## Contents

Simultaneous Wireless Information and Power Transfer for Multi-hop Energy-Constrained Wireless Network ........................................ 1
   *Shiming He, Kun Xie, Weiwei Chen, Dafang Zhang, and Jigang Wen*

Leveraging Scheduling to Minimize the Tardiness of Video Packets Transmission in Maritime Wideband Communication ............... 13
   *Tingting Yang, Zhengqi Cui, Rui Wang, Zhou Su, and Ying Wang*

Optimal Power Scheduling for SIC-Based Uplink Wireless Networks with Guaranteed Real-Time Performance ......................... 23
   *Chaonong Xu, Kaichi Ma, Yida Xu, and Yongjun Xu*

A Novel Collision Analysis for Multiple-Subcarrier Frequency-Domain Contention ......................................................... 37
   *Yu Zeng and Qinglin Zhao*

Wi-Dog: Monitoring School Violence with Commodity WiFi Devices .................. 47
   *Qizhen Zhou, Chenshu Wu, Jianchun Xing, Juelong Li, Zheng Yang, and Qiliang Yang*

Energy-Efficient Contact Detection Model in Mobile Opportunistic Networks ............................................................... 60
   *Yueyue Dou, Feng Zeng, and Wenjia Li*

Modeling of Random Dense CSMA Networks ..................................... 71
   *Yuhong Sun, Tianyi Song, Honglu Jiang, and Jianchao Zheng*

Throughput Maximization in Multi-User Cooperative Cognitive Radio Networks .............................................................. 83
   *Lei Lu, Wei Li, Shengling Wang, Rongfang Bie, and Bowu Zhang*

Load-Balancing Software-Defined Networking Through Hybrid Routing ........ 96
   *Gongming Zhao, Liusheng Huang, Ziqiang Li, and Hongli Xu*

A New Greedy Algorithm for Constructing the Minimum Size Connected Dominating Sets in Wireless Networks .................... 109
   *Chuanwen Luo, Yongcai Wang, Jiguoyu, Wenping Chen, and Deying Li*

Study on the Impulse Radio mmWave for 5G-Based Vehicle Position .......... 115
   *Xuerong Cui and Juan Li*
Detect SIP Flooding Attacks in VoLTE by Utilizing and Compressing Counting Bloom Filter .......................... 124
Mingli Wu, Na Ruan, Shiheng Ma, Haojin Zhu, Weijia Jia,
Qingshui Xue, and Songyang Wu

On Enhancing Energy Efficiency via Elastic Cell-Zooming Algorithm in Three-Tier Heterogeneous Wireless Networks ......................... 136
Zhu Xiao, Shuangchun Li, Tong Li, and Dong Wang

Cooperative Downlink Resource Allocation in 5G Wireless Backhaul Network ........................................ 151
Yuan Gao, Hong Ao, Quan Zhou, Weigui Zhou, Xiangyang Li,
Yunchuan Sun, Su Hu, and Yi Li

Spectral Partitioning and Fuzzy C-Means Based Clustering Algorithm for Wireless Sensor Networks ......................... 161
Jianji Hu, Songtao Guo, Defang Liu, and Yuanyuan Yang

Regionalization Compressive Sensing for Optimizing Lifetime of Sensor Networks .......................... 175
Hao Yang, Hua Xu, and Xiwei Wang

Yang Zhang, Hong Gao, Siyao Cheng, Zhipeng Cai, and Jianzhong Li

Scheduling for MU-MIMO Wireless Industrial Sensor Networks ......................... 198
Changqing Xia, Xi Jin, Jintao Wang, Linghe Kong, and Peng Zeng

Kai Zhang, Lifei Wei, Xiangxue Li, and Haifeng Qian

A Genetic Algorithm Based Mechanism for Scheduling Mobile Sensors in Hybrid WSNs Applications ......................... 220
Yaqiang Zhang, Zhangbing Zhou, Deng Zhao, Yunchuan Sun,
and Xiao Xue

SSD: Signal-Based Signature Distance Estimation and Localization for Sensor Networks ......................... 232
Pengpeng Chen, Yuqing Yin, Shouwan Gao, and Qiang Niu

An Adaptive MAC Protocol for Wireless Rechargeable Sensor Networks ......................... 244
Ping Zhong, Yiwen Zhang, Shuaihua Ma, Jianliang Gao,
and Yingwen Chen

Fair Multi-influence Maximization in Competitive Social Networks ........ 253
Ying Yu, Jinglan Jia, Deying Li, and Yuqing Zhu
Communities Mining and Recommendation for Large-Scale Mobile Social Networks ................................. 266
   Ruiguo Yu, Jianrong Wang, Tianyi Xu, Jie Gao, Kunyu Cao, and Mei Yu

Community Verification with Topic Modeling ............................... 278
   Feng Wang and Ken Orton

M2HAV: A Standardized ICN Naming Scheme for Wireless Devices in Internet of Things ............................... 289
   Boubakr Nour, Kashif Sharif, Fan Li, Hassine Moungla, and Yang Liu

Multidimensional Trust-Based Anomaly Detection System in Internet of Things ........................................ 302
   Fangyu Gai, Jiexin Zhang, Peidong Zhu, and Xinwen Jiang

Social D2D Communications Based on Fog Computing for IoT Applications ............................................. 314
   Junjie Yan, Dapeng Wu, Honggang Wang, Dalei Wu, and Ruyan Wang

Defense Against Advanced Persistent Threats with Expert System for Internet of Things ................................ 326
   Qing Hu, Shichao Lv, Zhiqiang Shi, Limin Sun, and Liang Xiao

QoE Enhancement of Task Scheduling Algorithm for VANET Applications ................................................. 338
   Nan Ding, Shuaihang Nie, Huaiwei Si, and Huanbo Gao

Ratee-Based Trust Management System for Internet of Vehicles ................................................................. 344
   Fangyu Gai, Jiexin Zhang, Peidong Zhu, and Xinwen Jiang

Achieving Secure and Seamless IP Communications for Group-Oriented Software Defined Vehicular Networks ....................................................... 356
   Chengzhe Lai, Rongxing Lu, and Dong Zheng

An Efficient Distributed Randomized Data Replication Algorithm in VANETs ................................................. 369
   Junyu Zhu, Chuanhe Huang, Xiying Fan, and Bin Fu

Preserving Privacy in Social Networks Against Label Pair Attacks ............................................................... 381
   Chenyang Liu, Dan Yin, Hao Li, Wei Wang, and Wu Yang

Preserving Local Differential Privacy in Online Social Networks .............................................................. 393
   Tianchong Gao, Feng Li, Yu Chen, and XuKai Zou

Pricing Privacy Leakage in Location-Based Services ................................................................. 406
   Fenghua Li, Jiawen Liu, Liang Fang, Ben Niu, Kui Geng, and Hui Li

MAIS: Multiple Activity Identification System Using Channel State Information of WiFi Signals ................................. 419
   Chunhai Feng, Sheheryar Arshad, and Yonghe Liu
Differentially Private Frequent Itemset Mining from Smart Devices in Local Setting .................................................. 433
   Xinyuan Zhang, Liusheng Huang, Peng Fang, Shaowei Wang, Zhenyu Zhu, and Hongli Xu

3P Framework: Customizable Permission Architecture for Mobile Applications ............................................. 445
   Sujit Biswas, Kashif Sharif, Fan Li, and Yang Liu

A Bitcoin Based Incentive Mechanism for Distributed P2P Applications ..................................................... 457
   Yunhua He, Hong Li, Xiuzhen Cheng, Yan Liu, and Limin Sun

An Attribute-Based Secure and Scalable Scheme for Data Communications in Smart Grids .................................. 469
   Chunqiang Hu, Yan Huo, Liran Ma, Hang Liu, Shaojiang Deng, and Liping Feng

Space Power Synthesis-Based Cooperative Jamming for Unknown Channel State Information ........................ 483
   Xin Fan, Liang Huang, Yan Huo, Chunqiang Hu, Yuqi Tian, and Jin Qian

Breakdown by Rumors: Vulnerability of D2D Communications from Online Social Networks .......................... 496
   Tianyi Pan, Md Abdul Alim, Xiang Li, and My T. Thai

Security Enhancement via Dynamic Fountain Code for Wireless Multicast ................................................... 509
   Qinghe Du, Wanyu Li, and Houbing Song

Accurate Indoor Localization with Multiple Feature Fusion ................................................................. 522
   Yalong Xiao, Jianxin Wang, Shigeng Zhang, Haodong Wang, and Jianmong Cao

A Power-Efficient Scheme for Outdoor Localization .................................................................................. 534
   Kang Yao, Hongwei Du, Qiang Ye, and Wen Xu

Design and Realization of an Indoor Positioning Algorithm Based on Differential Positioning Method ............. 546
   Wei-qing Huang, Chang Ding, Si-ye Wang, Junyu Lin, Shao-yi Zhu, and Yue Cui

A Study on the Second Order Statistics of $\kappa$-$\mu$ Fading Channels ......................................................... 559
   Changfang Chen, Minglei Shu, Yinglong Wang, and Nuo Wei

Effective Influence Maximization Based on the Combination of Multiple Selectors ..................................... 572
   Jiaxing Shang, Hongchun Wu, Shangbo Zhou, Lianchen Liu, and Hongbin Tang
A Simpler Method to Obtain a PTAS for Connected $k$-Path Vertex Cover in Unit Disk Graph .............................................. 584
Zhao Zhang, Xiaohui Huang, and Lina Chen

Maximum-Weighted $\lambda$-Colorable Subgraph: Revisiting and Applications .... 593
Peng-Jun Wan, Huaqiang Yuan, Xufei Mao, Jiliang Wang, and Zhu Wang

Wireless Image Relay: Prioritized QoE Scheduling with Simplified
Space-Time Coding Mode Selection ..................................... 605
Shuan He and Wei Wang

Software Defined Routing System ........................................... 617
Xianming Gao, Baosheng Wang, and Wenping Deng

Towards Efficient Multimedia Data Disseminating in Mobile
Opportunistic Networks .......................................................... 629
Peng Liu, Yue Ding, Jia Xu, and Tingting Fu

Job Scheduling Under Differential Pricing: Hardness
and Approximation Algorithms ............................................... 641
Qiuyuan Huang, Jing Zhao, Haohua Du, Jiahui Hou, and Xiang-Yang Li

Distributing Negative Messages in VANET Based on Meet-Table
and Cloud Computing .......................................................... 653
Baohua Huang and Wei Cheng

CacheRascal: Defending the Flush-Reload Side-Channel Attack
in PaaS Clouds ................................................................. 665
Weijuan Zhang, Xiaoqi Jia, Jianwei Tai, and Mingsheng Wang

Measuring the Declared SDK Versions and Their Consistency
with API Calls in Android Apps ............................................... 678
Daoyuan Wu, Ximing Liu, Jiayun Xu, David Lo, and Debin Gao

Employing Smartwatch for Enhanced Password Authentication ............... 691
Bing Chang, Ximing Liu, Yingjiu Li, Pingjian Wang, Wen-Tao Zhu, and Zhan Wang

AIS: An Inaudible Guider in Your Smartphone ................................ 704
Xing Zhou, Liusheng Huang, Yang Xu, and Wei Yang

A Case Study of Usable Security: Usability Testing of Android Privacy
Enhancing Keyboard ................................................................. 716
Zhen Ling, Melanie Borgeest, Chuta Sano, Sirong Lin, Mogahid Fadl, Wei Yu, Xinwen Fu, and Wei Zhao
Detecting Flooding DDoS Under Flash Crowds Based on Mondrian Forest  . . . 729
