and Codes on Protection of Building Structures Against Corrosion	2135
Vyacheslav R. Falikman, Nikolai K. Rozentahl, and Valentina F. Stepanova	
Fatigue Model for the Structural Integrity Evaluation Applied to a Wind Turbine Concrete Shaft, Considering Corrosion and Freeze and Thaw Degradation	2144
Luis Saucedo-Mora and Sebastian Thöns	
Fatigue Strength of Highway Bridge PC Slabs Due to Wheel Loads	2152
Toshihiko Nagatani	
A New Efficient and Safe Admixture for Freeze/Thaw Resistant Concrete	2162
Oliver Schwoon	
Study on Renewal Method from Deteriorative RC Slab to Precast PC Slab in the Steel Girder Bridge	2169
Hideaki Sakai	
Effect of Pozzolanic Reactivity of Volcanic Ash in Hokkaido on the Durability of Volcanic Ash Concrete	2177
Madoka Taniguchi, Tohru Takahashi, and Takahiro Sagawa	
Durability and Bond of Reinforced Lightweight Foamed Concrete	2185
Gideon P.A.G. Van Zijl, Algurnon S. Van Rooyen, Marlin S. Mubatapasango, Trevor P.A. Dunn, and Jasmin Grafe	
Generic Modelling of Propagation of Reinforced Concrete Damage	2194
Carmen Andrade and Nuria Rebolledo	
Mechanical Properties and Chloride Ion Penetration of Alkali Activated Slag Concrete	2203
Ali Akbar Ramezaniapour, Farnaz Bahman Zadeh, Arash Zolfagharnasab, and Amir Mohammad Ramezaniapour	
Natural Carbonation of Alkali-Activated Fly Ash and Slag Pastes	2213
Marija Nedeljković, Yibing Zuo, Kamel Arbi, and Guang Ye	
The Reference Approach to Service Life Design	2224
Roberto Torrent	

Service Life Modelling for Chloride Ingress in Reinforced Concrete 2234
 Claus Vestergaard Nielsen

**Influence of Aggregates Porosity on Concrete Overall Durability –
 Outcomes of Investigations Carried Out for the New Coastal
 Road on La Reunion Island Major Project.** 2244
 Lionel Linger, Myriam Carcasses, Frank Cassagnabere, François Cussigh,
 Patrick Rougeau, Jonathan Mai-Nhu, and Pierre-Edouard Denis

**Durability and Seismic Resistance of an Aged Precast
 Prestressed Concrete Building Based on Field Inspections
 and Laboratory Testing** 2256
 Nadia Kamaruddin, Chikai Watase, Mohammad Mahdi Raouffard,
 Luis Alberto Bedriñana, Kaiwei Zhang, and Minehiro Nishiyama

**PERFDUB: A New French Research Project on Performance-Based
 Approach for Justifying Concrete Structures Durability** 2266
 Lionel Linger and François Cussigh

**Maintenance and Repair of Concrete Structures of Le Havre,
 the City Rebuilt by Perret, Inscribed to the World Heritage List.** 2275
 Jean Marc Kanéma, Anne Pantet, and Cyril Jamet

**Simplified Analytical Assessment of Damaged Induced
 by the External Sulphate Attack in Concrete Piles.** 2282
 Tai Ikumi, Sergio Cavalaro, Ignacio Segura, Chris Goodier,
 and Simon Austin

**Effect of Supplementary Cementing Materials on Concrete Resistance
 Against Sulfuric Acid Attack** 2290
 Ali Akbar Ramezaniapour, Arash Zolfagharnasab,
 Farnaz Bahman Zadeh, Seddigheh Hasanpour Estahbanati,
 Reza Boushehri, Mohammad Reza Pourebrahimi,
 and Amir Mohammad Ramezaniapour

**Influence of Oil-Based Corrosion Protection on Friction Losses
 During Strands Installation and Prestressing** 2299
 Jan Laco and Chris Hendy

**Effect of Relative Displacement of Strands Bent Over Circular
 Saddles on Fatigue Life Under Fretting Conditions** 2307
 Sherif Mohareb, Arndt Goldack, Mike Schlaich, and Scott Walbridge

**Wear Resistance of Concrete Floors: Drafting the Guidelines
 for Concrete Design and Surface Finishings** 2316
 Laura Kupers, Bram Doods, and Julie Piérard

Sustainability

- Geopolymer Concrete Ready Mixed: A Challenge!** 2327
Peter De Vries
- Flexural Behavior and Single Fiber-Matrix Bond-Slip Behavior of Macro Fiber Reinforced Fly Ash-Based Geopolymers** 2338
Mohammed Farooq, Aamer Bhutta, Paulo H.R. Borges, Cristina Zanotti, and Nemkumar Banthia
- Defining Limits for Standardization on Concrete Incorporating Recycled Concrete Aggregates** 2347
Kim-Séang Lauch, Jeroen Vrijders, and Bram Doooms
- Experimental Setup for Measuring Long-Term Behavior of Green Reinforced Concrete Beams** 2356
Nikola D. Tošić, Snežana B. Marinković, Ivan S. Ignjatović, Branislav J. Bajaj, and Milutin P. Pejović
- Sustainability of Thermally-Activated Precast Concrete Hollowcore-Floor Systems** 2365
Tomas Plauška, Thies van der Wal, and Wim Jansze
- Towards Greener Concrete: The Challenges of SUS-CON Project** 2373
Agnese Attanasio, Alessandro Largo, Raffaele Vinai, Marios Soutsos, Jeanette Visser, René van Gijlswijk, Chrysanthi Panagiotopoulou, Maria Taxiarchou, Francesco Sonzogni, Marco Preda, and Massimo Pugliese
- Sustainability and Durability of Concrete in Large Infrastructure Projects of Rijkswaterstaat (The Netherlands)** 2382
Valerie A. Diemel and Sonja A.A.M. Fennis
- Use of Post-tensioned Concrete Slabs for Sustainable Design of Buildings** 2390
Hikmet Süleymanoğlu, Almıla Uzel, and Güray Arslan
- Innovative Building Concepts**
- Inelastic Behaviour of RC Members Incorporating High Deformability Concrete** 2399
Ahmed Y. Elghazouli, Dan V. Bumpa, Bowen Xu, Peter J. Stafford, and Ana M. Ruiz-Teran
- Experimental Study on the M-V Interaction of a Hybrid Steel Connection Used in Concrete Floor-to-Balcony Junction** 2407
Gaël Le Bloa, Hugues Somja, and Franck Palas

Experimental Investigation of Hollow Core Slabs Made of UHPC – Fibres Orientation 2415
 Jan L. Vitek, Štěpán Kohoutek, David Čítek, and Robert Coufal

Investigating the Potential of Using High Performance Concrete in Precast High Speed Rail Bridges 2423
 Bradley Pring and Ana M. Ruiz-Teran

Research on an Anchoring System of Isodirectionally Turning Stay Cable 2432
 Zhiquan Liu, Xuefei Shi, and Xin Ruan

Prefabricated Tendons in Belgium and the Netherlands - Value-Add for All Involved Parties 2442
 Christian Gläser and Robert Jansen

High Tensile Bond Anchorage for Post-tensioning Bar Tendon Systems 2451
 Kay Löffler and Thomas Birckel

Design and Fabrication of Prestressed Concrete Box Girder Bridge with U-Shaped Segments 2458
 Hiroyuki Nishiguchi, Shigeo Yamamura, Yukio Hiroi, Ryo Yamashita, Nobuhisa Nakanishi, and Tsutomu Moriyama

Wound FRP for Concrete Beams with Optimised Geometries 2466
 Yuanzhang Yang, John Orr, and Saverio Spadea

A Real-Time Height Measurement and Feedback System for 3D Concrete Printing 2474
 Rob J.M. Wolfs, Freek P. Bos, Emiel C.F. van Strien, and Theo A.M. Salet

3D Printing Concrete with Reinforcement 2484
 Freek P. Bos, Zeeshan Y. Ahmed, Rob J.M. Wolfs, and Theo A.M. Salet

Case-Study on the Application of Precast Double-Curved Concrete Elements for the Green Planet Shell Structure 2494
 Sietse Witterholt, Roel Schipper, Steffen Grünewald, Pierre Hoogenboom, Rob Nijssen, and Hans van Vliet

Multi-level Optimisation of Parabolic Shells with Stiffeners Made from High-Performance Concrete 2503
 Patrick Forman, Tobias Stallmann, Peter Mark, and Jürgen Schnell

Canopy – Doubly Curved Folded Plate Structure 2512
 Jan Dirk van der Woerd, Rostislav Chudoba, and Josef Hegger

Deliberate Deformation of Concrete in the Fresh State - Crack Risk and Efficient Production of Curved Precast Elements 2521
 Sergiu Troian, Steffen Grünewald, Roel Schipper, Erik Schlangen, and Oguzhan Çopuroğlu

Extremely Light and Slender Precast Pedestrian-Bridge Made Out of Textile-Reinforced Concrete (TRC) 2530
 Sergej Rempel, Christian Kulas, Norbert Will, and Jan Bielak

Potentials of Textile Reinforced Concrete for Lightweight Noise Protection Walls 2538
 Markus Beßling, Udo Antons, and Jeanette Orłowski

The Foundation of an All Glass Arch Bridge for the Green Village on the Delft University Campus 2546
 R. Nijssse and A.H. Snijder

Marine Concrete Structures for the Future 2554
 Tor Ole Olsen

Low Damage Technologies and Resilience-Based Design for Concrete Bridges: Beyond Ductility Concepts. 2563
 Ana I. Sarkis and Alessandro Palermo

Experimental Study of the Behavior of a Steel-Concrete Hybrid Thermal Break System Under Vertical Actions 2573
 Pisey Keo, Benoit Le Gac, Hugues Somja, and Franck Palas

Comparison of Balanced Lift and Balanced Cantilever Method for the San Leonardo Viaduct 2581
 Georg Gaßner, Kerstin Fuchs, and Johann Kollegger

Steel- Concrete- Composite Bridges with Innovative Prefabricated Slab Elements 2590
 Kerstin Fuchs, Georg Gaßner, and Johann Kollegger

Challenging Projects

Implementation of a Global Durability Approach in Close Cooperation Between Owner/Engineer, Designers and Contractor’s Joint-Ventures for the New Coastal Road on Reunion Island (France) 2601
 Lionel Linger, Jonathan Mai-Nhu, Patrick Rougeau, Jean-Michel Torrenti, Christophe Outteryck, Pierre-Edouard Denis, Stéphane Magne, and Pierrick Dupuy

Adapting a Railway Bridge to Allow for 10 m of Excavation Around Raft Foundations While not Disrupting Railway Traffic 2613
 Rodriaan Spruit, Hans Mastbroek, and Luuk van Hengstum

Recent Developments in Concrete Arch Bridges. 2621
 Guillermo Capellán, Emilio Merino, Miguel Sacristán, Javier Martínez, and Santiago Guerra

Construction of an Arch Bridge by Lowering Method 2629
 Yuki Kaminaga, Takeshi Nakagawa, Hiromi Hosono, Hidetoshi Ichikawa,
 and Masanao Kajiura

**Innovative Post-tensioning Concept with UHPC Anchorages
 (Hybridanker) for Railway Bridge for Spoorbypass Mechelen** 2638
 Thomas Birckel and Hermann Weiher

Steel-Concrete Composite Flat Arch Bridge 2645
 Riccardo Stroschio

Anchorage Blocks of the Second Humen Bridge 2654
 Yuan Yong, Wu Yugang, Xu Guoping, and Ya Gan

The UHPC Catharinabridge in Leiden 2660
 Rogier van Nalta and Mirte de Graaff

**Widening of Two Existing Curved Box Girder Bridges
 Using Prefabricated Concrete Beams** 2670
 Dennis Schoenmakers, Lee van Kessel, Jan Willem de Vos,
 and Stefan Schoenmakers

Expanding the (Life) Span of Two Bascule Bridges 2681
 K. (Koen) van Cann, L. (Lei) Hendriks, and A. (Aaldert) Zeilmaker

Intricate and Challenging Projects in Prefabricated Concrete 2693
 Ajit Vasant Bhate

Design Process of a 3D-Printed Concrete Water Taxi Stop 2702
 Jan C. van Wolfswinkel, Wim van ‘t Land, Herke Stuit, Guido Bastiaens,
 Lucas Ter Hall, Wessel van Beerendonk, Theo Voogd,
 and Mustapha M. Attahiri

**Coloured Self-compacting Concrete for the New Train Station
 in Herstal, Belgium – A Case Study** 2710
 Jean-Philippe Jasienski, Abdelmajid Boulaïoun, Nathalie Balfroid,
 and Steve Conard

**Legolizing Infrastructure: Quick Building with Prefabricated
 Building Blocks - A Pleasure for the Economy** 2719
 M.A. (M) van Heesch and J.G.M. (J) de Groot

**From 1P to 4P - Innovative Solutions in Precast Prestressed
 Concrete Viaducts** 2731
 Kees Quartel and Andrew J. Zielinski

**The Combined Bypass Railway and Tangent Road Project Near
 the Station of Mechelen (Belgium)** 2739
