

Contents

Part I Data Modelling, Integration, Fusion, and Analysis in Intelligent GIS	
Space Theory for Intelligent GIS	3
Vasily Popovich	
Taming Big Maritime Data to Support Analytics	15
George A. Vouros, Christos Doulkeridis, Georgios Santipantakis and Akrivi Vlachou	
Fuzzy-Vector Structures for Transient-Phenomenon Representation	29
Enguerran Grandchamp	
Detecting Attribute-Based Homogeneous Patches Using Spatial Clustering: A Comparison Test	37
Thi Hong Diep Dao and Jean-Claude Thill	
Part II Maritime Traffic-Control Methods	
Vessel Scheduling Optimization in Different Types of Waterway	57
Xinyu Zhang, Xiang Chen, Changbin Xu and Ruijie Li	
An Intelligent GIS-Based Approach to Vessel-Route Planning in the Arctic Seas	71
Misha Tsvetkov and Dmitriy Rubanov	
Ranking of Information Sources Based on a Randomised Aggregated Indices Method for Delay-Tolerant Networks	87
Oksana Smirnova and Tatiana Popovich	
Route Planning for Vessels Based on the Dynamic Complexity Map	97
Zhe Du, Liang Huang, Yuanqiao Wen, Changshi Xiao and Chunhui Zhou	

Part III Intelligent GIS Integration with Acoustic, Remote-Sensing, and Radar Systems	
Calibration and Verification of Models Defining Radar-Visibility Zones in Marine Geoinformation Systems	115
Sergey Vavilov and Mikhail Lytaev	
Algorithmic Component of an Earth Remote-Sensing Data-Analysis System	127
Vasily Popovich and Filipp Galiano	
Modeling of Surveillance Zones for Bi-static and Multi-static Active Sonars with the Use of Geographic Information Systems.	139
Vladimir Malyj	
Geoinformational Support of Search-Efforts Distribution Under Changing Environmental Conditions.	153
Victor Ermolaev and Sergey Potapichev	
Part IV Ports, Maritime Transportation, and Logistics	
Community Structures in Networks of Disaggregated Cargo Flows to Maritime Ports.	167
Paul H. Jung, Mona Kashiha and Jean-Claude Thill	
Simulation Modeling of Maritime Monitoring Systems with the Application of an Information Technology Complex	187
Pavel Volgin and Vladimir Deveterikov	
Part V Intelligent GIS for Land-Based Research	
ST-PF: Spatio-Temporal Particle Filter for Floating-Car Data Pre-processing	197
Xiliang Liu, Li Yu, Kang Liu, Peng Peng, Shifen Cheng, Mengdi Liao and Feng Lu	
A Framework for Emergency-Evacuation Planning Using GIS and DSS.	213
Reham Ebada Mohamed, Essam Kosba, Khaled Mahar and Saleh Mesbah	
Optimized Conflation of Authoritative and Crowd-Sourced Geographic Data: Creating an Integrated Bike Map	227
Linna Li and Jose Valdovinos	

Context-Aware Routing Service for an Intelligent Mobile-Tourist Guide 243
Alexander Smirnov, Nikolay Teslya and Alexey Kashevnik

Geochronological Tracking: Specialized GIS-Analysis Tool for Historic Research 259
Yan Ivakin and Sergei Potapychev

<http://www.springer.com/978-3-319-59538-2>

Information Fusion and Intelligent Geographic
Information Systems (IF&IGIS'17)
New Frontiers in Information Fusion and Intelligent GIS:
From Maritime to Land-based Research
Popovich, V.; Schrenk, M.; Thill, J.-C.; Claramunt, C.;
Wang, T. (Eds.)
2018, XII, 269 p. 119 illus., Hardcover
ISBN: 978-3-319-59538-2
